1 Introduction

1.1 Trends and developments

In recent years, the processes of radicalisation leading to violent extremism have greatly evolved. The variety of ideologies that provide inspiration for extremist groups is growing and include religious inspired extremism, left wing, anarchist and right wing ideologies as well as nationalist and separatist ideologies. Also in terms of appearance, extremists are no longer acting only as part of organised, hierarchical organisations but also within smaller cells and sometimes as lone wolves. All forms of extremism have become more globalised taking full advantage of the opportunities of the interconnected world. Consequently, terrorist or violent extremist actions are becoming harder to detect and predict by the authorities, making traditional law enforcement techniques alone insufficient to deal with these evolving trends, particularly in relation to tackling the root causes of the problem. There is a need for a broader approach, aimed at earlier intervention and prevention and engaging a wide spectrum of actors throughout society.

Within the EU, Member States are facing a variety of challenges. One of the most visible threats, especially in Western Europe but spreading also to other parts, are the large number of (young) people traveling to conflict zones such as Syria and Iraq to (in many cases) become foreign terrorist fighters and join terrorist groups. There are now believed to be thousands of Europeans within the region. Apart from their potentially violent acts abroad, the threat posed by radicalised returnees, skilled in combat and with links to terrorist groups has all too painfully been revealed in some recent terrorist atrocities within the EU. It has also shown the ability of terrorist organisations overseas to radicalise and recruit from afar. In Eastern parts of Europe, right wing and nationalist extremism is growing and more people are starting to leave for Ukraine to engage in the conflict. The southern parts of Europe often serve as transit-countries which might in the long run also influence home-grown extremism in these countries. In reaction to the foreign terrorist fighter phenomenon, the rise in Islamist extremism and domestic extremism are forming a breeding ground for increased polarisation and intolerance in societies throughout Europe.

1.2 The RAN and the EU communication “Preventing Radicalisation to Terrorism and Violent Extremism: strengthening the EU’s Response”

In light of the trends and developments, the Radicalisation Awareness Network (RAN) was set-up by the European Commission in 2011. The RAN is an EU-wide umbrella network of practitioners and local actors involved in preventing and countering radicalisation. Within the RAN, different working groups have been created where participants exchange their experiences, knowledge and practices in different fields and areas relevant for tackling radicalisation. Participants include NGOs, representatives of different communities, think tanks, academia, law enforcement agencies, government representatives and consultancies.¹

Taking into consideration the latest trends and evolving patterns and means in radicalisation processes as well as the work undertaken by the RAN, the European Commission has adopted a Communication entitled “Preventing Radicalisation To Terrorism And Violent Extremism: Strengthening The EU's Response”² focusing on ten themes:

¹ More information about the RAN is available through: http://ec.europa.eu/dgs/home-affairs/what-we-do/networks/radicalisation_awareness_network/index_en.htm

² Find the complete Communication through: <http://ec.europa.eu/dgs/home-affairs/e-library/documents/policies/crisis-and>

- National strategies to prevent radicalisation
- Consolidation of expertise dedicated to preventing radicalisation
- Alignment of the work of the RAN with the needs of the MS
- Training of practitioners to prevent radicalisation
- Development of ‘exit strategies’ to help individuals leave violent extremism
- Cooperation with civil society and the private sector to address challenges faced online
- Empowerment of victims to prevent radicalisation
- Encouragement of young people to think critically about extremist messages
- Research into trends in radicalisation and evaluation of existing practices
- Closer work with partner countries to prevent and counter radicalisation both inside and outside the EU

1.3 The RAN Collection: Objectives and key insights

The RAN Collection of Approaches and Practices is one of the main outcomes of the network, providing an overview of the different insights, lessons learned and practices that have come out of the network so far. It complements the Communication in that it illustrates the kind of measures that can be taken in the different areas identified to e.g. enhance the awareness and competence of first line practitioners, involve and engage more closely with communities, families, victims of terrorism or former terrorists, address new forms and appearances of radicalisation (e.g. through an increased use of the Internet and social media) and more generally establish the appropriate framework for comprehensive prevent work.

The Collection serves as a practical, evolving and growing tool, where practitioners, first liners and policy makers may:

- draw inspiration from;
- find replicable examples to adapt to their local/specific context;
- look for counterparts to exchange prevention experiences.

Practices in the Collection are aimed at a broad range of different target groups. Since the primary focus of the RAN is on prevention, many practices are aimed at citizens and youth in general and specific individuals and communities at risk. Prevention can also be towards individuals who have been (violent) extremists but who want to leave an extremist group and/or mind-set. Therefore some practices will be aimed towards de-radicalising for example convicted terrorists.

In this broad spectrum it is important to underline that the work of the RAN fits under the *Prevent* strand of the EU's Counter Terrorism Strategy which is focused only on identifying and tackling the factors which contribute to radicalisation. This is not about *Pursue* which focuses on hindering terrorists' capacity to plan and organise terrorist atrocities. Nevertheless practitioners of *Pursue* (e.g. law enforcement, or security agencies) should be encouraged to engage with *Prevent* practitioners, as they may be able to help advise on the individual's background, motivations and grievances. This is particularly the case with regards to supporting those who have been convicted.

1.3.1 RAN DNA

Throughout the RAN meetings and the Collection document there are a number of key, overarching insights that apply to all approaches, also referred to as the RAN DNA:

[terrorism/radicalisation/docs/communication_on_preventing_radicalisation_and_violence_promoting_extremism_201301_en.pdf](https://www.ran.europa.eu/terrorism/radicalisation/docs/communication_on_preventing_radicalisation_and_violence_promoting_extremism_201301_en.pdf)

- *Prevention is key:* it is crucial to invest in interventions that are aimed at removing the breeding ground for radicalisation to prevent these processes or stop them as early as possible.
- *Involving and training first line practitioners is key:* these practitioners will be the first professional point of contact for individuals at risk. To be able to have a preventative approach, they need to be aware of signals of radicalisation, know how to seek support to address these signals whilst maintaining in a positive relationship with the individual.
- *Multi-agency approach is key:* To be able to prevent radicalisation and to safeguard individuals at risk, multi agency cooperation is necessary to provide a consistent and reliable network. In this network, expertise and information can be shared, cases can be discussed and there can be agreement and shared ownership on the best course of action. These networks should be combinations between law enforcement, professional care organisations as well as NGO's and community representatives.
- *Tailor made interventions, adapted to local circumstances, are key:* each individual at risk is different which calls for a case-by-case approach. It is important to understand the individuals' background, grievances, motivations, fears, frustrations etc. to be able to develop a suitable intervention. Besides internal factors, external factors such as the individual's social environment and other local circumstances need to be taken into account to provide effective support.

1.4 Methodology

1.4.1 The approaches and lessons learned

The RAN Secretariat has selected a variety of practices and has gathered them under seven different themes or “approaches”. Each of the seven approaches identified are briefly described, notably its aim(s) and underlying methodology. It is then complemented by lessons learned and by a set of relevant examples of practices.

The approaches presented in this Collection are the following:

- Training for first line practitioners: raising awareness of first line practitioners working with vulnerable individuals or groups at risk of radicalisation.
- Exit strategies: de-radicalisation programmes to re-integrate violent extremists and disengagement programmes to at least dissuade them from violence.
- Community engagement and empowerment: engagement and empowerment of communities at risk, establishing a trust based relation with authorities.
- Educating young people: education of young people on citizenship, political, religious and ethnic tolerance, non-prejudiced thinking, extremism, democratic values, cultural diversity, and the historical consequences of ethnically and politically motivated violence.
- Family support: for those vulnerable to radicalisation and those who have become radicalised.
- Delivering alternative narratives: offering alternatives to extremist propaganda and worldviews either online or offline.
- Creating CVE infrastructure: institutional infrastructures to ensure that people at risk are given multi-agency support at an early stage.

The work on the Collection was undertaken in a spirit similar to the spirit which presides over the work of the RAN in general: it is not intended as a scientific exercise (even if the underlying

methodologies may also find support in scientific literature) but more as an empirical, very concrete, practitioner-oriented one.

The seven approaches were selected through different means:

- The policy recommendations proposed by the RAN Working Groups and discussed at the High-level Conference in January 2013, served as a first input. For example, one of the recommendations was to ‘develop frameworks for multi-actor cooperation and information sharing’. This contributed to the development of an approach called ‘Creating Counter Violent Extremism infrastructures’.
- Some of the approaches directly or indirectly derived from the work of the RAN sub-groups. For example, the RAN Derad Working Group contributed to the development of the approach of ‘De-radicalisation and Disengagement’. The work of other groups, less thematic such as RAN Health, RAN POL and RAN P&P, led to the development of approaches such as ‘raising awareness of first line practitioners’ and ‘creating institutional infrastructures’, two themes that have been extensively discussed within these RAN sub-groups. Other themes that played a prominent role in other RAN Working Groups were educating youths (RAN Prevent & RAN VVT), dialogue at an individual, group and collective community level (RAN Prevent, RAN Derad, RAN INT/EXT), family support (RAN INT/EXT, RAN Prevent) and online challenges (RAN @, RAN Derad and RAN VVT). All these themes have led to the development of related approaches.
- Some of these approaches have also been described in scientific research as common practices. For example, in the EU-funded project “Containing Radicalisation In Modern Europe (CRIME)”, a survey was undertaken in order to learn from first liners which practices they used in the field of (de-)radicalisation. The result of this study provided valuable insight in possible approaches.

The seven approaches, empirically selected, have then been discussed and approved in the RAN Steering Committee (consisting of the 16 RAN Working Group Leaders, the RAN Secretariat, the European Commission - DG Home - and the Committee of the Regions) and are considered consensual among the practitioners of several Member States.

Lessons learned derive from the discussions in the RAN meetings as well as from experience of various practitioners/practices and have been also reviewed by the RAN Steering Committee.

1.4.2 The samples of practices

The format for description of each practice entails the following elements:

Name of the practice and the organisation responsible for/carrying out the initiative.

Description: this part includes a short description of the aim and nature of the practice, methods and products and, if made available by the owner organisation, results and effects.

Approach: the main approach under which the practice can be categorised. Some practices are categorized under multiple approaches. However to make this a user-friendly document, practices have been categorised under the approach considered the most relevant.

Target audience: the target audience designates the group the practice is focused on or wants to create an impact for. The following subdivision of target audiences has been used:

- Authorities
- Local community organisations/NGOs
- Educators/academics
- Families
- First responders or practitioners
- General public
- Online
- Health practitioners
- Law enforcement officers
- Prison/probation/judicial practitioners

- Violent extremists
- Formers
- Victims of terrorism
- Youth/pupils/students

Deliverables: concrete outputs of the practice e.g. publications, products, trainings etc.

Evidence and evaluation: explanation on if and how the effectiveness of the practice has been measured and evaluated.

Sustainability and transferability: indication of how the practice can be sustained in the future (e.g. funding structures) and how it could be made applicable to other (local) contexts.

Geographical scope: reference to the areas (countries, cities, regions) in which the practice had been implemented.

Start of the practice: reference to the year and month the practice was developed and implemented to indicate the maturity of the practice. If the practice is no longer active, this is also mentioned here.

Presented and discussed in RAN meeting: reference to the RAN meeting(s) the practice has been presented and peer-reviewed.

Relation to other EC initiatives: reference to other EC or EU initiatives that the practice is connected to besides the RAN.

Organisation: reference to the organisation(s) that have developed and are executing the practice.

Country of origin: reference to where the practice has been developed.

Contact details: names, email addresses and telephone numbers of people who may be reached for more information, inspiration and cooperation. If personal contact details are not made available, links to websites and informative documents have been added.

If one of the elements is not applicable for a practice, e.g. there have been no concrete deliverables, this element will not be part of the practice outline.

To select the practices for the Collection, the following criteria and procedure were formally adopted by the RAN SC:

Collection criteria:

- The practice has an explicit connection to the subject of radicalisation/violent extremism. This means that in the aims and/or activities/methods of the practice, there is a link to preventing and countering radicalisation and/or violent extremism.³
- The practice is an activity/method that has been used/is in use by professionals and/or community members;
- Basic elements of the practice are transferrable to other (local) contexts (This implies research projects will not be included in the Collection);
- The practice is based in the European Union (EU)/European Economic Area (EEA);
- All practices' descriptions have been checked with the organisations in question and if necessary have been adjusted to their feedback;
- The practice has been presented in a RAN meeting allowing peer review;
- The practice has been reviewed and approved for adoption by the Steering Committee.

³ *It should be noted that there are practices in the area of early prevention, hate speech and hate crime that do not have an explicit link to radicalisation. However, through RAN meetings they have found to be inspirational and useful in terms of method. Therefore these kind of practices have sometimes been included in the RAN Collection. This will be indicated in the practice description.*

Collection procedure:

The way to collect practices is to have these discussed in a WG meeting, enabling peer review. Only in exceptional cases, practices that have not been discussed at a WG meeting will be nominated to be included in the Collection.

When applicable, practices for the Collection will be on the agenda of the SC and all practices need to be formally approved on by the SC to become part of the Collection. All nominations will be sent to the SC. In the list of nominations, RAN Secretariat will inform if there are nominations that do not meet all adopted criteria (except reviewing by the SC). For these nominations, the SC can discuss (requirements for) adoption in the Collection.

The practices in the Collection do not have an ‘approved by European Commission/RAN’ label but have the aim to be informative and inspiring.

1.5 An evolving tool

In general, the Collection does not aim at to provide comprehensive information about the existing practices, nor does it aim to give a comprehensive picture of all existing practices in the EU Member States. As the Collection presently published is the result of experiences within the RAN, the approaches and practices are not exhaustive and other/additional valuable categories of practices or approaches may be added in the future.

Moreover, the Collection is also available as a digital tool for practitioners on the European RAN website. The paper version does not contain some of the features which are available in the digital version, such as cross-referencing of practices. As a work-in-progress, the Collection will continuously be adjusted and filled with new practices from EU Member States.

2 Training for first line practitioners

2.1 General description

This approach consist in raising awareness of first line practitioners working with vulnerable individuals or groups at risk of radicalisation in order to ensure that they are well equipped to detect and to respond to radicalisation.

Throughout Europe training courses have been developed to raise awareness and understanding among first liners who have responsibility for individuals who may be vulnerable to radicalisation. First line workers have been identified as a key group that can make an important contribution to this issue and include teachers, youth workers, community police officers, child protection workers, (mental) health care workers. In contrast to policy makers for example, first line workers - potentially - have the ability to recognise and refer individuals who may be vulnerable. However, they do not always have a sufficient understanding of radicalisation, do not understand the warning signs, or know what to do in response. Therefore, raising their awareness on this issue is required.

2.2 Aims

The training courses aim to:

- Raise awareness and understanding about the process of radicalisation in general and in specific contexts.
- Help practitioners recognise some of the signs presented by vulnerable individuals at risk.
- Empower first line public sector workers with tools and instruments to respond appropriately.
- Stimulating multi-agency partnerships and early intervention to protect and divert people from the risks they face.

2.3 Methods

Training courses can either be tailor-made for specific first line workers (such as community police officers or mental health care workers) or be designed for first line staff in general.

The training courses differ in duration, varying from a two and a half hour interactive workshop to a three day training course.

Most courses include information on:

- Terminology: what is radicalisation, (violent) extremism, terrorism, jihadism?
- The range of groups and movements: extremist right-wing, extremist left-wing, Al-Qaeda, IS, Jabhat-al-Nusra, other groups, lone actors et cetera
- Basic knowledge of radical ideologies:
 - What is the ideal society according to violent extremists? Where are they fighting for? Who are the enemies/scapegoats?
 - What are differences between the radical form of the ideology and the more moderate mainstream version?
 - Difference between orthodox and radical varieties of the ideology?
 - Main varieties within the radical ideology?
 - What is the origin of the ideology, whose voices are considered credible?
 - Place of the radical ideology within society and geo-political situation.

- The radicalisation process: understanding radicalisation as a unique and gradual process, emphasizing there is no such thing as a common profile or pathway. A radicalisation can be triggered via a combination of pull factors (how are people tempted/recruited?) and push (what are intrinsic drivers?) factors as also major life events.
- Indicators, how to identify vulnerable people at risk of radicalisation, which emphasises that there aren't 'radicalisation checklists'. It is rather about observing changing attitudes and relationships, grievances and obsessions
- Responding to (possible) radicalisation: conversation with the person, involve other professionals or credible persons, further monitoring or law enforcement. Intervening in a multi-agency context.

Depending on the offered type of (sectorial) training course, information is also provided in relation to:

- The local context.
- Legal frameworks.
- Privacy issues/sharing information.
- Specific organisational issues.
- Good practices of counter-radicalisation.

Courses are generally offered in a very practical and interactive way, by making use of case studies, assignments and including audio-visual material and offering toolkits.

2.4 Lessons learned

When providing awareness raising trainings one of the most important lessons is that language is important. Focussing on the vulnerable people who may be at risk (instead of talking about radicals or violent extremists), safeguarding and protecting them instead of criminalising, is key. Additional lessons regard the disposition of first line practitioners, training forms and materials and promoting a multi-agency approach.

Disposition

First line practitioners are often reserved when it comes to dealing with issues of radicalisation and (violent) extremism. Part of the training should focus on the disposition of first line practitioners, such as:

- Have a curious disposition and don't be afraid to ask (open) questions.
- Don't judge or moralise.
- As the problem is complex: engage with colleagues within your own organisation and organise case discussions.
- Use the skills you already know for other situations by looking at the situation as 'business as usual', working with any type of individual at risk.
- Not all cases/signs are crystal clear: dare to share your uncertainties with fellow colleagues, management and/or experts.

Training forms and materials

In terms of training forms and materials, the following is deemed important:

- Although some theoretical framework is essential, an interactive and practical approach seems to work best.
- Following from the above, case studies and sharing experiences from first liners seem to resonate most with the target audience.
- Use up-to-date materials related to the local situation like newspaper articles, screenshots of social media and so on to get a better understanding.

- Sustainability of the courses outlined above is greatly increased when additional guidance and toolkits are provided for both organisations and first line workers.
- E-learning development can also be used to mainstream the issue to a large number of workers.
- Raising questions for the participants and making provocative statements may add value to training courses on themes such as radicalisation and violent extremism as it helps to bring to the forefront assumptions and prejudices as well as uncertainties.

Promote multi-agency cooperation

Dealing with individuals at risk, should never be left to one single practitioner. The assessment and plan of action should always be made in a multi-agency setting. As such, it is key to promote multi-agency cooperation in trainings. Each practitioner has got an added value: one might have a trust-based relationship with the individual in question, another might have contact with people close in his/her network, whilst yet another has the authority to intervene with legal or administrative measures.

Both sectorial and multi-sectorial training courses seem to have merits:

A sectorial based training course seems to have the merit of being tailor made for a specific target audience, such as police officers, meeting their needs, using the language that they understand in their everyday role etc.

A more generic course for first line staff across different sectors has the advantage of getting different experiences into the same room, enabling the promotion of a multi-agency approach on the spot.

2.5 Practices

The following practices are further presented:

- Amadeu Antonio Stiftung - Expert Center on Gender and Right-Wing Extremism
- Eruditio Publica - Prodem training
- Federal Police Belgium - CoPPRa
- Fundament - De-radicalisation by mapping of regions and strengthen the local institutions
- Grundkraft - Teachers Empowered
- Police Academy The Netherlands - Training at the Police Academy
- RAN Train the Trainer
- RecoRa Institute
- Scott - Ideology Training
- Trifier - Working with Potentially Violent Loners in the Care Sector
- UK NCTP HQ - Hindsight
- UK NCTP HQ - Internet Safety Toolkit
- UK NCTP HQ - ISDEP training
- UK NCTP HQ - Operation Bachelor and Graduate
- WRAP - Office for Security and Counter Terrorism

Name of the practice	2.5.1 <i>Expert Center on Gender and Right-Wing Extremism</i>
Description	<p>The primary goal of the Expert Center on Gender and Right-Wing Extremism is to look at right-wing extremism from a gender perspective and achieve gender-sensitive approaches in all strategies and actions to prevent right-wing extremism. Right-wing extremism continues to be perceived as predominantly a “male problem”. This is highly problematic, as it hinders an accurate perspective on the power, influence and activities of right-wing women in Germany and therefore impedes the development of effective counter-strategies to deal with them. The general level of awareness concerning the racist, anti-Semitic and radical attitudes of girls and women in German civil society, in social work and education, in the media, as well as in local government is very low. The Expert Center trains kindergarten teachers, youth clubs, community centers, journalists and scientific associations of social work and education departments on how to implement a gender-sensitive approach and in order to help them to implement “democratic principles” for their institutions.</p>
Approach	<p>Training for first line practitioners Community engagement/empowerment</p>
Target audience	<p>Educators/academics First responders or practitioners Youth/pupils/students</p>
Deliverables	<p>Essays</p> <ul style="list-style-type: none"> • Heike Radvan (2012): Geschlechterreflektierende Rechtsextremismusprävention. Eine Leerstelle in Theorie und Praxis. In: Dietrich, Anette/Heise, Ljiljana: Männlichkeitskonstruktionen im Nationalsozialismus und deren Reproduktion und Rekonstruktion in der Gedenkstättenpädagogik. Hamburg (im Erscheinen). • Heike Radvan; Esther Lehnert (2012): Gender als wesentlicher Bestandteil des modernen Rechtsextremismus. Konsequenzen und Herausforderungen für das pädagogische Handeln. Gedankenanstöße für einen wirksamen Kinderschutz jenseits polemischer Scheinlösungen Download (PDF-Dokument, 358.2 KB)

	<p>Books</p> <ul style="list-style-type: none"> • Geschlechterreflektierende Rechtsextremismusprävention. Eine Leerstelle in Theorie und Praxis? In: Amadeu Antonio Stiftung (Hg.): Gender und Rechtsextremismusprävention. Berlin: Metropol Verlag 2013.
Evidence and evaluation	<p>The Expert Center on Gender and Right-Wing Extremism is part of the Amadeu Antonio Foundation (AAS). This foundation has got a professional governance structure with checks and balances to ensure that all of its projects function as well as possible and that the expertise of all of the staff members can be used adequately. Anetta Kahane is the full-time chairwoman of the AAS and responsible for all tasks related to the general management. Timo Reinfrank is the main coordinator of the AAS's activities, whereas Dr Heike Radvan is responsible for the scientific leadership. Kahane, Reinfrank and Dr Radvan form the internal leadership "trio" which steers the direction of the organisation and makes policy and strategic decisions.</p> <p>AAS maintains biweekly team meetings to facilitate the communication between the staff responsible for the different operative projects and the leadership. The operative projects have their own expert advisory committees. AAS has got an elaborated system of self-evaluation - the different projects evaluate themselves, but they also receive external evaluation by professionals specialized in qualitative scientific methods.</p> <p>AAS has got a board of trustees which consists of six members. It is led by Anetta Kahane and Dr Pia Gerber. The board of trustees meets twice a year to support the managing board and to decide about bigger funding proposals.</p> <p>The Expert Center participated and presented their work at the OSCE ODHIR expert roundtable on preventing women terrorist radicalisation in December 12th in 2011 and at the OSCE-GCTF workshop on women and countering violent extremism and radicalisation that lead to terrorism on 13-14 May in Istanbul.</p>
Sustainability and transferability	<p>The Expert Center published different brochures focusing e.g. on women in right-wing extremist organisations in order to use it to raise awareness, for political lobbying, etc. The Expert Center works closely with AAS' pilot program "Strategies against right wing extremism in Mecklenburg-Vorpommern - civil society engagement and empowerment of girls and women" and develops a sustainability and recourse mobilization plan for both initiatives. The Expert Center's work should be sustainable because of the partnership with newspapers, the training sessions for journalists, the panel discussions, etc. Sharing the findings and experiences with other organisations in different German federal lands should produce multiplication effects and sustainable change.</p> <p>Neo-Nazi violence is always a threat when trying to establish democratic and diverse structures in Germany. AAF has faced threats from neo-Nazis in several cases, but it has long-lasting experience and enough support by its partners and the media and also communicates with the security agencies. The organisation is able to withstand the difficulties.</p>
Geographical scope	Germany
Start of the practice	The Expert Center on Gender and Right-Wing Extremism was founded

	in 2011.
Presented and discussed in RAN meeting	Participated at two conferences from the RAN that were organized in December 2013 in Berlin and September 2014 in Frankfurt by Cultures Interactive.
Relation to other EC initiatives	None
Organisation	<i>The Expert Center on Gender and Right-Wing Extremism is part of the Amadeu Antonio Foundation, which is a non-profit foundation. The projects are funded by donations, the foundation's capital and programs of the German Government.</i>
Country of origin	Germany
Contact details	<p>Fachstelle Gender und Rechtsextremismus Amadeu Antonio Stiftung Linienstraße 139 10115 Berlin Germany</p> <p>Heike Radvan heike.radvan@amadeu-antonio-stiftung.de</p> <p>(+49) 30 240 886 12</p> <p>http://www.gender-und-rechtsextremismus.de/</p>

Name of the practice	2.5.2 ProDem Training
Description	<p>Empowering of first-line practitioners in prevention and intervention.</p> <p>Developed training modules “proDEM” are aimed at empowering local authorities and first-line practitioners in countering of right-wing extremism and radicalism. Modules are based on empowering by information about hate milieus, and, what is more important, on sharing of good practice in prevention of and intervention into hate crime milieus that has potential to motivate and inspire target groups. Good practice comes from abroad, but also from home country. Very important part is solving of model situations coming from target groups working agenda.</p> <p>Network building is naturally supported between target groups (youth workers, teachers, policemen, municipal officers, NGO workers).</p>
Approach	Training for first line practitioners
Target audience	Authorities First responders or practitioners
Deliverables	Training modules for teachers, youth workers, municipal officers, policemen
Evidence and evaluation	Positive feedback from participants of the trainings (about content, trainers and benefit for their work. Following participants` interest in continuing in trainings.
Sustainability and transferability	<p>The training modules have great potential to be transferrable to local contexts. The contents of the parts can be changed according to context and according to target group. The used methods do not change.</p> <p>Sustainability is ensured by documentation of the training modules that allows continuation anytime. For financing the training modules are needed external finances (funding or participants fees).</p>
Geographical scope	National, international
Start of the practice	2013
Presented and discussed in RAN meeting	RAN Prevent Prague February 2014
Relation to other EC initiatives	Member of ENoD (European Network of De-radicalisation)
Organisation	<p><i>ERUDITIO PUBLICA is a non-profit educational and research organisation. The main activities are research in the education field, the creation of pilot projects and pilot topics, the import and export of innovation methodologies and support of using modern technology in learning process during life-long learning. All outputs from named activities are directed for all types (formal, non-formal and informal) of education.</i></p> <p><i>Main aims are:</i></p> <p><i>(1) support of social inclusion and democratic culture</i></p>

	<p>(2) support of elimination of discrimination, xenophobia and racism in society (3) make the access to education for public and also specific social groups easier (4) make the different forms of education more attractive</p> <p><i>ERUDITIO PUBLICA provides education and training to local authorities (officers, policemen, teachers, social workers, youth workers, communal politicians) in prevention and intervention hate crime milieus. It also organizes lectures and workshops for pupils of basic and high schools on active citizenship and support of democratic values.</i></p> <p><i>ERUDITIO PUBLICA is also focused on searching for good practice in prevention and intervention, and good practice in support of civic society and development of civic education in the Czech Republic. Big stress is put on transfer of this good practice.</i> <i>Financing of the activities comes from national and international funding, profit activities and donations from private funds.</i></p>
Country of origin	Czech Republic
Contact details	<p>ERUDITIO PUBLICA o.p.s. Údolní 33 602 00 Brno Czech Republic</p> <p>Petra Vejvodová petra.vejvodova@eruditiopublica.com</p> <p>www.eruditiopublica.com</p>

Name of the practice	2.5.3 CoPPRa
Description	CoPPRa is a project funded by the European Union with co-funding from the Belgian Federal Police, which aims to improve the capacity of first line police officers to prevent radicalisation. It rests on the assumption that regular first line police officers - community police officers - have an important role to play in preventing radicalisation; working in the field, understanding their local communities, and tending to have good community links. However, such police officers do not always have a good understanding of radicalisation, how to recognize the warning signs, or understand what to do in response. This project has aimed to help plug those gaps through the spread of knowledge and training.
Approach	Training for first line practitioners
Target audience	Authorities Prison/probation/judicial practitioners Law enforcement officers
Deliverables	<ul style="list-style-type: none"> - CoPPRa pocket guide for first line police officers - CoPPRa Train the Trainer manual - CoPPRa E-learning on website CEPOL - CD Rom with PowerPoints of different training modules
Evidence and evaluation	An evaluation has not been taken place but the fact that this project is already implemented in almost 15 EU Member states shows the value and importance of the project.
Sustainability and transferability	<p>The developed materials are for free and available for interested police organisations. They are free to adapt the CoPPRa tools to their local needs and situation (e.g. add or delete local groups ...)</p> <p>Because the process of radicalisation is an international phenomenon and because prevention starts with first line workers, the project is for 100% transferable to other countries or police organisation</p>
Geographical scope	Belgium - Netherlands - United Kingdom - Denmark - Sweden - Finland - Latvia - Estonia - Romania - Bulgaria - Slovenia - Portugal - Spain
Start of the practice	CoPPRa 1: January 2009 till December 2010 CoPPRa 2: September 2011 till September 2013
Presented and discussed in RAN meeting	CoPPRa has been presented at the RAN plenary and several RAN POL meetings like: <ul style="list-style-type: none"> - RAN Pol Plenary meeting: Police and community engagement, Madrid 11-12 March 2015 - RAN POL kick-off meeting, Sofia, 24-26 April 2012
Relation to other EC initiatives	ISDEP - Improving Security by democratic participation (UK)
Organisation	<i>Pilot of project : Federal police Belgium</i> <i>Financing : EU ISEC funding</i>
Country of origin	Belgium

Contact details	Brussels National Airport 1930 Zaventem Belgium Jean-Pierre Devos Jean-pierre.devos@police.belgium.eu (+32) 2 709 66 18 (+32) 471 73 00 32 (mobile phone) www.coppra.eu
------------------------	--

Name of the practice	2.5.4 <i>De-radicalisation by mapping of regions and strengthen the local institutions</i>
Description	<p>Our practice has 3 main activities:</p> <ol style="list-style-type: none"> 1. Background research for government, local municipalities and other subjects about ethnical minorities of Slovak Republic with special focus on Roma people (social situation, geographical location, lifestyle, education level, integration, etc.). Preparation action plans for local first-liners to empower the institutional background, which can solve the local issues and helps in prevention of radicalisation. 2. Organisation of round table meeting with local first-line practitioners, authorities, teachers, police officers, and social workers to discuss the most pressing issues and share best practices how to counter extremist actions. 3. Operation of a regional news website, where we publish analysis of local situation, spread best practices, show positive examples of tolerance and mutual understanding, and give opportunity to local readers to discuss issues on the comment section.
Approach	<p>Training of first line practitioners Creating CVE infrastructure</p>
Target audience	<p>Authorities First responders and practitioners General public</p>
Deliverables	<p>5 round tables in South Slovakia, Atlas of Roma Communities in Slovakia 2013 (handbook, we took part on collecting data in South Slovakia), 18 action plans for local municipalities, approximately 150 articles about positive examples and local situation analysis in the language of Hungarian minority living on Slovakia.</p>
Evidence and evaluation	<p>We can see the results of our practice in the better social and economical performance of the villages and towns, in the decreasing number of violent crime in these settlements.</p> <p>We evaluate our practice on personal consultations with the leaders of formal and non-formal groups, representatives, leaders or mayors of local communities. We organize meetings for public on field, where we hold an open discussion with general public.</p>
Sustainability and transferability	<p>Most of our events are opened, we invite the public. In this way we can spread the ideas showed on meetings. We offer a model of cooperation in local, regional, national or international level for various subjects. Other organisations can use our methods of research and action plans, so do the approach of media (website) provided by us.</p>
Geographical scope	<p>Slovakia, South-East Slovakia, Gemer region.</p>
Start of the practice	<p>2012</p>
Presented and discussed in RAN meeting	<p>RAN DERAD, Ljubljana 8-9 July, 2013</p>

Relation to other EC initiatives	Member of ENoD (European Network of De-radicalisation)
Organisation	<p><i>The Fundament civic association's objective is to represent the interests of social organisations, communities and private persons, to find alternative solutions of the economic and social problems as well as their application in concrete cases. In co-operation with the business and public sector it tries to create and strengthen the dynamically developing NGO sector in the region of Gemer-Malohont (Slovakia), which can react to the challenges faced in Slovakia or in the European Union. Main areas of activities:</i></p> <ul style="list-style-type: none"> • <i>Operation of a non-profit centre, that provides services for NGOs, municipalities, schools and governmental subjects in the region</i> • <i>Co-ordination of the non-profit platform's activities in the region, managing a regional support mechanism</i> • <i>Creation of partnerships between NGOs, public administration and entrepreneurs</i> <p><i>Fundament is supported by grants of EU, Slovak government, international and local funds.</i></p>
Country of origin	Slovak Republic
Contact details	<p>Fundament Non-Governmental Organisation Daxnerova 33 979 01 Rimavská Sobota Slovakia</p> <p>Peter Mihaly mihaly.peter@hotmail.com</p> <p>(+421) 948 91 30 32</p> <p>http://fundament.sk http://gomorilap.sk</p>

Name of the practice	2.5.5 <i>Teachers Empowered</i>
Description	<p>The methodological basis of the program ‘Teachers Empowered’ rests on viewing the teaching profession as an exercise in leadership. Prerequisites for the development of leadership qualities are work on one’s own personality and one’s own vision for leadership. Personal growth is the foundation of both the content and methodology of the program. Participants discover the intrinsic strengths in their personalities and learn, through practical exercises, to anchor them and use them in their everyday work. The program also deals with effective communication and classroom leadership. It also considers the integration of empowered teaching staff in existing teams and organisations, in which the distribution of roles is different from that in the classroom.</p> <p>Effective leadership in the classroom is a key component of prevention work and conflict resolution. The more equipped educators are to facilitate the learning process and the group process in the classroom, the more able they are to deal with disturbances that arise, to support diversity and community building in the school.</p> <p>Radicalisation and violent extremism are fuelled by marginalisation and a felt sense of isolation. The ‘Teachers Empowered’ program supports educators in building the necessary skills to build sustainable relationships and community in the classroom and the school as a whole. This serves as prevention to extremism.</p>
Approach	Training for first line practitioners Community engagement/empowerment
Target audience	Educators/academics
Deliverables	Manual ‘Teachers Empowered’ (130 pages) Languages: German, English, Greek, Slovak, Spanish
Evidence and evaluation	We evaluate every program and we are using qualitative and quantitative measures to do so. We have collected data from approximately 1.000 teachers from Switzerland, Germany, Greece, Slovakia and Spain. At the end of each program we run a five hour integration and evaluation meeting, where participants give and receive feedback on their experience. Participants also fill out a quantitative questionnaire which is collected by the facilitators. We are in the process of analysing this data. Feedback is encouraging as teachers state clearly that the program succeeds in skill building, leadership and conflict resolution skills.
Sustainability and transferability	<p>The Teachers Empowered program is transferable to different cultural and educational contexts. We have applied the program in various countries (Switzerland, Germany, Greece, Slovakia, Spain). The program has also been applied with varying groups of teachers from public, private, elementary, secondary schools or whole departments of education.</p> <p>The cost of the program per participant is negotiated, depending on the financial situation and needs of each community and country. For each participant in the program the cost ranges between 180E and 820E. These cost differences reflect the wide diversity of economic</p>

	circumstances of the countries involved.
Geographical scope	Greece: Athens (Processwork Hub, www.processworkhub.gr , www.teachersempowered.gr) Spain: Barcelona (Fil a l' Agulla. www.filalagulla.org) Slovakia: Bratislava (POPI Slovakia, www.processwork.sk/en) Germany: Berlin and Brandenburg (Helga Neumann, www.soZIALESlernen.com) Switzerland: Zurich (Grundkraft, www.teachersempowered.net) The program is also been implemented by facilitators in Namibia and South Africa.
Start of the practice	2008 - Zurich - Switzerland 2009, Berlin and Brandenburg - Germany 2009, Athens - Greece 2013, Bratislava - Slovakia 2014, Barcelona - Spain (the practice is still active in all of the above countries)
Presented and discussed in RAN meeting	RAN Prevent, 3-4 March 2015, big education meeting, Manchester (UK) RAN Prevent, 15-16 September 2015, Utrecht (NL)
Relation to other EC initiatives	None
Organisation	Grundkraft (Switzerland) <i>Company of change facilitation, LTD. Provides a hub for approximately 100 facilitators across Europe using the 'Teachers Empowered' program in their work with schools. Programs are financed individually by participants or schools.</i> Processwork Hub (Greece) <i>Network of professionals involved in adult education, psychotherapy, community work, conflict resolution training and facilitation. Programs are financed individually by participants or schools.</i>
Country of origin	Grundkraft (Switzerland) in collaboration with Processwork Hub (Greece)

Name of the practice	2.5.6 <i>Training at the police academy</i>
Description	<p><u>One day training Basic Radicalisation and Terrorism (police and security partners)</u> This training, also suitable in a multidisciplinary setting (police, civil authorities and social or school workers), describes and addresses:</p> <ul style="list-style-type: none"> ○ The radicalisation process and the different forms of radicalisation and terrorism. ○ How to recognise radicalisation (indicators) and how to register radicalisation and deal with this information with regard to the police administration systems. ○ Case studies are discussed and many CoPPRa items are also included in the training. <p><u>One day training Advanced Radicalisation and Terrorism (law enforcement only e.g. police information and (covert) intelligence officers)</u> This training describes, addresses and discusses:</p> <ul style="list-style-type: none"> ○ Background information on the development of terrorism ○ How terrorists operate (terrorist planning and attack cycle) ○ Counter terrorism: the difference between police and intelligence operations ○ Several case studies. <p><u>One day training Attack Analysis (law enforcement only e.g. specialized police units Police VIP and SWAT teams)</u> This training is about attack dynamics: what happens before, during and after a (terrorist, criminal or lone- wolf) attack? How to recognise different attack types and what to do to minimise attack risk? This training is based on a detailed analysis of 20 different activist, individual or terrorist attacks.</p> <p><u>One day training Potentially Violent Lone Actors (is part of a new training for police officers dealing with administrative and control procedures in relation with shooting clubs)</u> This training describes the lone actor phenomena, such as definitions, different types of lone actors, e.g. lone wolves and school shooters. In terms of theoretical framework the pathway to intended violence is a central element in the training, as are methods of detection based on individual and operational indicators. Pro-active intervention methods are also discussed.</p> <p><u>Two days training Identifying Criminal and Terrorist Behaviour (Spotters training for police and security officers)</u> This training teaches police officers how to detect behaviour that is considered to be typical for criminals, attackers or terrorists. The intense two day training is a combination of theory and a lot of practical training exercises in the public domain.</p>
Approach	Training for first line practitioners Creating CVE infrastructure
Target audience	Authorities First responders or practitioners Law enforcement officers
Deliverables	The CoPPRa training manual and the in 2014 updated field guide.

Evidence and evaluation	Positive evaluation of presentation at the RAN Pol conference in Rome on spotting techniques. Moreover the Dutch police trained the Portuguese police units on spotting techniques.
Sustainability and transferability	As mentioned before the all the trainings are updated on a regular basis. Currently there is a lot of attention for Jihadism.
Geographical scope	The Police Academy was supportive in the CoPPRa project and former RAN conferences. So several countries in Europe
Start of the practice	All trainings exist already several years but are constantly updated.
Presented and discussed in RAN meeting	In 2013 several aspects of several above mentioned trainings were presented at RAN POL conference in Rome on 14-15 May.
Relation to other EC initiatives	CoPPRa, ISDEP, TaRDIS
Organisation	<i>Police Academy, the Netherlands No European or other supportive financing structure. The trainings are financed via the Human Resource Management agency of the National Police organisation.</i>
Country of origin	The Netherlands
Contact details	Arnhemseweg 348 7334 AC, Apeldoorn The Netherlands Koos Barten, Chief Inspector of Police School for Criminal Investigation Team Intelligence (+31) (0)55 5392000 (ask for Koos Barten)

Name of the practice	2.5.7 <i>RAN Train the trainer programme</i>
Description	<p>To enable Member States to reach out to different actors with awareness training, the RAN TAS built a one-day Awareness and Actions Workshop. It's an interactive workshop using YouTube, voting cards and several exercises based on real life case situations.</p> <p>The one day workshop is being transferred in a two day train the trainer programme. On day one the to-be-trained trainers experience the workshop. On day two they are offered support in building their own workshop, using the RAN materials</p> <p>Since the workshop is a robust, basic awareness programme, the to be trained persons don't have to be experienced trainers, but more like facilitators who feel comfortable leading a session in front of a group of colleagues or network partners.</p>
Approach	Training for first line practitioners
Target audience	<p>First responders or practitioners</p> <p>Law enforcement officers</p> <p>Educators/academics</p>
Deliverables	The training materials in the train-the-trainer are being used in English, and were afterwards translated for the hosting country. The materials are a PowerPoint, short movies and exercise materials
Evidence and evaluation	<p>The train the trainer was delivered five times in mixed groups within a Member State. In the event it became evident that the framing of radicalisation in terms of vulnerable people, us and them processes and the supply/demand model were helping to find common language and images of the challenges at hand. The used models were perceived as helpful in reaching out to others on the complex issue of radicalisation.</p> <p>On the second day the participants are offered an opportunity to design their own awareness workshops, using the materials they have been introduced to.</p>
Sustainability and transferability	<p>The developed materials are generic and in easily updated PowerPoint and Word. Because of the interactive nature of the two day programme it can relate to the local context, the group and recent events.</p> <p>The materials are handed over to the participants after they have completed the two day of train the trainer</p>
Geographical scope	The train-the-trainer was delivered in the Netherlands, Slovenia, Romania, Spain and Portugal
Start of the practice	De train-the-trainer programme and materials were developed in the summer of 2014 and in April 2015 was time the train the trainer was delivered (Spain).
Presented and discussed in RAN meeting	RAN Expert session in London (March 2014), RAN P&P Bucharest, RAN POL Zagreb (October 2014) and RAN POL Madrid (March 2015)
Relation to other EC initiatives	In the development of the materials there were some materials used from the ISDEP training, paid from ISEC funds
Organisation	<i>RAN TAS, the secretariat of the Radicalisation Awareness Network,</i>

	<i>being staffed by Radar Consultancy</i>
Country of origin	EU (Netherlands)
Contact details	<p>Steven Lenos s.lenos@radaradvies.nl</p> <p>(+31) (0)651091741</p> <p>http://ec.europa.eu/dgs/home-affairs/what-we-do/networks/radicalisation_awareness_network/</p>

Name of the practice	2.5.8 <i>RecoRa Institute</i>
Description	<p>The RecoRa Institute develops local expertise to counter radicalisation and violent extremism.</p> <p>RecoRa designs Train the Trainer-training and developments resources on understanding and responding to radicalisation, and train local people to cascade this within their organisation and supply accompanying resources. The aim of the train the trainer programme is to train local organisations, and individuals to use learning resources that have a proven ability to increase the active engagement of front liners and community members in tackling ideological violence. RecoRa designs tailored learning materials that build knowledge and expertise to recognise and respond to radicalisation, counter extremist messages, and reduce factors that restrict local engagement in preventative action. Local people are then trained to use these resources. Learning resources include one or two-day training programmes; Intensive master classes; community learning event; as well as youth development resources for schools. RecoRa has also developed a digital online learning resource on safeguarding against radicalisation.</p> <p>RecoRa also recruits local influential individuals and train them to become effective in de-radicalisation practice as Quality Assured (QA) mentors. The programme to quality assure local mentors aims to ensure that local neighbourhoods have expert individuals who are able to provide counter messaging support within a neighbourhood context and provide mentoring support to exit individuals from extreme violent groups or ideologies. The programme works by assessing talented local people and designing learning programmes that enhance their skills; enabling them to undertake the required activities. The designed programme includes methods to ensure that the individuals who are trained are assessed as competent to undertake such services.</p>
Approach	Training for first line practitioners Exit strategies
Target audience	Authorities First responders or practitioners Local Community Organisations/NGOs
Deliverables	<p>Resources include training manuals, student handbooks, and manuals for trainers, and all required learning resources.</p> <p>Digital courses include the facility to localise the learning resource; technical support, and data analysing software embedded into the digital learning platform.</p> <p>The QA mentoring includes practice based tests and observational assessment techniques.</p>
Evidence and evaluation	<p>The digital learning course has been tested locally within Manchester with the performance data belonging to Manchester City Council. References for this can be provided by s.butt@manchester.gov.uk.</p> <p>The safeguarding against radicalisation course [digital version] has</p>

	<p>undergone a quality assurance review by The U.K. Government's Office for Security and Counter Terrorism.</p> <p>The impact of our work has been measured client by client on a time lapse basis - one month, one year and two years after the delivery of the programmes. References and reports on impact can be supplied on request.</p> <p>Our mentoring development programmes have most recently been delivered in Luton. Performance related data relating to this belongs to Luton Borough Council. References can be requested from sarah.pinnock@luton.gcsx.gov.uk.</p> <p>RecoRa's approach has been reviewed by the RAN and included within the RAN TAS programme.</p>
Sustainability and transferability	<p>All of RecoRa's programmes are designed to fit the local context. The learning approaches have been applied in several organisational contexts and different countries with repeated results.</p> <p>The cost of such programmes will vary depending on the nature of the resources required.</p> <ol style="list-style-type: none"> 1. The initial meeting to discuss your learning needs would be free of charge and provided on an expenses only basis. Travel costs, and accommodation if required. 2. The cost would vary according to need. To give an idea of costs: if the result was a training course for nominated staff, it would cost £600 for a one day course; £800 for a two day course; and £2,500 for a five day course. This type of training can be delivered to small teams; or large groups up to 20 people [the cost remains the same. 3. Train the Trainer programmes are tailored to the individual needs and would consist of some training, guided self directed learning, and specific task mentoring - this could range from £1,500 up to £10,000. 4. The QA mentoring programmes are charged at £10,000 to assess and train a team of 15 individuals. 5. The digital learning course for an organisation, including local design, personalized access platform, technical support, and training to maximize data analysing features costs £9,000 per year for 300 users. That is £30 per user. The platform allows the organisation to host all their learning tools onto the platform.
Geographical scope	<p>The RecoRa Institute works primarily within the United Kingdom, The Netherlands and Sweden, but have delivered this approach in Denmark - Copenhagen - VINK Project.</p> <p>The approach is also being developed for Cameroon and Nigeria. The approach can be adapted and customised to any country.</p>
Start of the practice	<p>The approach was first developed in 2008 and been tested and developed since this time.</p>
Presented and discussed in RAN meeting	<p>RAN INT/EXT RAN Derad</p>
Relation to other EC initiatives	<p>Member of ENoD (European Network of De-radicalisation)</p>
Organisation	<p><i>The RecoRa Institute</i></p>

Country of origin	The United Kingdom
Contact details	<p>25 Springfield Road Birmingham B76 2SJ United Kingdom</p> <p>Yousiff Meah, Chief executive Director Yousiff.meah@recora.eu</p> <p>(+44) (0) 7881842167</p> <p>www.recora.eu</p> <p>http://www.european-network-of-deradicalisation.eu/profiles/48-the-recora-institute</p>

Name of the practice	2.5.9 <i>Violent Extremism Ideology training</i>
Description	<p>Our workforce development programmes aim to enable delegates to recognise the different violent and non-violent extremist groups that operate globally. Our courses illuminate their narratives and ideologies highlighting differences, similarities, recruitment techniques, targets for recruitment and recruitment vehicles.</p> <p>Our suite of products and highly experienced training team deliver counter narratives to the violent and non-violent extremist narratives and ideologies in addition to assisting the delegates to be able to recognise vulnerability in individuals and respond proportionately within established safeguarding protocols. Our programmes also enable delegates to quality assure internal referral mechanisms which can connect to the delivery of care based interventions from external providers if required/referral escalated.</p> <p>Our courses combine academic research, first hand experience and the latest training techniques to engage the delegates. Our methodology is classroom-based training with inputs that have been designed to connect with the three differing learning styles of audio, visual and kinaesthetic learners.</p>
Approach	Training for first line practitioners Delivering alternative narratives
Target audience	Local Community Organisations/NGOs First responders or practitioners Educators/academics
Deliverables	We are currently exploring an online modular based programme that will be independently accredited through CPD Standards Office in London resulting in all learning hours being redeemable against personal development files.
Evidence and evaluation	Our workforce development programmes have been “Quality Assured” by the UK Government (Home Office - Office for Security and Counter Terrorism) in addition to being independently accredited by The CPD Standards Office - London.
Sustainability and transferability	<p>Part of our programme consists of a “Training the Trainer” whereby elements of the workforce development programme can be taught to identified trainers within an organisation. Once training is complete, the new trainers go on to cascade learning within their respective organisations.</p> <p>Costs of this programme are dependant on numbers and need of the organisation and a full list of our courses with prices is attached as a separate document.</p>
Geographical scope	Europe and Middle East UK, London, Birmingham, Manchester, Bradford, Scotland, Wales, Bahrain, Manama, Saudi, Ryadh.
Start of the practice	Scott Associates 2004 Rewind UK 1987

Presented and discussed in RAN meeting	Presented at the RAN Pol Study visit in London in December 2013
Relation to other EC initiatives	None
Organisation	<p><i>Scott Associates Europe Ltd. and Rewind UK</i> <i>Scott Associates are a private Limited company</i> <i>Rewind UK are community interest company</i></p> <p><i>Financing - both Scott and Rewind are not funded organisations and our revenue models are built on commissioned work in consultancy and workforce development programmes with respect to countering violent extremism</i></p>

Name of the practice	2.5.10 Working with Potentially Violent Loners (PVL) in the Care Sector
Description	<p>Working with PVLs requires expertise on different levels. Generally, a three-stage process is involved among individuals and organisations: from the ‘aha’-phase (identification of a PVL) and the ‘hmm’-phase (what to do now that we identified a PVL?) to the ‘okay’-phase (based on early detection of a PVL, expertise can be applied and developed).</p> <p>In the ‘aha’-phase we focus on awareness of the existence of the target group within the mental healthcare caseload. Together we explore the social context of intended extreme violence. We also consider the backgrounds of PVLs as a subject within various professional practices. In the ‘hmm’-phase we bring in current affairs, scientific research, and actual experience, and we concentrate on refining the significance of this subject for the field involved. We also address different kinds of PVLs, processes of radicalisation, as well as research on the breeding grounds for processes of radicalisation and early detection. In the third phase (‘okay’) we explore collaboration with professionals within and outside one’s immediate practice or institution. This phase also highlights the theme of ‘sharing information’, based on the book ‘The patient’s secret’ (Trifier-ISI, 2015).</p> <p>Themes addressed are:</p> <ul style="list-style-type: none"> • demarcation of the PVL group • breeding ground of radicalisation • Processes of radicalisation • forms of intended extreme violence • jihad and exit travellers • radicalisation and disorders • diverse evidence- and practice-based approaches • model: pathway of intended extreme violence • sharing of information <p>Group/team composition:</p> <ul style="list-style-type: none"> • Group size is 12-15 participants. • Participants from disciplines linked to providing care to clients can sign up for these courses, as well as members of multidisciplinary teams involved in interpreting processes associated with clients’ behaviour. <p>Result:</p> <ul style="list-style-type: none"> • After completing the workshop, participants have skills and knowledge that allows them to: • Support colleagues who deal with detection of PVLs in their caseload • Recognize PVLs and possible links to mental healthcare • Identify signs of radicalisation • Refer effectively to specialist care • Establish an internal network to structure the sharing of expertise with their own organisation
Approach	Training for first line practitioners

Target audience	Health practitioners First responders or practitioners Educators/academics
Deliverables	Handouts, theoretical models
Evidence and evaluation	The participants in the training evaluated training with an 8 (on a scale from 1 to 10).
Sustainability and transferability	The models used are internationally known, like the demand-supply model, Pathway of Intended Extreme Violence and models on loss of control of aggression. The training of Trifier consists of a 2 days program. The cost depends on the large group between €350,-/€425,- pp.
Geographical scope	Europe
Start of the practice	July 2012
Presented and discussed in RAN meeting	RAN Health March 2012 (Budapest) RAN Health December 2012 (Prague) European Congress on Violence in Clinical Psychiatry, March 2015 (USA)
Relation to other EC initiatives	None
Organisation	<i>The training is developed and delivered by two companies: Trifier Training, a training company working in mental health, and Radar Consultancy, a training and consultancy organisation with expertise on (training for) prevention of radicalisation.</i>

Name of the practice	2.5.11 HINDSIGHT
Description	This is a multimedia product designed to bring together key partners from agencies that work within Prevent. It supports partners to identify early intervention opportunities to safeguard individuals who may be vulnerable to any form of extremism. The product uses a scenario based on a fictitious character and the interactions he has with different multi-agency front line practitioners during his journey towards extremism.
Approach	Training for first line practitioners Creating CVE infrastructure
Target audience	Authorities Educators/academics Health practitioners
Deliverables	Training modules, DVD and linked workbooks. Delivery and Cost Free, excluding venue and provisions. Training is also provided at no cost. All facilitators have to receive training. The exercise can be delivered by front line sector.
Evidence and evaluation	Each delivery is quality assured by trained facilitators in Prevent. Each Hindsight event is evaluated by regional Prevent teams
Sustainability and transferability	Benefits Hindsight has been shown to give partners confidence to discuss issues around sharing information, understanding vulnerability and risk management.
Geographical scope	Across England Wales
Start of the practice	Since 2010 developed by ACPO(TAM)/NCTPHQ
Presented and discussed in RAN meeting	Nominated through a number of RAN POL meetings but especially at the RAN Pol Study visit in London in December 2013.
Organisation	<i>UK National Counter Terrorism Policing HQ (NCTPHQ) (Formerly ACPO(TAM)). NCTPHQ is the strategic coordinating and liaison body of the UK police response to Prevent across all 43 police force. Financing: Financed by the National Counter-Terrorism Policing HQ using central government CT funding.</i>
Country of origin	United Kingdom
Contact details	NCTPHQ Prevent, 8th Floor 10 Victoria Street London, SW1H 0NN United Kingdom prevent.acpotam@met.pnn.police.uk

Name of the practice	2.5.12 <i>Bachelor and Graduate</i>
Description	<p>Operation Bachelor and Operation Graduate are two discussion exercises developed by the ACPO Prevent Delivery Unit to help the police engage with representatives from the further and higher education sector. In addition the exercises will help increase awareness of the Prevent strategy and develop relationships between the police, students and staff.</p> <p>The exercises both use a short film to set the scene and initiate debate amongst participants about what affects the safety and security of students. Links are made between personal safety and the security of the UK, and participants are asked to consider ways in which vulnerabilities should be referred.</p>
Approach	<p>Training for first line practitioners</p> <p>Creating CVE infrastructure</p>
Target audience	<p>Authorities</p> <p>Educators/academics</p> <p>Youth/pupils/students</p>
Deliverables	<p>Scenario exercises have been developed for these products which include; extremist leaflets found on campus; extremist student society created on campus, raised student tensions as a result of hate crimes; extremist speakers visiting the university and a student who is suspected of viewing terrorist material online. A series of leaflets have been created to assist the discussions.</p> <p>Delivery and Cost</p> <p>Free, excluding venue and provisions. Training is also provided at no cost. Delivered by university staff.</p>
Evidence and evaluation	<p>Each delivery is quality assured by trained facilitators in Prevent. Each Bachelor and Graduate event is evaluated by regional Prevent teams</p>
Sustainability and transferability	<p>Bachelor and Graduate aim to:</p> <ul style="list-style-type: none"> • Build awareness of the identification and response to vulnerability and radicalisation in a university context • Encourages participants to create a University Independent Advisory group (IAG)
Geographical scope	Across England Wales
Start of the practice	Since 2010 developed by ACPO(TAM)/NCTPHQ
Presented and discussed in RAN meeting	Nominated through a number of RAN POL meetings but especially at the RAN Pol Study visit in London in December 2013.
Relation to other EC initiatives	None

Name of the practice	2.5.13 <i>Internet Safety Toolkit</i>
Description	The Internet Safety Toolkit is a series of engaging films and animations for young people, which includes advice for parents, teachers and guardians around safeguarding principles. The toolkit aims to provide awareness of the dangers posed to young people from those who seek to exploit their vulnerabilities via the Internet.
Approach	Training for first line practitioners Community engagement/empowerment
Target audience	First responders or practitioners Youth/pupils/students Families
Deliverables	Training modules, DVD Delivery and Cost Free, excluding venue and provisions. Training is also provided at no cost. All facilitators have to receive training. The exercise can be delivered by front line sector.
Evidence and evaluation	Each delivery is quality assured by trained facilitators in Prevent. Each delivery of material from the toolkit is evaluated by regional Prevent teams
Sustainability and transferability	The toolkit has been shown to give partners confidence to discuss issues around the Internet with a range of audiences but particularly young people.
Geographical scope	Across England Wales
Start of the practice	Since 2012 developed by ACPO(TAM)/NCTPHQ
Presented and discussed in RAN meeting	Nominated through a number of RAN POL meetings but especially at the RAN Pol Study visit in London in December 2013.
Relation to other EC initiatives	None
Organisation	<i>UK National Counter Terrorism Policing HQ (NCTPHQ) (Formerly ACPO(TAM))</i> <i>NCTPHQ is the strategic coordinating and liaison body of the UK police response to Prevent across all 43 police force.</i> <i>Financing: Financed by the National Counter-Terrorism Policing HQ using central government CT funding.</i>

Name of the practice	2.5.14 <i>Improving Security by Democratic Participation (ISDEP)</i>
Description	<p>ISDEP is a 2 1/2 year project based on the EU Commission's Prevent strand of the Counter Terrorism Strategy. Developed in partnership with eight EU Member States, this pioneering training programme is the first of its kind designed to offer consistency and increase awareness of counter radicalisation for frontline practitioners across Europe. ISDEP has developed a training package which will equip front-line practitioners in institutions dealing with vulnerable individuals to recognise, prevent and respond to all forms of radicalisation.</p> <p>The ISDEP training programme will be supported by a comprehensive visual and interactive based e-learning programme. This training platform will be freely accessible over the Internet to front line practitioners in 7 European languages.</p>
Approach	<p>Training for first line practitioners Creating CVE infrastructure</p>
Target audience	<p>First responders or practitioners General public Online</p>
Deliverables	<p>There are 10 training modules consisting of numerous interactive exercises and videos. All supported by comprehensive facilitator note. The material has been adapted and translated into 7 languages. There will be an e-learning package.</p>
Evidence and evaluation	<p>Evaluation completed following initial training to trainers from 8 member states across four work sectors of Higher Education, Law Enforcement, Prison & Probation and NGO/Voluntary was extremely positive. As a consequence the material is being adapted and delivered across all 8 member states in each of the work sectors. Training delivered to 100 UK multi-agency Prevent practitioners was again very favourably received.</p> <p>Independent evaluation is built into the project and this is ongoing at present. Results will be available in May 2015.</p>
Sustainability and transferability	<p>The materials are free of charge. Familiarisation and training with the materials is required but at nil cost.</p>
Geographical scope	<p>Currently being delivered across 8 EU member states: UK, Sweden, Italy, Bulgaria, Czech Republic, Germany, Belgium & Netherlands</p>
Start of the practice	<p>ISDEP project commenced December 2012 with first training delivered in January 2014.</p>
Presented and discussed in RAN meeting	<p>Presented at RAN POL meeting, Zagreb - October 2014 Presented at RAN P&P meeting Bucharest - April 2014 Elements of ISDEP utilised within Radar DNA training</p>
Relation to other EC initiatives	<p>None</p>
Organisation	<p><i>UK National Counter Terrorism Policing HQ (NCTPHQ) (Formerly</i></p>

Name of the practice	2.5.15 Workshop to Raise Awareness of Prevent (WRAP)
Description	<p>WRAP is an hour long interactive facilitated workshop centred on a DVD, aimed at frontline staff. The workshop aims to give them:</p> <ul style="list-style-type: none"> - An awareness and understanding of the Prevent agenda and their role within it. - The ability to recognise potentially vulnerable individuals who may be at risk of radicalisation. - The ability to share concerns leading to a common sense based response to support and intervene with vulnerable people. - Receive a clear picture of the risks and threats both nationally and at a local level - Develop knowledge and confidence to discuss grievances - Gain a raised awareness of the key issues and how these can be tackled by all agencies to keep Derbyshire safe and prevent terrorist activity - Increase your agency's capacity to prevent violent extremism.
Approach	Training for first line practitioners Delivering alternative narratives
Target audience	First responders or practitioners Educators/academics Health practitioners
Deliverables	The interactive facilitated workshop is centred a round a DVD, which is accompanied by a feedback form for the trainer and the delegates.
Evidence and evaluation	<p>WRAP 2 recognises the role of the community in building resilience and links. WRAP and Channel together support the safeguarding processes.</p> <p>The WRAP workshop is regularly updated and refreshed to deal with any emerging issues, which will improve the understanding of Prevent amongst the public sector and the community will be improved.</p>
Sustainability and transferability	There are no direct costs of WRAP, for individuals using the service. Free of charge for local facilitators across the Public Sector, which is tailored to meet the needs of the public.
Geographical scope	England, Scotland and Wales
Start of the practice	Introduced to the public in 2007 and revised in 2009 and 2014. Since November 2011 our primary Prevent training product, the Workshop to Raise Awareness of Prevent - second edition (WRAP2) has been delivered nationally across all sectors to address this training need.
Presented and discussed in RAN meeting	Prevent Working Group 2014

3 Exit strategies

3.1 General description

This approach consists in setting up programmes of de-radicalisation or disengagement aimed at re-integrating violent extremists (de-radicalisation) or at least dissuading them from violence (disengagement).

Even after the best of prevention efforts, some individuals still become (violent) extremist. While reaching that stage, they may fall under the responsibility of security services/police, and, in some cases, of justice and prison services. However, there will (most likely) come a day when the individual has finished his/her sentence and will have to be re-integrated into society. For a successful re-integration into society it is important to offer those inmates who committed offenses of violent extremism programmes of de-radicalisation or disengagement. “Exit” programmes should not only be offered to individuals who have faced imprisonment. Ideally, imprisonment should be prevented by offering this kind of programmes before the individual undertakes illegal activities. These programmes might therefore be targeted towards individuals in different stages of the radicalisation process; from those that have aligned with extremist groups but have not yet undertaken terrorist activities to those that have themselves executed terrorist attacks.

3.2 Aim

The process of de-radicalisation or disengagement includes behaviour and cognitive aspects such as beliefs. Disengagement refers to a behavioural change, such as leaving a group or changing one’s role within it. It does not necessitate a change in values or ideals, but requires relinquishing the objective of achieving change through violence. De-radicalisation, however, implies a cognitive shift—i.e., a fundamental change in understanding. In short, to use the words of John Horgan (2009) de-radicalisation and disengagement programmes “are generally directed against individuals who have become radical with the aim of re-integrating them into society or at least dissuading them from violence.”

Processes of de-radicalisation and disengagement are therefore complex psychological processes. Attempting to measure such processes (particularly in terms of success) is extremely difficult. Such processes can be undertaken through specific programmes and can be delivered across a range of environments including at the individual and collective level. In many cases de-radicalisation, disengagement and rehabilitation programmes will take place while in prison or on probation.

3.3 Methods

Two clear distinctions can be made when defining the appropriate type of intervention: at the individual or collective level. Which option undertaken will link back to the aim of the programme, the time-frame and what is achievable. Particularly in a group or a peer induced setting (such as a community or a prison) collective de-radicalisation or rehabilitation may be preferable. However, anecdotal evidence seems to indicate that a tailor-made and therefore individual intervention might be best. This could include for instance, individual mentoring.

There are also two key types of interventions: material interventions include practical advice such as housing, school choice, and help with employment. Immaterial interventions or non-tangible

interventions include communications and behavioural therapy such as learning to talk about injustice, anger, exclusion; reflect on own behaviour or comparing ideological texts, etc.

De-radicalisation & disengagement programmes can be offered by NGO's or governments or in combination. The programmes are very intensive (6 months - 1, 5 years) involving a range of interventions and help for those exiting extremist groups:

- Individual mentoring and resilience training, for example by working on critical thinking, relationship skills, empathy, self-esteem, responsibility and the ability to self-reflect. Mentoring can be done by different kinds of individuals, both professionals and volunteers, depending on the type of person and context (e.g. in prison, outside of prison). An important prerequisite is that the mentor is a credible role model that can build trust with the mentee.
- Specific conversation techniques, motivational interviewing, Socratic conversation, Moral dilemma discussion.
- Family support and community engagement.
- Mental health care and counselling.
- Religious or ideological counselling.
- Helping to join up social and economic support for the individual from a range of state and non-state services, such as re-integration development and employment).
- Different tools such as films, books, speakers and visits to specific, relevant locations, arts or sports.

3.4 Lessons learned

Due to the individualised nature and relying on the context and environmental cues, exit-programmes are difficult to compare. It is difficult to point out one disengagement or de-radicalisation programme that is undisputedly successful. All programmes differ from each other and are adapted to the particular local, political, cultural setting/context they are provided in. However, a certain number of insights can be gleaned from such programmes as well as preferred practices. But due to the deeply psychological processes such practices are non-exhaustive. The approach provides both general insights and also those related specifically to the prison environment.

Defining Goals and Strategy

- When undertaking a de-radicalisation or disengagement programme the first step is to decide what the goal of that programme is and how it could be measured with some degree of accuracy. For instance, there is a clear difference between dissuading someone from committing acts of hatred and violence (disengagement) and changing a person's belief system (de-radicalisation).
- The goals of the programme will directly affect the length of interaction, however those undertaking de-radicalisation and disengagement should expect intensive, long-term engagement from anywhere between six months to two or three years.
- As above, the budget available will also greatly impact the scope of the programme. Goals should be established based on realistic budget projections. In terms of communication it is important to realise that there might be resistance from the general public to spend government budgets on 'helping' terrorists.

Involvement of practitioners and others

- Some derad-practitioners work fulltime in a dedicated project, others have to deal with radicalised people as part of their caseload; some are statutory staff, others work in non-governmental organisations.

- It is crucial that staff are properly trained and have specific professional competences (in for example, psychology, criminology or social work) and are highly empathetic, understanding the point of view of the individual in a respectful manner.
- It may be useful to involve former extremists in de-radicalisation and disengagement programmes, when it is appropriate to do so, because they have a deeper understanding of the challenges the individual is facing and have more credibility.
- In some cases, especially with youngsters, it can be useful to work with (local) role models (from sports, movies, music etc.). Although it can be attractive, it is not necessary to use celebrity role models.

Defining Content and Substance

- An important first step will require a profound understanding of the individual or group involved. Insight into the biographical and social background of the clients should inform first contact.
- Many de-radicalisation programmes start with conversations with the individual about respect and how to express ones feelings and relate to others. The idea behind this is to start up the conversation, to create confidence, mutual trust, personal commitment, build a relationship and to share expectations
- Programmes should focus on social skills and emotional intelligence, in particular in areas of conflict, anger, shame and anxiety. In this respect, group discussions with peers (assisted by one-on-one settings) are useful as well as using group/circle discussions with the extremist/perpetrator and other actors like social workers, community members, family and sometimes even victims.
- In establishing trust, programmes are most likely to be effective when they are voluntary - personal commitment is vital. However, sometimes a voluntary basis is not possible. Fundamental in the creation of trust is the establishment of a safe space by providing full confidentiality.
- Radicalised people often have practical problems/questions (housing issues, no job etc.). Support with these problems, will help build a relationship of trust and confidence.

Related to the various characteristics that extremists can demonstrate (as discussed above) there may be certain topics or issues to help the actors involved to understand the individual's motivation and to promote discussion⁴:

Motives	Sources for disillusionment which may lead to disengagement/ de-radicalisation
Political and ideological motivations	<ul style="list-style-type: none"> - The cause is lost and the goals are unattainable; - Contradictions between means and ends; - Ideological and ethical doubts; - Loss of status, confidence and position within group.
Friendship and group community	<ul style="list-style-type: none"> - Disillusionment with leaders; <ul style="list-style-type: none"> o Manipulation to involve them in e.g. suicide missions or other forms of non-acceptable (violent) behaviour o Not living up to expected moral standards - Disillusionment with relations within the group; <ul style="list-style-type: none"> o Paranoia o Back-stabbing o Betrayal & lack of real loyalty - Participation in a militant group does not protect from violence.

⁴ Based on research by Tore Bjørgo

Frustration and anger	Although the group does provide an outlet for their anger, it does not solve their basic problems.
Search for adventure, action and excitement	<ul style="list-style-type: none"> - Life as an extremist is boring, with endless waiting for action; - Shocked by the reality of violence, killing or wounding other people; - Shocked by friends being killed or wounded.

By identifying certain grievances it can then be possible to empathise with the individual and help to flesh out parts of the ideology that were not satisfactory and build on that disillusionment.

Winding Down Engagement

It is difficult to point out one disengagement or de-radicalisation programme that is undisputedly successful. All programmes are different and adapted to the particular local, political, cultural setting/context they are provided in. Copying and comparing programmes therefore is very difficult. Still however, some important lessons were raised for those who may be exiting the programme (also known as “after-care”):

- There should be an emphasis on after-care: what happens when people have finished the intervention and/or are getting released. There should be strategies in place so that vulnerable individuals do not feel abandoned and a need to return to their former ideology and beliefs.
- There should be strategies geared towards creating commitment: such as raising the costs of re-offending e.g. through connections with community and family;
- Support after-care by material inducements in order to facilitate reintegration.
- Social and economic support for the individual could be provided where possible (re-integration development and employment).
- Helping to join up support for the individual from a range of state and non-state services.

Potential Challenges

Actors involved should be picked astutely and based on the individual context. For instance, one or two professionals might be necessary or a whole host of actors could be involved but this will depend on the individual (or group’s) mentality. Furthermore, caution should be used if introducing non-professionally trained actors such as community/family members, formers or victims. There are a multitude of risks for involving those without formal professional skills and so these actors should be adequately prepared and supported.

Some professionals argue that programmes are best facilitated by external non-statutory practitioners who can act independently within and across statutory institutions. These practitioners should however be supported by governmental staff and quality assurance measures. It seems that the choice for a statutory or non-statutory practitioner is dependent of the amount of trust in government/authorities in each country. In countries where there is a great degree of trust, a statutory practitioner is more often employed.

Involvement of the government isn’t necessarily a pre-condition, but in many cases necessary for resources and funding. When the government is involved, it does not mean that it is always best placed to provide these services itself because of legitimacy reasons. The practices presented show that transparency about the role of the government can help in establishing a trust based relationship.

3.5 Practices

Across Member States in Europe, the following de-radicalisation and disengagement programmes are further presented:

- Association for non-violent communication
- Cultures Interactive - Fair Skills

- Danish Ministry of Social Affairs - Back on Track
- Danish Security and Intelligence Service (PET) - Disengagement and Critical Aftercare from Syria
- EXIT S.C.S. onlus (Exit, cooperative social enterprise onlus)
- Fryhuset - Exit Sweden
- HelsinkiMissio - Aggredi programme
- Jump - Exit work located within the social space
- National Police Directorate Norway - A guide to police empowerment conversations
- Race on the Agenda (ROTA) - Restoring Relation Project (RRP)
- Violent Prevention Network - Advice Centre Hesse
- Violent Prevention Network - Taking Responsibility
- ZDK - EXIT Germany

Name of the practice	3.5.1 <i>Association for Nonviolent Communication</i>
Description	<p>The Association for Nonviolent Communication runs campaigns and educational workshops for children and young people. They wish to cultivate a collective belief, especially among youth that good interpersonal relationships can only exist when every individual is able to respect the human rights of others. They believe fighting discrimination and promoting equality is the best way to prevent violence. Besides educational workshops, they run a guided help group for young males who behave violently (project “I have a choice”) and a socializing programme for children who experienced violence. With regular gatherings with trained volunteers this programme provides a safe environment to nurture violence-preventive attitudes. The goal is to offer the child a positive relationship with an adult - an experience of trust and respect. Guided help groups offer adolescents a safe place to express their ideas, opinions, beliefs and doubts in a way that no one is insulted or devaluated. In the group, adolescents get a clear message that violence is never acceptable or justifiable.</p> <p>The Association’s de-radicalisation work is integrated in the programme for perpetrators of domestic violence, whose stereotypes and misguided “radical” beliefs about “others” (frequently regarding gender roles) present risk factors for violent behaviour. The notion is that the society, and therefore the de-radicalisation organisations, should hold perpetrators accountable for their actions and try to change their behaviour. The work with perpetrators is focussed on domestic violence and combines group work (social skill training) with individual work, depending on the situation and individual. A lot of clients lack the capability of proper human interaction. Generally they start with a course of 12 weeks in which they focus on respect, violence, human rights, gender equality, parenthood etc. After the 12 weeks there is additional individual support, when needed.</p>
Approach	Exit strategies
Target audience	Youth/pupils/students Families General public
Deliverables	Guidelines for professional staff, working with perpetrators of violence.
Evidence and evaluation	Methods of violence prevention, such as workshops for children and youth, seminars for professional staff and other various methods of raising awareness amongst general public has proven successful in the past. However there is an explicit shortage of prevention programmes, and initiatives for financing this programmes. Furthermore, since violence is a problem of the society in general, zero tolerance to violence should be integrated in the national school programme.
Sustainability and transferability	The Association for Nonviolent Communication is one of a few organisations in Slovenia that offers professional individual and group counselling for young and adult perpetrators of violence. In 2014 the

	Association has worked with 486 individuals who committed violence against youngsters or peers.
Geographical scope	Slovenia
Start of the practice	The Association for Nonviolent Communication was founded in 1996 and has been active in the field of violence prevention since then.
Presented and discussed in RAN meeting	RAN Derad, 8-9 July 2013, Ljubljana (SI)
Relation to other EC initiatives	None
Organisation	<p><i>The Association for Nonviolent Communication (Društvo za nenasilno komunikacijo) is a non-governmental organisation in Slovenia. They strive for an integrated solution to the problem of violence and have designed a program that offers counsel to those who committed violence. When the Association for Nonviolent Communication was founded in 1996 they established 3 primary objectives:</i></p> <ol style="list-style-type: none"> <i>1. to reduce society's tolerance to violence,</i> <i>2. to help those who commit violence to change their behaviour,</i> <i>3. to help those who experience violence.</i> <p><i>With these objectives they want to prevent violence and mitigate its consequences with programs for those who experienced violence. Furthermore, they organise educational activities to raise awareness for the occurrences of violence among the professional community and the general public. They consider violence as a problem of the entire society and of the ones who commit it.</i></p> <p><i>The Association for Nonviolent Communication is mainly financed by the Slovenian Ministry of Labour, Family and Social Affairs, local communities and FIHO (Foundation for financing the disability and humanitarian organisations in the Republic of Slovenia).</i></p>
Country of origin	Slovenia

Name of the practice	3.5.2 <i>Fair Skills - youth cultural peer training</i>
Description	<p>The “Fair Skills”-practice (FS) reaches out to young people from various at-risk communities, brings them together in one external facility and trains them as youth-cultural workshop facilitators in a peer-learning setting (three one-week workshops). These peer-facilitators then go back to their communities and form Fair Skill youth teams and give workshops themselves, while being coached by CI’s FS team. In their home communities the FS peer facilitators will be assisted by local development round tables in which CI brings together local and national stakeholders to raise awareness of the project, its objectives and look for possibilities of community support.</p> <p>The “Fair Skills”-method combines (i) facilitated peer-learning in youth-cultural activities with respective experts (e.g. in Rap/Slam Poetry, Breakdance, Skateboarding, Comic/Graffiti/Visual Design, DJ-ing, Digital Music Production, and others) with (ii) exercises from civic education/pedagogical anti-bias and mediation, and (iii) adds psychologically based self-awareness group-work. Hence, ‘(Youth-)Cultures’ are employed in a way that has ‘Interactive’, preventive, and de-radicalising/rehabilitative impact with difficult to address groups of young people who are at risk of turning away from the school system and from mainstream society altogether. In this way FS systematically supports participants’ emotional intelligence, social skills as well as biographical and political awareness and delivers specific non-violence and mediation methods, enabling the young people to informally promote civil society values and skills in their communities.</p> <p>From 2015 on FS will be piloted in Eastern European states (CZ, HU, SK) in the ISEC project “European Fair Skills - De-radicalisation Training for Peer Role Models and Youth Workers” (EFS).</p>
Approach	Exit strategies Community engagement/empowerment
Target audience	Violent extremists Local Community Organisations/NGOs Youth/pupils/students
Deliverables	<p>A temporary web-presentation on Fair Skills has been provided: http://cultures-interactive.de/konzept-fairskills.html</p> <p>Aside of a collection of Fair Skills methods compendium (in German) which will be reworked in an English edition in 2015-16 during the European Fair Skills project (ISEC).</p> <p>Papers on the practice have been published, e.g. http://cultures-interactive.de/tl_files/publikationen/engl/2012_Weilnboeck_Baer_Hat_e-Crime-Prevention-and-Deradicalisation.pdf</p>
Evidence and evaluation	CI’s practices have been evaluated recently by Phineo (Association of Quality Assurance in NGO work) and has been awarded the Phineo ‘Method-works’ certificate in 2014.

	<p>In earlier years CI's practices have been evaluated, received scientific counselling and have been show-cased by the Federal Model Projects' evaluation and counselling department (attached to the governmental programs).</p> <p>Self evaluation and collecting client feed-back is standing practice in CI also as a training module for the young peer-facilitators to be employed by them in their own fledgling peer-workshops.</p> <p>The practice was presented and received positive feedback in various RAN-Derad, RAN Prevent and in one RAN Victim Voices workshops.</p> <p>The European Fair Skills project (EFS, ISEC, 2015-16) is a partnership with RAN Derad partners from Eastern European states (CZ, HU, SK).</p> <p>The Fair Skills' media-practice offshoot EDNA (see EDNA practice) was discussed with RAN@ members on different occasions and a project partnership between CI/FS and RAN@ member organisations were built, dealing with media narratives in CVE contexts.</p>
Sustainability and transferability	<p>The Fair Skills practice is currently being piloted in and adapted to three Eastern European states (CZ, HU, SK) in the European Fair Skills project (EFS, ISEC, 2015-16). Sustainability is particularly enhanced by the FS element of the "local development round tables" in the home communities of the young FS peer facilitators. These roundtables bring together local and national stakeholders to raise awareness of the project, its objectives and look for possibilities of community support. CI's sustainability support will be enhanced by having been appointed 'Federal Center of Excellence for Youth-Cultural Prevention of Violent Extremism and Xenophobia' (by the governmental Prevention Department) in 2015.</p>
Geographical scope	<p>In Germany in rural, small cities and large city districts, since 2015 also in Eastern EU member states</p>
Start of the practice	<p>Fair Skills was developed in a three-year Federal Model Project within the governmental prevent program in 2009-11. It has since become CI's core method which was also incorporated in the LocalDerad (Hako_reJu) and will be transferred and adapted in Eastern European states (CZ, HU, SK) in the ISEC project "European Fair Skills - De-radicalisation Training for Peer Role Models and Youth Workers" (EFS) from 2015 onwards. Fair Skills will be further developed as part of CI's mission as 'Federal Center of Excellence for Youth-Cultural Prevention of Violent Extremism and Xenophobia'.</p>
Presented and discussed in RAN meeting	<p>Fair Skills was presented in various RAN Derad workshops (mostly in Stockholm, Barcelona and Dublin) also in RAN Prevent 2013 and with regard to its principle of narrative interaction also in RAN VVT in The Hague 2012.</p>
Relation to other EC initiatives	<p>CI is member of the:</p> <ul style="list-style-type: none"> - ENoD (European Network of De-radicalisation) - IMPACT Europe project (Innovative Methods and Procedures for Assessing Counter-radicalisation Techniques in Europe) - EENeT (European Experts Network in Terrorism Affairs, by the Federal Criminal Police Office, Bonn/Germany) - EDNA (European Platform of De-radicalising Narratives) - WomEx (Women, Girls, Gender in Extremism and Prevention)

	<p>CI engages in (associate) partnerships with the:</p> <ul style="list-style-type: none"> - EFUS (European Forum for Urban Security - GCTF Global Counter Terrorism Forum. - In similar European contexts, CI cooperates with the: - OSCE (TNT/Transnational Threats Department) - FES (Friedrich Ebert Foundation) - Robert Bosch Foundation, the international stipend program Civic Education in Action for practitioners from Eastern Europe
Organisation	<p><i>“Cultures Interactive e.V. (CI) - Intercultural Education and Violence Prevention” is a NGO that works both in prevention and first-line de-radicalisation with young people at-risk which engage in or have shown to be susceptible to violent right-wing extremism or ethno-nationalism/religious fundamentalism - also to xenophobic, racist, and other forms of hateful and exclusionary behaviour. In 2005 CI began to work in preventing right-wing extremist/neo-Nazi subcultures which emerged in East-Germany after reunification. Since 2008 CI also works in inner-city districts struck by migration-related ethnic and religious radicalisation and hate crime.</i></p> <p><i>CI’s Federal Model Projects and EU-ISEC and EU-research projects placed an emphasis on developing methods for prevention and rehabilitation work with high-risk youth populations that have largely been failed by existing measures. Methodologically, the CI approach for prevention and de-radicalisation settings combines youth-cultural creativity workshops with civic education and psychologically based self-awareness group-work. CI also provides gender specific and gender awareness methods (WomEx) and offers advanced training in methodology for youth work practitioners to enable them to pro-actively and efficiently handle incidents of hate speech/crime and extremist indoctrination/recruitment (LocalDerad). Beneficiaries and partners of CI interventions are schools/teachers, youth centres, street/youth work, prisons, local authorities/police, communities, local press/media - especially around social hot-spot areas.</i></p> <p><i>In 2014 CI began to work in Eastern EU Member States and act as co-chairing organisation for the RAN working group on “De-radicalisation”, comprising EU wide first-line workers’ organisations which are involved in de-radicalisation processes with regard to all forms of extremism, including religious extremism and gangs. In 2015 CI has been appointed a ‘Federal Center of Excellence for Youth-Cultural Prevention of Violent Extremism and Xenophobia’ (by the governmental Prevention Department).</i></p>

--	--

Name of the practice	3.5.3 Back on Track
Description	<p>Specifically targeted are inmates and remand prisoners, who are charged with or convicted of terrorism and/or inmates vulnerable to radicalisation.</p> <p>The aim is to help the inmates - by the intervention of a mentor - to become better at tackling everyday situations, problems and conflicts by:</p> <ul style="list-style-type: none"> • Motivating them to opt for a lifestyle free of crime; • Involving the inmates network outside prison (family, friends etc.); • Assisting with concrete challenges surrounding release (finding a home, job etc.). <p>An important part of Back on Track is also to train mentors to strengthen their competencies in relation to various dialogue techniques, coaching and conflict management skills. The mentors will have mentor coaches who can support and supervise them throughout their work.</p>
Approach	Exit strategies Training for first line practitioners
Target audience	Violent extremists Families Prison/probation/judicial practitioners
Deliverables	In English only a leaflet describing Back on Track
Evidence and evaluation	<p>Around 40 inquiries have been evaluated- in some of the cases a mentor course was established and in others the inmate was not in the target group or otherwise not motivated to participate.</p> <p>4 mentor courses have been interrupted as the inmate no longer wanted to participate.</p> <p>At the moment 6 mentor courses are established and another 5 is awaiting the match between an inmate and a mentor.</p> <p>An evaluation have been made for the EU and an evaluation from the mentors point of view is about to be made.</p> <p>Back on Track have been presented in two RAN meetings and Norway have been interested in adapting the idea.</p>
Sustainability and transferability	<p>Back on Track is probably adaptable to Prison and Probation Services in most countries as it only requires the ability to build good relations between inmates, staff and mentors.</p> <p>The cost depends on the need for legal framework, level of education and how a country decides to pay the mentors and is difficult to define in advance.</p> <p>The Danish Prison and Probation Service are happy to provide additional information.</p>

Geographical scope	Back on Track is implemented in the Danish Prison and Probation Service
Start of the practice	The project was developed from May 2011 to May 2014 and the first mentor courses were established in October 2012.
Presented and discussed in RAN meeting	RAN Prison and Probation.
Relation to other EC initiatives	None
Organisation	<i>Back on Track is a governmental project set up the Danish Ministry of Social affairs and Integration in collaboration with the Danish Prison and Probation Services. It was largely funded by the European Union from 2011 - 2014, but is now a part of the general initiatives in the Prison Service.</i>
Country of origin	Denmark
Contact details	<p>Direktoratet for Kriminalforsorgen Strandgade 100 1401 København k Denmark</p> <p>Marie Louise Jørgensen marielouise.jorgensen@kriminalforsorgen.dk</p> <p>(+45) 72 55 46 09</p> <p>www.kriminalforsorgen.dk</p>

Name of the practice	3.5.4 Disengagement and Critical Aftercare
Description	<p>For national security-related reasons, PET is paying great attention to individuals returning to Denmark from international war zones like Syria or Iraq. As a part of our broader range of preventive efforts PET coordinates and collaborates with the police and the municipality to re-establish their ties to the Danish society.</p> <p>As part of the Danish Preventive Model for countering radicalisation and violent extremism, PET facilitates, supports and coordinates the activities related to the National Critical Aftercare. Though the practice applies to all individuals on a path toward violent extremism, it has been tailored toward Danish foreign fighters.</p> <p>By training and cooperating with authorities within the Danish crime preventive structures, PET are working closely with the National Police, Social services, Prison and Probation Service and the psychiatric system, supporting a local preventive approach to Foreign Fighters.</p> <p>The aim is to reduce the risk from returning foreign fighters who may have acquired the will and capacity to carry out terror-related offenses in Denmark, including acts of violence, as a consequence of newly adopted networks, abilities to handle weapons and, not least, traumas resulting from their experiences and actions in Syria, Iraq or elsewhere.</p> <p>The particular practice of Disengagement and Critical Aftercare is comprised of two closely coordinated sets of activities that are aimed at pulling foreign fighters away from a path of violent extremism:</p> <ol style="list-style-type: none"> 1. Disengagement-talks initiated by PET or specially trained police officers in the police districts; 2. Capacity building and advising critical aftercare centers at municipal level, including on casework. <p>In order to minimize the threat of attacks committed by violent extremists, the Centre for Prevention initiates disengagement talks and assists the provision of critical aftercare services that are anchored in the national police districts (called Info houses) and supported by the local municipalities.</p>
Approach	Exit strategies Creating CVE infrastructure
Target audience	Violent extremists Formers Youth/pupils/students
Sustainability and transferability	<p>The Danish practice of ‘disengagement and critical aftercare’ rests on a social and crime-preventive structure that in large parts is unique to the Danish society. Institutionally, the practice is incorporated in the national social and law enforcement authorities and therefore highly sustainable.</p> <p>A transferal would probably require that the practice is reengineered and customised to fit the local settings. The practice is in many ways flexible and has been implemented with some variations in the different police districts, but taken as a whole it requires a high degree of cross-sectorial and -institutional cooperation (i.e. between</p>

	<p>the security and intelligence service, national police districts and county-based social and psychiatric service providers). The methods, tools and techniques employed in the practice could be transferred to almost any country or institution dealing with violent extremists. And component parts of the practice are also directly transferrable to similar institutions (e.g. agency-to-agency transferal) in other countries.</p> <p>PET have assisted the transfer and tailoring of large parts of the practice to Kenya in an agency-to-agency partnership with the Kenyan National Counter Terrorism Centre.</p>
Geographical scope	The practice is an integral part of the national Danish preventive structure and thus implemented nation-wide, i.e. in all twelve National Police Districts and centrally in PET's Centre for Prevention.
Start of the practice	<p>The practice has evolved over the last eight years and a fully integrated part of the national Danish preventive structure for about five years.</p> <p>The practice was reengineered in response to the outbreak of violent conflict in Syria and Iraq and tailored trainings to handle returning foreign fighters was initiated in June 2013.</p> <p>The practice targeting radicalisation and violent extremism is an add-on to existing crime preventive structures and practices that constitute the framework of the Danish Model.</p>
Presented and discussed in RAN meeting	The practice was presented (in its early stages) at the RAN INT/EXT Foreign Fighters: Working with Individuals, Families and Communities Before, During and After Travel - 16-17 September 2013 at the Seminar in Antwerp.
Organisation	<p><i>In its role as national security authority, the Danish Security and Intelligence Service (PET) is responsible for identifying, preventing and countering threats to freedom, democracy and safety in the Danish society. This applies to threats in Denmark, as well as threats targeted at Danish nationals and Danish interests abroad.</i></p> <p><i>PET's Centre for Prevention is responsible for preventing threats emanating from radicalisation and violent extremism, including disengagement and critical aftercare services as described in this document.</i></p>
Country of origin	Denmark
Contact details	<p>Politiets Efterretningstjeneste Klausdalsbrovej 1 2860 Søborg Denmark</p> <p>For further information please contact the RAN Secretariat: ran@radaradvies.nl</p> <p>www.pet.dk</p>

Name of the practice	3.5.5 EXIT SCS ONLUS
Description	In facilitating exit and distancing processes EXIT also uses intensive one-on-one settings. Here the facilitators employ empowering, coping and reflecting strategies in order to psychologically strengthen the clients' self-esteem and resilience. Voluntary engagement on the side of the client is a methodological prerequisite while motivational interviewing may take place in the lead-up towards a full exit facilitation. The base principles of this work are characterized by the psychological and psychotherapeutic interaction principles that some Exit facilitators bring with them, as e.g. empathy, trust and work-relationship building. On yet another level, measures are applied to enhance critical thinking. In Exit's work critical thinking methods focus primarily on abusive group issues but may also on occasion encompass issues of prejudice, racism, xenophobia and ethnic/cultural polarization. At the same time counselling and information about high demand groups' issues is provided as well as legal and medical advice. Generally we do avoid discussions and debates that usually lead to the remain of the same opinion.
Approach	Exit strategies
Target audience	Violent extremists Formers Health practitioners
Deliverables	EXIT has produced by now a handbook on bullying and discrimination at work.
Evidence and evaluation	EXIT's activity can be placed among those actions that can facilitate exiting from manipulative environments and it is directed to minimize and prevent that initial states of radicalisation may bring individuals to be more and more involved in coercive and manipulative environments. There is enough evidence that preventive action can reach satisfactory results.
Sustainability and transferability	It is important to organize courses to first-liners to enhance knowledge and expertise on conflict transformation methods.
Geographical scope	FRIULI VENEZIA GIULIA
Start of the practice	Although most of the professionals who have founded EXIT were already working together before, in 2011 they decided to give start to EXIT SCS onlus, as a way to run projects for public institutions. EXIT's work has thus far mainly been active around discrimination and violence in several environments such as: work, religious groups, one-on-one and psychologically abusive group relationships.
Presented and discussed in RAN meeting	EXIT multi-disciplinary group of professionals has been presented to RAN DERAD since the first Stockholm meeting in 2012.
Relation to other EC initiatives	Member of ENoD (European Network of De-radicalisation)
Organisation	<i>Exit s.c.s. onlus is a social enterprise founded in 2011. The cooperative works mainly with public institutions. Among its current professional staff are: a lawyer, a psychotherapist, an educator,</i>

	<p>family mediators, a psychiatrist, an occupational physician, and a coroner.</p> <p><i>Mission</i> The organisation's mission is to design and manage social assistance services on related issues of abuse and harassment (e.g., bullying, domestic violence, etc..) by setting up aid centres and information helpdesks, organizing informational and awareness activities, and offering educational and rehabilitation services (such as self-help groups), empowerment activities, workshops, and evaluation activities for workers with stress-related concerns. The organisation also engages in prevention services, assessment and diagnosis, measurement of well-being and quality of life in various domains (work, school, family).</p> <p><i>Activities and Recipients of Services</i></p> <ul style="list-style-type: none"> - Workers who consider themselves victims of harassment and physical and mental work (bullying) and those individuals and families living in a state of distress as a result of the employment. - Victims of domestic violence and their families. - Those who live in a state of uneasiness in the family due to domestic violence or other forms of conflict. - Victims of cults and pseudo-religious groups and their families. - Victims of bullying and their families. - Children at risk of parental alienation syndrome with the organisation of neutral spaces in order to keep the family bond with both parents and immediate family. - People who are victims of subtle forms of harassment and abuse. <p><i>Main Activity</i> Since its foundation in 2011 the organisation has been managing the aid center for harassed workers Antimobbing of the Province of Udine and the Tolmezzo Information Help-Desk.</p> <p>Since 2012 the organisation has been included in the Working Group of the European Commission "First-line De-radicalisation Practitioners" (RAN DERAD) to counter violent extremism and has participated in several meetings that were held in European cities.</p> <p>Since 2013 is in charge of the professional consultations for the Family Support Center of SOS ABUSI PSICOLOGICI</p>
Country of origin	Italy

Name of the practice	3.5.6 Exit Sweden
Description	<p>Exit was developed in Norway to disengage and de-radicalise people from the right-wing scene. In Sweden it was implemented in 1998 to help young people leave the white power movements. The programme helps people leave a white supremacist movement behind and build a new life.</p> <p>The kind of support provided both consist of practical matters to start a new life as counselling and training or for example social skills. The length of the support differs from individual to individual (mainly between 6 and 9 months, sometimes a few years).</p> <p>Participants who follow the programme should do so voluntary. Radical beliefs and ideology are not central in the approach as Exit views the reason for getting into extremist groups as mainly caused by other reasons (like personal grievance of socio-economic circumstances). It is also thought that too much emphasis on ideology might provoke a defensive attitude.</p> <p>The Exit project team consists of several 'formers' (people who used to be in a white power group themselves) in a combination with professionally trained staff such as therapists. Finally, the programme also has a preventive side to it by cooperating with schools and local governmental authorities to prevent people from joining extremist groups.</p> <p>In 2010 Exit Sweden expanded to Passus, targeting disengagement from criminal gangs, building on the work and experiences of Exit Sweden.</p>
Approach	Exit strategies Community engagement/empowerment
Target audience	Violent extremists Formers First responders or practitioners
Deliverables	<p>In 2012 Exit Sweden produced a theatre play, the Voice of Hate, targeting young people at 14-18 years with the focus on preventing young individuals from joining extremist environments by delivering different perspectives on why people join the white power movement and how an engagement affects the individuals involved in extremism.</p> <p>Exit Sweden has produced two handbooks for first-line practitioners; one for preventing violent extremism, and one for learning about disengagement and interventions with already active extremists.</p>
Evidence and evaluation	Since the start of Exit Sweden in 1998 they have worked with over 700 individuals (direct or indirect). They are evaluated by the Swedish governmental authority for youth affairs in 2010 and have been subject of PhD from the Roskilde University during 2012 and 2014.
Sustainability and transferability	The main objective of Exit Sweden is working with individual support for people wanting to leave violent extremism. The experiences and knowledge of the work is well spread nationally (ex. trough expansion to Passus working with disengagement from criminal gangs) and

	internationally and possible to adapt to other regions and groups since the core of the work is based on the individual perspective of each client.
Geographical scope	Sweden
Start of the practice	Exit Sweden started 1998 after the Norwegian Exit program that started a couple of years earlier.
Presented and discussed in RAN meeting	RAN SC, 2012, Brussels (BE) Several RAN Derad meetings
Relation to other EC initiatives	Member of ENoD (European Network of De-radicalisation) Partner in ISDEP (Improving Security by Democratic Participation)
Organisation	<i>Exit Sweden is a part of the youth centre Fryshuset (a non-governmental organisation). Exit Sweden is funded primarily by governmental grants. There is one project within Exit Sweden that is funded by the European Commissions ISEC.</i>
Country of origin	Sweden
Contact details	Mårtendalsgatan 6 Box 92022 120 06 Stockholm Sweden Robert Örell robert.orell@fryshuset.se Office: (+46) 8 691 72 66 Mobil: (+46) 739 502266 http://exit.fryshuset.se/english/

Name of the practice	3.5.7 Aggredi programme
Description	<p>Aggredi's main goal is to decrease violence or stop it completely at the individual level. The other goal is to develop working methods with outdoor violence offenders.</p> <p>Aggredi's client work is structured and therapeutically oriented. Work is based on social constructionism. Method used in the work is dialogical and reflective discussions.</p> <p>Aggredi works on a neutral base, with individuals in co-operation with authors. Political-, ideological-, or religious backgrounds don't define the clientele in Aggredi. Aggredi offers services for all outdoor violence offenders between 18-39 years.</p> <p>Among the clients are:</p> <ul style="list-style-type: none"> • school-or mass killing planners • gang members, right wing orientated perpetrators • offenders from the spectrum of religious extremism
Approach	Exit strategies Community engagement/empowerment
Target audience	Violent extremists Prison/probation/judicial practitioners Youth/pupils/students
Deliverables	Handbook has been made in Finnish language
Evidence and evaluation	The National Research Institute of Legal Policy has made a research of Aggredi's impact on the target groups' criminality. http://www.helsinki.fi/filearc/71_Aggredi_executive_summary.pdf
Sustainability and transferability	It is possible to transfer Aggredi kind of work to other country and other local contexts, if the practise commits to follow the basic principles of Aggredi. Our costs (in Finland) are €340.000,- per year.
Geographical scope	Finland (Helsinki, Kuopio)
Start of the practice	15.3.2006
Presented and discussed in RAN meeting	RAN Derad, Riga, 16-17.4.2015
Relation to other EC initiatives	Member of ENoD (European Network of De-radicalisation) and part of interim board of ENoD.
Organisation	HelsinkiMissio is a non-governmental organisation for social services founded in 1883. The primary task of HelsinkiMissio is to seek, find and help neglected and forgotten citizens and to challenge everyone to social responsibility and closeness. HelsinkiMissio aims to offer help where it is most needed, and therefore keen to develop existing working

	<p>methods as well as to create new forms of work to meet changing needs in society. Today HelsinkiMissio concentrates on young people, elderly people and people with special needs.</p> <p>Aggredi is financed by RAY (Finland's Slot Machine Association).</p>
Country of origin	Finland
Contact details	<p>Hämeentie 29 00500 Helsinki Finland</p> <p>Petri Salakka, head of team petri.salakka@helsinkimissio.fi</p> <p>(+35) 8414489849</p> <p>www.aggredi.fi</p>

Name of the practice	3.5.8 <i>Exit work located within the social space</i>
Description	<p>Jump on the one hand aims to improve the sensitivity of professionals (especially pedagogic) and otherwise engaged people within the social spaces in contact with individual right-wing extremists and youth sympathising with right-wing extremist ideologies potentially willing to leave the scene. This is done during interactive, practice-orientated workshops for different target groups (e.g. pedagogic professionals, social workers, staff of job centres, students of educational disciplines) as well as individual and group counselling. We call this “education and counselling”. The aimed sensitivity contains the needs and challenges of those irritated right-wing extremists. Linked to this we want to prepare them to “have an eye on” those potential formers, to begin with causing constructive irritation and act as an instance which is forwarding willingly clients to jump. During the exit-process we refer back to these “signal generators” within the social spaces for assistance in special social work issues (e.g. job, drugs, debt).</p> <p>On the other hand jump offers the “exit-assistance” for right-wing extremists and youth sympathising with right-wing extremist ideologies (sympathisers, fellow travellers, activists) willing to leave the scene and the surrounding field. This encompasses: gaining social security (especially in terms of housing, qualification and work) and shaping perspectives for the future; reflecting the experiences (of hate, violence and crimes but also of comradeship and appreciation) inside and outside of the scene, supported by developed methods (e.g. a “scale of self-positioning” and confrontation with and reflection on moral dilemmas based upon a method developed by Lawrence Kohlberg); identifying and handling “trigger-mechanisms” (words, situations, music etc.); developing sustainable courses of action to avoid relapses into mind-sets and acts characteristic to the right-wing extremist scene.</p> <p>Both parts of jump are strongly linked and aim to counter radicalisation (physically and mentally) and to shape a professional local surrounding, able to unfold a preventive influence, in a long-term perspective.</p>
Approach	Exit strategies Community engagement/empowerment
Target audience	Youth/pupils/students Violent extremists First responders or practitioners
Deliverables	<ul style="list-style-type: none"> • comprehensive brochure “TunnelLichtBlicke” • quality standards of the Federal Working Group (BAG) Ausstieg zum Einstieg (“exit for getting started”) • training concepts and modules • article in the handbook “Verantwortlich Handeln: Praxis der Sozialen Arbeit mit rechtsextrem orientierten und gefährdeten Jugendlichen” (“Acting responsibly: Practice of the Social Work with right-wing extremist-orientated and endangered juveniles”)

<p>Evidence and evaluation</p>	<p>As mentioned in the description we developed our own methods to evaluate the progress and effects of the individual exit-processes. One of these methods (“scale of self-positioning”) is a scale to bring together a subjective grading of the current progress within the exit-process and a more intersubjective point of view of the different issues important to the process of de-radicalisation and exit. This scale is used constantly (every two month, if possible) in combination with a guideline-based interview that includes questions about different fragments of right-wing extremist ideology and group-oriented misanthropy.</p> <p>Jump has been evaluated by the BMAS (federal ministry of labour and social affairs) within the federal program “XENOS - Ausstieg zum Einstieg” and has been selected as one out of five good practice examples. Jump also participates in a constant peer review within the frames of the BAG Ausstieg zum Einstieg and the Nordverbund Ausstieg Rechts (the network of exit-work institutions in northern Germany).</p>
<p>Sustainability and transferability</p>	<p>The approach became part of the policy of fighting right-wing extremism of the federal state of Mecklenburg-Vorpommern and is financed through the national programme “Demokratie leben!” until 2019. The approach or parts of it will be used further in the nationwide acting agency CJD responsible for jump.</p> <p>The approach was also discussed in the network of exit-work institutions in northern Germany (www.nordverbund-ausstieg.de). The institutions of this network try to synchronize their exit work, therefore parts of the approach are used in this process and transferred to the other institutions. A first meeting with the state-operated exit work in Germany was also a possibility to discuss the approach in a broader way.</p> <p>The approach was used in the new established exit-work institution “kurswechsel” in Hamburg within an urban setting.</p>
<p>Geographical scope</p>	<p>Within the whole federal state Mecklenburg-Vorpommern in the North-East of Germany</p>
<p>Start of the practice</p>	<p>The practice was developed between 02/2010 and 06/2012. Since then it is continuously enhanced.</p> <p>Since 01/2011 it is implemented in Mecklenburg-Vorpommern, since 10/2014 also in Hamburg (a highly urban context). Since 01/2014 jump is a member of the network of consulting institutions for democracy and tolerance (Beratungsnetzwerk Demokratie und Toleranz www.mv-demokratie.de) of Mecklenburg-Vorpommern and therefore the practice became part of the policy of fighting right-wing extremism in Mecklenburg-Vorpommern.</p>
<p>Presented and discussed in RAN meeting</p>	<p>The practice of jump has been presented during the RAN Derad regional meeting for the Baltics on 16-17 April 2015 in Riga.</p>
<p>Relation to other EC initiatives</p>	<p>None</p>
<p>Organisation</p>	<p><i>Jump is an institution of the Christliches Jugenddorfwerk (CJD) e.V. (NGO). The CJD is a Germany wide agency for child and youth welfare services and educational institutions.</i></p> <p><i>Jump is financed by the German government program “Demokratie</i></p>

	<i>leben!” (Live democracy!) via the federal state of Mecklenburg-Vorpommern.</i>

Name of the practice	3.5.9 <i>A guide to police empowerment conversations</i>
Description	<p>Dialogue is an important tool for both resolving conflicts and creating understanding and trust. When children and young people come into conflict with the law, or are at risk of doing so, it is important to understand the reasons why. It is vital to create an arena in which those involved can talk frankly so an overview of the situation can be gained and the parties can arrive at a common understanding of the problem. Only then can we start working towards changing things in a positive direction.</p> <p>Empowerment conversations have become a good tool for creating such an arena in the encounter between the police and children/young people and their parents (or other legal guardians). The aim of the conversation is to safeguard everyone's interests and arrive at good solutions, especially for the child/young person, but also for the parents. It is recommended as a method when unwanted/criminal behaviour is uncovered that could develop into a criminal career. It is used in the police's prevention work, as a reaction to unwanted behaviour, and as a means of guiding young people onto a path of reconciliation and consideration. This method therefore can be used by signs of radicalisation as well.</p> <p>A good conversation requires the asking of open questions and active listening, which involves confirming and repeating back what you have heard. There must be no leading in the conversation, and clarifications and summaries must be used. Pauses (silences) should also be consciously used to give the child time to think and reflect in the conversation, and come up with the responses himself or herself. It is important to set aside plenty of time for the conversation, it must never seem rushed, and the impression must never be given that a person needs to respond quickly. Even though the conversation is a dialogue, you must say when a limit has been reached, see the enforcement pyramid: Information - guidance - advice - instructions - warning. You must not be biased in the conversation, but try to stick to the topic and avoid the focus shifting. If the child/young person repeatedly tries to shift the focus, you should deal with this head on and clarify why the child is not sticking to the topic. Listening is an important part of the conversation. It is important to demonstrate that you are hearing what is being said by listening actively, which involves things such as nodding and saying small words such as 'yes', 'okay', etc. At the same time, the child must have an opportunity to take his or her time finding his or her own words to express what they want to say. Often it is precisely these children/young people who are not used to being listened to, and who also do not find it easy to express their thoughts and feelings in words.</p>
Approach	Exit strategies Family support
Target audience	Families Youth/pupils/students
Deliverables	Handbook and training modules at The Police University College.

Evidence and evaluation	The program is not evaluated on national or local level
Sustainability and transferability	The handbook is available in English
Geographical scope	All 27 police districts in Norway
Start of the practice	Developed in 2000 - 2004. Implemented in 2004 - 2010. The practice is still active.
Presented and discussed in RAN meeting	RAN POL meeting Madrid 11-12 March 2015
Organisation	<i>National Police Directorate, Norway. It is financed by the National Police Directorate.</i>
Country of origin	Norway
Contact details	<p>National Police Directorate Postboks 8051 Dep. 0031 Oslo Norway</p> <p>Erling Børstad erling.borstad@politiet.no</p> <p>(+47) 99 20 77 55</p> <p>www.politi.no</p>

Name of the practice	3.5.10 Restoring Relation Project (RRP): Addressing Hate Crime through Restorative Justice
Description	RRP was a three year multi-agency partnership project operating within and across deprived urban areas of Southwark and Lambeth in London. RRP worked with white right wing extremists and individuals and groups involved in perpetrating low level racial harassment. By working across project partners, including police, housing, education, the project worked by bringing together both victims and perpetrators to repair harm, seek reparation and build community relations.
Approach	Exit strategies Community engagement/empowerment
Target audience	Violent extremists Formers Victims of terrorism
Deliverables	Training was delivered on Race hate crime, restorative justice and multi-agency partnership training to 45 London based organisations (I need to check for a training module).
Evidence and evaluation	Data was collected from victims on the number of repeat episodes of victimisation. Narrative accounts were also collected from those who had perpetrated incidents of harm and those harmed. One report on international evidence based and a report on practices and applicability.
Sustainability and transferability	<p>The practice was not transferred by ROTA to other parts of the UK or to other countries to our knowledge. Similar practices have existed elsewhere for other forms of hate crime.</p> <p>Where organisations operate at a community level and are embedded within that community there is a foundation for aspects of the project to be transferable.</p> <p>In case of a range of organisations that provide other elements of support there is great potential for further components of the model to be transferred (particularly identification and monitoring through housing associations).</p> <p>Aspects of the model have operated in the London borough of Newham on a largely voluntary basis pointing towards a high degree of sustainability. Notwithstanding, for consistency the post of a professional with mediation/conflict resolution skills or that of a coordinator if the aforementioned skills lie elsewhere is necessary.</p>
Geographical scope	London Boroughs of Southwark and Lambeth
Start of the practice	Sept 2006 - June 2009
Presented and discussed in RAN meeting	It has not been presented but examples have been used at various meetings to inform pertinent discussions.

Relation to other EC initiatives	None
Organisation	<p><i>Race on the Agenda (ROTA) is a social action and research organisation which operates to address racial inequality working in London.</i></p> <p><i>ROTA is a charity and company limited by guarantee. Historically funded by a mixture of funders including a regional London pot, trust funders and central government. We are presently funded as part of an online hate crime project by the EU.</i></p>
Country of origin	United Kingdom

Name of the practice	3.5.11 EXIT-Germany
Description	<p>EXIT-Germany is an initiative assisting individuals, who want to leave the extreme right-wing movement and start a new life. Being the first to start such an endeavour in Germany, EXIT-Germany constitutes one of the most experienced and successful programs in de-radicalisation and exit-assistance in the world. EXIT-Germany has been continuously working to help individuals from all backgrounds, but mainly from highly radicalized milieus (group leaders, terrorists, party leaders) to leave the movement and to develop methods and programs in the field.</p> <p>EXIT-Germany helps individuals who want to leave the right-wing radical milieu to develop new perspectives outside the right-wing environment. We arrange contacts, provide practical aid and answer questions regarding personal safety, social problems and individual reappraisal.</p> <p>The essential core of EXIT-Germany's philosophy is that the critical reassessment of the person's past and the dismantling of the radical ideology are absolutely necessary to leave a radical milieu. EXIT-Germany does not actively search for dropouts; the initiative to leave the scene comes from individuals themselves. Anyone can contact us via phone, e-mail, text message and/or letters. An 'exit' is considered completed by us when a critical reflection, reassessment as well as successful challenge of the old ideology have taken place. Thus, 'exit' to us means more than simply leaving a party or group. It also goes beyond changing the aesthetics of expression or refraining from violence. An exit is successful when the fundamental ideologies and purposes of the previous actions have been resolved.</p> <p>EXIT-Germany also counsels families affected by right-wing extremism and analyses critical situations. We create new scenarios to make opportunities available and counter helplessness and anxieties. Likewise we help to disentangle family members from the scene. We establish contacts to former right-wing extremists and accompany the process to motivate right-wing adolescents in avoiding or leaving the movement. We counsel teachers, policemen, institutions, individuals and anyone who is in need of advice.</p> <p>We also counsel institutions, communities, governments and individuals in setting up de-radicalisation and disengagement programs and strategies. We've worked - nationally and internationally - with smaller municipalities like the county Dahme-Spreewald as well as large cities such as Dortmund. The counselling ranges from individual assessments to formulation and execution of strategies and projects.</p>
Approach	Exit strategies Community engagement/empowerment
Target audience	Violent extremists Families Youth/pupils/students
Deliverables	EXIT-Germany relies on innovative communication strategies to reach its target group, and constantly designs new campaigns, such as the Trojan T-Shirt: http://www.youtube.com/watch?v=CSlbsHKEP-8 or the 'Nazis against Nazis' walkathon: https://www.youtube.com/watch?v=KvjIYL_Nlao or Ausstieg - (K)ein Weg zurück:

	<p>https://www.youtube.com/playlist?list=PLOBxa1it0uQ1BFvROLA3eWKmDVenWI03m</p> <p>Next to numerous flyers, booklets, videos, and academic articles we also are involved in expert hearings, policy recommendations and educational work. For more information, please visit www.exit-deutschland.de.</p>
Evidence and evaluation	<p>Since the year 2000 over 550 individual cases have been successfully counselled with a recidivism rate of approx. 3%. Moreover, EXIT is being regularly evaluated e.g.:</p> <ul style="list-style-type: none"> - 2004-2005 Evaluation by Prof. Dr. Birgit Rommelsbacher (Bundesprogramm VARIABEL) in Rommelsbacher, Birgit: ‚Der Hass hat uns geeint - Junge Rechtsextreme und ihr Ausstieg aus der Szene‘, Campus, Frankfurt 2005. - 2007-2010 Evaluation of EXIT-family support „VIELFALT TUT GUT. Jugend für Vielfalt, Toleranz und Demokratie“ and „Kompetent. für Demokratie – Beratungsnetzwerke gegen Rechtsextremismus“ - 2011-2013 Evaluation durch die (GIB) Gesellschaft für Innovationsforschung und Beratung mbH Wissenschaftliches Institut Evaluation des „XENOS-Sonderprogramms Ausstieg zum Einstieg“ (Im Auftrag des Bundesministeriums für Arbeit und Soziales (BMAS)) - 2012 Antwort der Bundesregierung auf Anfrage der Fraktion Die Linke - 2013 Review of Programs to Counter Narratives of Violent Extremism http://www.strategicdialogue.org/ISD_Kanishka_Report.pdf - 2013 Mrs Cecilia Malmström http://europa.eu/rapid/press-release_SPEECH-13-65_en.htm. <p>For more information on evaluation and feedback, please visit www.exit-deutschland.de</p>
Sustainability and transferability	Practice is sustainable and can be transferred to other local and national contexts.
Geographical scope	Germany
Start of the practice	EXIT-Germany was founded in 2000 by the former criminologist and former police detective Dr Bernd Wagner and the former neo-Nazi leader Ingo Hasselbach as a part of the Society Democratic Culture (ZDK gGmbH) in Berlin. EXIT-Germany can reach back to experiences of working with highly radicalized right-wing extremists since the early 1990s.
Presented and discussed in RAN meeting	EXIT Germany has been presented in several RAN meetings including RAN INT/EXT and RAN @.
Organisation	<p><i>Society Democratic Culture (ZDK Gesellschaft Demokratische Kultur gGmbH)</i></p> <p><i>The ZDK Society Democratic Culture is an independent non-profit association that champions the fundamental values of freedom and dignity throughout Germany. Our initiatives serve to prevent and raise awareness of violence and extremism. We challenge terrorist and radical ideological movements like right-wing extremism and Islamism. We also help persons leave extremist groups and networks. For this purpose, we are sponsors of the EXIT-Germany and HAYAT-Germany initiatives. Moreover, we offer trainings and educational services and, with our Institute for the Study of Radical Movements (ISR), we are</i></p>

	<i>hosting a nationally and internationally oriented research institute as well as the world's first peer reviewed open access journal on de-radicalisation Journal Exit Deutschland (JEX).</i>

Name of the practice	3.5.12 Advice Centre Hesse
Description	<p>Since its opening the main focus of the Advice Centre Hesse is to intervene in the radicalisation processes. Targeted de-radicalisation activities are aimed at people who tend to travel to war zones, return to Germany as “foreign fighters” and/or are searching for an escape from extremist ideologies.</p> <p>Beside this actual focus the Advice Centre Hesse is geared towards adolescents, parents and experts who have questions in the area of extremism. The centre provides prevention, intervention and de-radicalisation measures as a response to general helplessness when dealing with religious extremism. The Advice Centre promotes increased (religious) tolerance of different world views, and early detection, prevention and reversal of radicalisation processes.</p> <p>One of the key aspects of the Hessian approach is to provide adolescents with information and knowledge enhancement on interfaith and intercultural connections at an early stage and on dealing with interfaith conflicts. Interfaith communication allows for a basic understanding that does not reject fundamental principles such as democracy, non-violence, human rights and tolerance. Rather, it includes these values in their own religion as well. At the same time, this understanding also prevents extremism and the trend to radicalism.</p> <p>In order to reach a broad spectrum within the target group, prevention as well as intervention measures are used, and in particularly entrenched cases, de-radicalisation measures and disengagement assistance are provided.</p> <p>Objectives of the Advice Centre Hesse :</p> <ul style="list-style-type: none"> • Preventing and reversing radicalisation processes and violent behaviour • Preventing departure (e.g. to Syria or Iraq) • Integrating returnees (e.g. from Syria or Iraq) • Promoting interfaith/intercultural responsibility • Activating and professionalising institutions and multipliers <p>Range of services</p> <p><i>Prevention:</i></p> <ul style="list-style-type: none"> • Student workshops in schools on interfaith and intercultural responsibility • Advice for parents, mosque congregations and other interested parties within the framework of preventive work • Civic education for promoting tolerance and democratic capability <p><i>Qualification:</i></p> <ul style="list-style-type: none"> • Information, awareness-raising and educational events for early detection and strengthening the coping skills of persons who are in contact with vulnerable young people <p><i>Intervention/de-radicalisation/disengagement assistance:</i></p> <ul style="list-style-type: none"> • Advice for relatives when dealing with religious extremism • Advice, support and special training for adolescents at risk of becoming radicalized prior to delinquency

	<ul style="list-style-type: none"> • De-radicalisation training (Anti-Gewalt- und Kompetenz-Training - AKT®) in juvenile detention centres • Disengagement assistance: advice and dialogue-promoting measures with Violent extremists, foreign fighters and returnees (e.g. from Syria)
Approach	Exit strategies Community engagement/empowerment
Target audience	Violent extremists Formers Youth/pupils/students
Evidence and evaluation	Since the practice started only in July 2014 results of the evaluation are not yet available. The evaluation of the practice is on the way. Apart from that constant quality management is realised in the programme, such as feedback from the target group, trainer's reports and peer review from the beginning.
Sustainability and transferability	The Advice Centre Hesse is the result of a transfer process of the last ten years. Violence Prevention Network's methods, practices and approaches are culminating here in one project, which is the first in Germany that has gathered them all together. Negotiations with other federal states may culminate in the opening of more Advice Centres in those federal states.
Geographical scope	Hesse (DE)
Start of the practice	The Advice Centre Hesse was established in 2014 in cooperation with the Ministry of the Interior of Hesse.
Presented and discussed in RAN meeting	RAN Plenary and High Level Conference, 16-17 June 2014, Brussels (BE)
Relation to other EC initiatives	Initiator and founder member of ENoD (European Network of De-radicalisation). Member of Advisory Board of Impact Europe.
Organisation	<i>The NGO Violence Prevention Network is a group of experienced specialists with many years of experience in the fields of prevention of extremism and de-radicalisation. Various federal ministries, state-level justice departments, state-level and national security agencies and institutional partners have worked closely with the association from its inception and value the group's high degree of knowledge, competency and outstanding reputation. The main focus of Violence Prevention Network is to work directly with radicalized people at different stages of radicalisation. The aim is to support them in developing distance to inhuman ideologies and violent behaviour. The organisation's projects have been or are financed by institutional, regional, federal funds, the ESF or the European Commission.</i>
Country of origin	Germany
Contact details	Alt-Moabit 73 D - 10555, Berlin Germany

	<p>Judy Korn, CEO judy.korn@violence-prevention-network.de</p> <p>(+49) 30 91 70 54 64</p> <p>www.violence-prevention-network.de</p>
--	--

Name of the practice	3.5.13 Taking Responsibility
Description	<p>The intention of Taking Responsibility - Breaking away from Hate and Violence is, to enable young people who are arrested for ideologically motivated acts of violence (right-wing extremists or radical Islamists) to live a responsible and non-violent life and to develop distance to inhuman ideologies. The goals, the trainers try to reach together with the trainees are:</p> <ul style="list-style-type: none"> • Developing relationship skills, empathy, self-esteem, ability to reflect on oneself • Taking responsibility and developing distance to inhuman hate ideologies • to better understand and correct their violent behaviour • to accept each individual's fundamental right to liberty and freedom from bodily harm • to learn how to resolve conflict non-violently • to take responsibility for their actions • to play an active role in planning their future <p>The approach consists of de-radicalisation training, civic education, long-term group training and post release stabilisation coaching. Important during the training are the separation of offence and offender and the questioning of ideology, strategies of justification and offence. Trainers and trainees are supposed to have a reliable relationship based on confidence and respect. The participation takes place on a voluntary basis.</p>
Approach	Exit strategies Educating young people
Target audience	Violent extremists Formers Prison/probation/judicial practitioners
Deliverables	Curriculum of the de-radicalisation training working with right-wing or radical Islamist groups.
Evidence and evaluation	<p>The practice has been externally evaluated in 2012. The re-incarceration rate for a violent ideologically motivated offence is 13.3% within the participants of the programme compared to 41.5% within inmates who didn't participate. Hence the re-incarceration rate is 68% lower within the programme participants. Apart from that constant quality management is realised in the programme, such as feedback from the target group, trainer's reports and peer review from the beginning</p> <p>The practice gets variegated feedback including requests from the different countries for presentations in order to possibly implement the practice in the respective countries.</p>
Sustainability and transferability	As to the methodological transferability, initially the practice was used in the context of right-wing radicalisation and could be transferred to the context of Islamist radicalisation. As to the territorial transferability: The transferability of the practice has been proved by transferring the practice to various federal states within Germany and to Northern Ireland and the target group of people

	<p>radicalised in a concrete ethnic-religious conflict.</p> <p>The government of the Federal Republic of Germany as well as the governments of the federal states are constantly exerted to perpetuate the programme related to the practice. The cost of the practice is approx. €8.500,- per participant.</p>
Geographical scope	<p>Germany: Baden-Württemberg, Bavaria, Berlin, Brandenburg, Bremen, Hamburg, Hesse, Mecklenburg-Western Pomerania, Lower Saxony, North Rhine-Westphalia, Saxony, Saxony-Anhalt, and Thuringia.</p> <p>United Kingdom: Northern Ireland</p>
Start of the practice	Pilot projects implementing the practice started in 2001 in Brandenburg, Germany
Presented and discussed in RAN meeting	RAN P&P, 12 December 2013, Berlin
Relation to other EC initiatives	<p>Initiator and founder member of ENoD (European Network of De-radicalisation).</p> <p>Member of Advisory Board of Impact Europe.</p>
Organisation	<p><i>The NGO Violence Prevention Network is a group of experienced specialists with many years of experience in the fields of prevention of extremism and de-radicalisation. 4 Community engagement and empowerment

4.1 General description

Although governments and public authorities must do all they can, the prevention of extremism and radicalisation is most effectively addressed by communities. Extremism is able to thrive when communities themselves do not challenge those who seek to radicalise others. In some communities, particularly minority communities, there is a profound lack of trust and confidence in the government, police and public authorities. This can make it harder for them to achieve success. It is therefore important to invest in community engagement and community empowerment. Community engagement should be in place routinely and not just implemented after a problem arises.

Communities can play an essential role in preventing radicalisation and providing support to affected community members. Communities can also be a wealth of knowledge when it comes to people at risk of radicalisation. This approach can take different forms, such as community policing, but can also include empowering key people within the community to stand up against violent extremism.

Engaging with communities in many cases will also go hand in hand with family engagement. Therefore the community's chapter closely mirrors that of engaging with families and the two should be read in tandem.

4.2 Aims

- Supporting communities where one or more individuals have become radicalised towards violent extremism and criminality
- Raising consciousness of the threat of violent extremism and avenues for help
- Building trust and cooperation between community members and local government including police, schools and social services, amongst others.
- Providing information for communities to address ideologies which terrorists use to recruit people to their cause.
- Build resilience against violent extremism.

4.3 Methods

Community engagement can be undertaken in a range of forms. The type(s) of engagement undertaken will depend on the community itself and should always be tailored to the specific context. Some examples can include:

- Promoting leadership of community members and young people within specific communities through training of leadership skills, mentoring and role models
- Organising dialogue, discussion forums and democratic platforms
- Training key religious figures to engage with youths not just on faith-related matters, but also social and intergenerational matters (faith, social, intergenerational)
- Training to identify vulnerable individuals
- Improving relations between institutions and communities, such as the police (community policing), local authorities etc.

- Sharing information via ‘information hubs’ with the objective to have a coordinated and supported approach aimed at preventing radicalisation.

4.4 Lessons Learned

4.4.1 Outreach and First Steps: Defining Strategy and Actors Involved

There needs to be a consensus (at the local level at the minimum) on what the goals are and what strategic approach should be taken when engaging with communities. Potential goals for community engagement include:

- Alternative narratives: Encouraging communities to play a role in challenging extremist narratives and messages and providing positive alternatives or counter-narratives. Communities can provide moral and religious counter-narratives and are often more effective and credible in delivering them than governments and statutory organisations due to their being delivered by influential and respected peers.
 - Community support: Communities (and more specifically key figures within the community) may be able to identify individuals or groups at risk and could help provide support systems for neighbourhoods, families or parents (e.g. parenting skills). Also in the aftermath of an incident, these communities should be protected and supported to avoid discriminatory attacks.
 - Security and prevention: Communities can also provide information that could help the authorities to e.g. prevent individuals from travelling to dangerous areas of conflict overseas.
 - De-radicalisation and/or disengagement: By providing specialist expertise, a positive alternative, being a role model/mentor and by providing practical help and emotional support to the individuals concerned and their family members.
- It should also be clear which actors should be involved and why. A coordinated multi-agency approach is crucial. There is no limit to the amount of actors involved however there should be a case manager or a recognisable point of contact with communities, which could be, for instance, a local police officer or social worker. Those engaging need to work on all levels simultaneously (with the radicalised individual as well as with the community) and have an overview of (as much as possible) all that is going on.
 - Community engagement can be undertaken by, for example, NGO’s, municipalities or practitioners from other statutory bodies (e.g. community police officers, mental health workers or child protection workers where applicable).
 - In a multi-agency approach there can be a close coordination with security/intelligence actors which will have particular limits in light of public safety and security. Equally, it is important for the service providers and NGO’s involved to stay within privacy limits and protect trustful relationships within the community. Being aware of each actor’s responsibilities and interests and taking these into account when designing interventions is important to be effective.
 - When engaging with communities transparency is essential for trust-building. Service providers should be open about their level of contact with police and security services and also about the goals and intentions of engagement.

4.4.2 First Contact

- A common sense of urgency often provides an effective starting point for community engagement and empowerment. Most projects have been set up after a major incident which heavily impacted society. However, ideally, community engagement should be an ongoing activity.

- As mentioned above, for successful community engagement and empowerment, trust is pivotal. Trust enables better communication and an appetite for openness and sharing of ideas and resources.
- The key point of contact should be trustworthy but also empathetic. It is crucial that the key point of contact is able to put themselves in community members' shoes. They should not be judgemental and should be able to offer sympathetic yet practical guidance.
- Be realistic about what can be achieved through community engagement and be prepared to deal with the unexpected.

4.4.3 Defining Content and Substance with Communities

- The language used when framing services or engagement should be selected carefully. Service providers should be careful to remain neutral and try (where possible) to lean toward positive language. Importantly, language used should be clear and to the point but drawing a fine line of empathy and understanding.
- Equally important is to remember that if community workers and community organisations are to play their role, they need the right skills and confidence including the appropriate language. Some examples of careful, positive language include:
 - Using 'signalling concerns' rather than 'spotting radicals or violent extremists';
 - Speaking of 'care-based interventions' as distinct from 'counter-terrorism';
 - Moving away from the idea of the state promoting 'moderate' versions of religious and ideological beliefs; and a need to enhance understanding of what works.
- While some individuals are naturally well-placed to do this work, there are skills and knowledge that can be taught or enhanced through training.
 - Building trust can be done by different people (statutory bodies, NGO's, families) and is context-specific. Trust should be created on both an interpersonal and an institutional level.
 - It will be important not only to address the issue of radicalisation, but specific worries, anxieties and fears of communities such as political issues, discrimination and polarisation.
 - It can be helpful for the person running a project to be able to relate to the potential clients to put them at ease so they open up and get involved. This might mean being of a similar age, race or ethnic origin, being the same sex, coming from the same area, or having had similar life experiences. It is also important, especially in work with young people, to have 'street credibility', which brings respect encouraging young people to remain involved and hear sensitive messages in the right way.

4.4.4 Winding Down Engagement

- Sustainability is key in both sustaining trust and engagement. Often projects are short-term ones, due to limited funding, decrease of the (immediate) sense of urgency, political agenda, etc. As a result, with each new incident, new projects and relationships have to be set up from scratch, creating a lack of faith in authorities. A long-term agenda, in which projects have a form of continuity and where relationships are continuously fostered, is preferable.
- Effective organisation of community engagement processes is essential to its success. Be realistic about the time and resources required to achieve effective community engagement. Provide resources that will assist those attempting to engage members of the community.

4.5 Practices

The following practices are further discussed:

- Aarhus Municipality and The East Jutland Police - Aarhus Model
- Derbyshire Healthcare Foundation NHS Trust
- Dutch National Police - Allies
- Ealing Council - Muslimah matters
- Estonian Police and Border Guard Board - Web constables
- Foresee Research Group - Foresee
- Intercultural and Diversity Office - Ethnic Liaison Officers, Ireland
- NIACRO
- Omagh Support & Self Help Group (OSSHG)
- RUBIKON Center - Monitoring Hate Crime against Roma with mentors
- The Glenree Centre for Peace and Reconciliation - Transformative Dialogue Circles
- The Tim Parry Jonathan Ball Foundation for Peace - Rethinking Radicalisation (Community Dialogue)
- UK NCTP HQ - Act now
- UK NCTP HQ - Conviction
- UK NCTP HQ - Delta
- UK NCTP HQ - Nicole

Name of the practice	4.5.1 <i>Aarhus model: Prevention of Radicalisation and Discrimination in Aarhus</i>
Description	<p>Intervention consist of two areas of intervention:</p> <p>General population:</p> <ol style="list-style-type: none"> 1. Raising awareness to professionals and the public. Achieved via presentations and workshops for professionals and teaching institutions 2. Collaboration with local communities. Respectful and assertive dialogue with mosques, cultural societies and other major players in local communities <p>Individuals:</p> <ol style="list-style-type: none"> 1. First-line staff of the Task Force performs risk evaluation of individuals and groups 2. Advising professional staff on how to deal with cases concerning radicalisation 3. Advising individuals and next of kin in cases concerning radicalisation 4. Mentoring for persons, who are at risk of radicalisation or are involved with violent extremism 5. Contingency for foreign fighters and their families
Approach	Community engagement/empowerment Family support
Target audience	First responders or practitioners Local Community Organisations/NGOs Youth/pupils/students
Deliverables	<p>Concepts:</p> <p>Workshop for raising awareness in schools and educational institutions - concept program</p> <p>Life Psychology: Method for mentoring people who are either at risk for or radicalised - Book on Life Psychology and training programs by Professor Preben Bertelsen, University of Aarhus</p>
Evidence and evaluation	<p>“The Aarhus-model” has been reviewed by the Ministry of Social Affairs and deemed an exemplary practice.</p> <p>Has received positive feedback from the RAN-group meetings.</p> <p>Evidence collected via assessment forms in the mentoring program shows promising preliminary results as a method for individual intervention.</p>
Sustainability and transferability	<p>‘Prevention of Radicalisation and Discrimination in Aarhus’ has been in continuing practice since 2010. The costs in total locally (Aarhus municipality and East Jutland Police combined) is estimated at €800.000,- a year.</p> <p>The practice is directly transferrable to countries with a highly developed and well-functioning infrastructure. The main challenge here will be establishing the multi-agency cooperation the practice requires. The practice is more difficult to transfer as structured to countries with a less developed infrastructure and little tradition for multi-agency cooperation, or where there is little basis for corporation between law-</p>

	enforcement and NGOs (NGOs will in these countries supply what social services supply in countries with a highly developed social service infrastructure). Individual methodological elements in the practice will be immediately transferrable, though, for instance Workshops, Life Psychology and Family network Groups.
Geographical scope	East Jutland Police District, mainly Aarhus Municipality. Copenhagen is in the process of adopting the practice, and it is recommended in the Danish Governments plan for preventing radicalisation and violent extremism that other cities follow the practice of “The Aarhus Model”
Start of the practice	Preventing radicalisation was developed as a project from 2007 to 2009, and was incorporated as a standard practice in the crime prevention corporation between The East Jutland Police and Aarhus Municipality from January 2010.
Presented and discussed in RAN meeting	The practice has been presented and discussed several times in the group meetings of RAN-POL and RAN-DERAD.
Relation to other EC initiatives	None
Organisation	<i>A multi-agency intervention in collaboration between Aarhus Municipality and The East Jutland Police. External partners are University of Aarhus, Ministry of Social Affairs and The Danish Intelligence and Security Service. As such it is a local practice in Aarhus Municipality and the East Jutland Police District, but tax-funded and therefore governmental. It is not funded by the European Commission.</i>
Country of origin	Denmark

Name of the practice	4.5.2 <i>Derbyshire Healthcare Foundation NHS Trust</i>
Description	<p>The organisation is Mental health provider and offers intervention for people presenting with associated mental health problems. The service offers specialist intervention for people presenting via the Channel group based within Derbyshire. Both psychological intervention and trauma management form part of the provision, via the Psychological services across a spectrum of practitioners</p> <p>The lead acts as an advisor to both national and regional groups both under the Prevent and Pursue agenda, with specific advice on mental health and vulnerability.</p>
Approach	Community engagement/empowerment Exit strategies
Target audience	Health practitioners Authorities Formers
Deliverables	Clinical outcome measures including evidence of studies regarding direct intervention. Established post registration Education programme at University of Derby. National workshops and conferences in England
Evidence and evaluation	<p>Programmes subject to validation by Research centre in Derbyshire and University of Derby.</p> <p>Clinical intervention reported and reviewed under Quality Assurance programme and reports to the Mental Health Commissioners for Derbyshire</p>
Sustainability and transferability	Evidence previously presented in transferability of learning and intervention in the 'prevent space' and the required intervention of vulnerable people.
Geographical scope	Derbyshire and East Midlands
Start of the practice	2013
Presented and discussed in RAN meeting	Work of service as part of channel initiative in 2013 at RAN clinical advisory group meeting -Vienna
Relation to other EC initiatives	IMPACT
Organisation	<p><i>The organisation is Mental health provider and offers intervention for people presenting with associated mental health problems. Name of the practice	4.5.3 Allies
Description	In response to social unrest related to riots in France, the Danish cartoons and the release of the Geert Wilders film <i>Fitna</i> , the Dutch National Police build up a network of Allies in the cities of Utrecht and Almere. This network of Allies consists of police officials and key figures from the communities. One of the essential reasons to build up this network was the need for the police to cooperate more pro-actively instead of reactively after an incident. The Allies work together on the local community level, the district level and the city's main chief of police. On all levels there is a representation of police officials and key figures from the communities to obtain a strong, sustainable group. To maintain this pro-active cooperation, the Allies congregate five times a year, regardless of incidents.
Approach	Community engagement/empowerment
Target audience	Law enforcement officers Local Community Organisations/NGOs
Deliverables	An action plan on how to implement a network of Allies in the police organisation is developed.
Evidence and evaluation	<p>The practice has been evaluated internally among the Allies. Trust and commitment are keywords. The Allies are very satisfied with the cooperation and the main conclusion is that it can only work out when the Allies can be completely open to each other. The police and the key figures from the communities strengthen each other by sharing information and taking these signals serious and, when necessary, act on them.</p> <p>In the year 2014, a study by Zdenko Ćosić from the Vrije Universiteit (VU) in Amsterdam has been published about informal networks of the police regarding to meetings. This study evaluated the working and the success factors of the informal network.</p>
Sustainability and transferability	The structure of Allies can be set up in every country or city and does not comprehend any costs.
Geographical scope	The practice is currently mainly implemented in the cities of Utrecht and Almere (NL). By the end of 2015, the aim is that the practice is implemented in the police unit of the region <i>Midden-Nederland</i> (Central Netherlands), which involves the provinces Utrecht and Flevoland).
Start of the practice	In the beginning of 2011, the practice was developed and by the end of 2011 the first meeting with Allies from different communities took place.
Presented and discussed in RAN meeting	RAN INT/Ext, 16-17 September 2013, Antwerp (BE)
Relation to other EC initiatives	None
Organisation	<i>Dutch National Police</i>

Country of origin	The Netherlands
Contact details	<p>Kroonstraat 25 Postbus 8300 3503 RH Utrecht The Netherlands</p> <p>Rachid Habchi, regional expert Rachid.Habchi@politie.nl</p> <p>Johan van Renswoude, chief of police district Utrecht Johan.van.renswoude@politie.nl</p> <p>(+31) (0)6 53 11 80 93</p>

Name of the practice	4.5.4 Muslimah Matters
Description	<p>A series of facilitated workshops based upon the priorities set by the audience, focussing on the ‘factors for vulnerability’ as developed by Cole. ‘Identifying Vulnerable People’ guidance Dr Jon Cole. Liverpool University, 2007.</p> <p>The purpose of the workshops is to increase knowledge levels around the issues of vulnerability, foster a positive notion of personal identity, promote community involvement and good citizenship and establish self sustaining women networks.</p> <p>The principles of the model involve the identification of a ‘matriarch’ figure that promotes involvement and encourages the creation of women networks.</p> <p>A methodology to engage women’s groups connected with Faith Institutions utilising the subjects that involve the ‘factors for vulnerability’ for people that may be attracted to extremism and violent radicalisation.</p> <p>The target audience is women networked through their connection with Mosques and other faith institutions that may have informal roles in the institution or wider community</p>
Approach	Community engagement/empowerment
Target audience	Local Community Organisations/NGOs
Deliverables	A facilitation guide is currently being developed but principles can be used in most scenarios involving women as a focus group.
Evidence and evaluation	Simple ‘before and after’ evaluations have been completed which show that participants knowledge levels are increased, their confidence to take part in community based activity is increased and their willingness to volunteer in the community is increased
Sustainability and transferability	The concept is transferable in any language and is low cost
Geographical scope	United Kingdom
Start of the practice	2011 onwards
Presented and discussed in RAN meeting	Discussed in a number of RAN Prevent working groups. RAN Prevent - INT/EXT, Antwerp September 2013
Relation to other EC initiatives	EPAREX (Ealing Partnership Against Radicalisation and Extremism), EC-funded project
Organisation	<i>Ealing Council, London Borough of Ealing- utilised during EC funded EPAREX project 2011-14 and supported by UK Home Office</i>
Country of origin	United Kingdom
Contact details	Community Safety Unit Ealing Council, Perceval House

--	---

Name of the practice	4.5.5 Web constables
Description	<p>Web constables are police officers who work in the social media. We are in different social media networks (Facebook, VK.com, different Estonian forums) with our name and pictures. We participate in the discussions and are available for everyone to ask questions, send hints, complaints about other people or the police. We are welcomed in different groups where people are discussing about the local issues. We try to solve cyberbullying cases where they took place (it includes gaming sites or forums where we are not active but where we can go just to for taking care of the misunderstandings between the children) - sometimes they are easier to solve through the social media.</p> <p>Our main target is also dealing with minors, possible school shooters. So we do the background check based on the police database and the social media information and we pass it on to the local level (local police department) where they try to collect information about the things what can not be found from the social media (domestic violence, school issues, possibility to get a gun). Last step is making a plan how to help this child.</p> <p>Also, connected to the adolescence of our radicals (which we have but not that much, mainly skinheads), we have had positive feedback from them. They are also using our help in solving their real life problems (because it is so much better when you do not have to go to the department). This also means that they help us: they have given us information about wannabe skinheads (under 18years old children who are abusing alcohol and behaving badly in the city and saying to everyone that they are skinheads) and even about badly behaving drivers.</p>
Approach	Community engagement/empowerment Educating young people
Target audience	Youth/pupils/students General public Online
Deliverables	We have frequently asked questions in our police website. We also have active Facebook pages where people can follow us and read the latest news about scams in Estonia or warnings about viruses or police notes. We have some Internet safety lectures in Estonian language up in the Internet and we give input to our safer Internet web page. And we can always share the PowerPoint about our work.
Evidence and evaluation	<p>We measure the number of the letters that we get and also the number on real cases (e.g. someone reports domestic violence case and we forward it to the right department). It is rising every year. 2014 the number of the letters sent by the citizens was 5882.</p> <p>Every year we give 100+ lessons to students, parents to make people even more aware of us and this means that the number will continue to grow.</p> <p>We also have questionnaires how the public is satisfied with the police and it includes the work in social media. It has been over 80% of trust over the last years.</p>

	<p>A year ago there was a questionnaire for children awareness about the Internet and the police and bullying. Children knew us better than the official police Lion Mascot Leo (what is mainly meant for children). 63% of children knew who the web-constables are and where they can find us.</p>
Sustainability and transferability	<p>Web-constables are getting more and more letters every year. Also the work area is getting wider (more social media networks, more people, who are spending their time over there).</p> <p>It doesn't need any extra money, because the working police officers get their police salary and mainly need a computer, smartphone and Internet connection.</p> <p>It also works in bigger countries. In Finland they have 3 full time web-constables and 20+ part time web-constables (they divide the time between social media and patrolling).</p> <p>Facebook Law Enforcement group is also supporting our work a lot. They are introducing our method in other counties which has a positive impact for us. Letting them know about abusive users or cyberbullying usually gets quick solutions. Also we get the latest updates about the network possibilities. In quick and serious cases this is an important fact.</p> <p>It works better if the trust in the police is high.</p> <p>The more people know us, the more we can help them. Being visible (giving lessons about Internet safety or commenting the topics on media) is vital.</p>
Geographical scope	It is done in Estonia and also in Finland and Albania
Start of the practice	In June 2011 the first web constable started, in June 2012 the second web constable joined and in April 2013 there were three web constables.
Presented and discussed in RAN meeting	RAN POL, 2013, Riga RAN Derad regional meeting, 16-17 April 2015, Riga
Relation to other EC initiatives	EUCPN (European Crime Prevention Network)
Organisation	<i>Estonian Police and Border Guard Board</i> <i>The web-constables are financed by the police (they are part of the police)</i>
Country of origin	Estonia

Name of the practice	4.5.6 FORESEE
Description	<p>Foresee Research Group uses restorative principles and approaches (dialogue processes and encounters) to prevent escalation of conflict. They work on the prevention level at schools, working with teachers and parents training them on open non-violent communication.</p> <p>Furthermore, Foresee has restorative projects in prison, to work on “in cell” and “staff-inmate” conflicts. They empower prisoners, talk about what conflict is, how to express themselves and teach them how to deal with anger.</p> <p>With regard to the method, Foresee applies a range of techniques flexibly, such as mediation, conferencing, peace-making circles, family group conferencing, facilitated discussions and one-to-one restorative dialogues.</p> <p>The main projects of Foresee include:</p> <ul style="list-style-type: none"> • Mediation and Restorative Justice in Prison (2009-2012). • Peace-making Circles in Europe (2011-2013). • REDICT - Resolving Disputes in Twenty-first Century (2011-2013). • ALTERNATIVE - Developing alternative understandings of security and justice through restorative justice approaches in intercultural settings within democratic societies (2012-2016). <p>Foresee’s multi-agency team of researchers and facilitators work with disadvantaged groups, local communities, schools, NGOs, as well as practitioners and policy makers in areas of criminal justice (victims, offenders, probation, prison), social welfare and education. A particularly promising aspect of Foresee’s approach is its being safely anchored in the well-established restorative justice methodology and that it adapts and further develops them into the prevention work against hate crime and extremism.</p> <p>Foresee has recently finished its pilot project on mediation and restorative justice in prison, working with inmates, families, victims, as well as staff and generally explores new methodologies that are suitable to issues of hate crime, extremism, and for de-radicalisation interventions.</p> <p>Foresee is conducting different action research projects - within which conflict resolution practices (incl. trainings) based on the restorative justice approach are also provided - in community level conflicts (in villages, smaller localities), in schools and juvenile homes as well as in the criminal justice and prison context.</p> <p>Throughout these projects - amongst other types of conflicts - Foresee faces the issues of stereotypes, prejudices, aggressive attitude, non-understanding, anti-tolerance etc. that are, on the one hand, roots of aggressive behaviour motivated by violent and hateful ideas/thoughts. However, they are also symptoms of other, underlying social problems that also need to be addressed.</p>
Approach	Community engagement/empowerment
Target audience	Youth/pupils/students Prison/probation/judicial practitioners

	Educators/academics
Deliverables	<p>Each completed project results in dissemination. For some of the deliverables in various fields please see below.</p> <p>Foresee has produced several videos concerning the method of different dialogue approaches in schools, in local communities, and within the judicial system. Each of our videos is subtitled in English.</p> <p>Our videos can be seen here: http://www.foresee.hu/en/films/</p> <p>Mediation and Restorative Justice in Prison Barabás, T. - Fellegi, B. - Windt, Sz. (eds) (2012), Responsibility-taking, Relationship-building and Restoration in Prisons, Budapest: OKRI. ISBN 978-963-89468-1-2. 330 p.</p> <p>Peace-making Circles in Europe Fellegi, B., Szegő, D. (2013). Handbook for Facilitating Peace-making Circles, Budapest: Foresee Research Group. Available: http://www.foresee.hu/uploads/tx_abdownloads/files/peacemaking_circle_handbook.pdf</p> <p>Positive Climate Project: Preventing aggression and building positive social climate in schools Available: http://klima.foresee.hu/</p>
Evidence and evaluation	<p>Each of the Foresee projects are thoroughly (self-) evaluated and followed up by qualitative research. Each of its activities (trainings, workshops, conferences, etc.) is closed by evaluations (by questionnaires).</p> <p>The results of these evaluations are included in the publications in our English publications at www.foresee.hu/en/publications/</p>
Sustainability and transferability	<p>Sustainability and adaptability are key principles of our approaches. As a result, we have managed to implement restorative practices in highly different and challenging contexts and could successfully take part in international best practice exchanges.</p> <p>Our projects are always built on local human resources and competencies. Through their empowerment we aim at planning a successful implementation process in a participatory way together with the involved target groups.</p>
Geographical scope	Hungary
Start of the practice	Foresee Research Group was founded in May 2008. The restorative principles, methods and practices as modern alternative conflict resolution and community building techniques have a history of more decades.
Presented and discussed in RAN meeting	Several RAN DERAD meetings RAN Plenary and High Level Conference, January 2012, Brussels
Relation to other EC initiatives	Member of ENoD (European Network of De-radicalisation) since 2013
Organisation	<i>Foresee Research Group is a non-governmental organisation that deals with consultancy, prevention, intervention and network building in the</i>

	<p><i>field of constructive conflict solution, restorative justice and prevention of social polarisation and exclusion. Within this context, Foresee has begun to tackle the phenomena of social hatred and extremism, as expressed by acting and speaking against minorities as well as the homeless, elderly, disabled or otherwise marginalised people.</i></p> <p><i>Currently Foresee does not receive any governmental support from the Hungarian government. Currently funds are primarily from the European Union and Foresee generate income from providing mediation and training services for statutory and private organisations both nationally and internationally.</i></p>
Country of origin	Hungary
Contact details	<p>H-1092 Budapest Bakáts tér 3 Hungary</p> <p>Dr Borbála Fellegi, executive director borbala.fellegi@foresee.hu</p> <p>(+36) (70) 365 0630</p> <p>http://www.foresee.hu/en</p>

Name of the practice	4.5.7 Ethnic Liaison Officers
Description	<p>The aim of the Garda Racial, Intercultural and Diversity Office (GRIDO), and its team of Garda Ethnic Liaison Officers, is to liaise with ethnic minority communities and reassure them of the police services available to them without discrimination.</p> <p>These police officers liaise with the Muslim community in general and at their places of worship (Mosques and Prayer Houses) throughout the state. The central function of GRIDO and Garda Ethnic Liaison Officers is to build trust and confidence with individuals within the Muslim community, and to be attuned to the heightened vulnerabilities pertaining to this community especially at times of terrorist threats and attack worldwide.</p> <p>The effects of negative media reporting in respect of Muslims can encourage prejudice and stereotyping of this community. To this end, Police (Garda) Liaison Officers through their knowledge and excellent relations with the Muslim community can act to dispel negative media commentary that leads to prejudice and stereotyping of the ‘whole’ community. In such instances Police Liaison Officers also act as an aid to the police organisation to ensure that instances of negative profiling by the police is prevented during times of heightened alert and nervousness.</p> <p>The Garda Ethnic Liaison Officer endeavours to learn about this community through self-development from constant communication and contact. Police liaison officers may eventually become privy to information that assists in preventing individuals from becoming radicalised. Garda Ethnic Liaison Officers also are available to any member of the community who wishes to report in confidence any matter that could endanger the Muslim community in general. GRIDO and Garda Ethnic Liaison Officers provide presentations to the Muslim community on security and safe use of the Internet.</p>
Approach	Community engagement/empowerment Delivering alternative narratives
Target audience	Law enforcement officers Local Community Organisations/NGOs General public
Deliverables	The Garda Racial, Intercultural and Diversity Office during 2005 published two handbooks: ‘Your Police Service in Intercultural Ireland ‘ ‘Intercultural Ireland - Your Changing Community’. These booklets are available on the Garda Website: www.garda.ie
Evidence and evaluation	The Garda’s work with minority communities has been evaluated through research conducted by the Garda Research Unit in 2013. This research is entitled: ‘Diversity Climate Survey - An Garda Síochána’
Sustainability and transferability	The aforementioned initiative is easily transferable to any jurisdiction - Europe or otherwise. The cost of the practice is minimal. In Ireland the Garda Ethnic Liaison Officers are actual Garda Community Police Officers. Their Ethnic Liaison role is conducted on a part-time basis at no extra cost

	to the organisation.
Geographical scope	The Garda Ethnic Liaison Officer initiative has been implemented on a national basis. There are approximately 200 such officers appointed nationwide. Their work is overseen by the Garda Racial, Intercultural and Diversity Office which is also responsible for their training and development on appointment to their role.
Start of the practice	The practice was developed and implemented in April 2002.
Presented and discussed in RAN meeting	The practice was presented and discussed at the RANPOL meeting held in Rome in 2013.
Organisation	<i>An Garda Síochána - Ireland's National Police Force; Garda Racial, Intercultural and Diversity Office.</i>
Country of origin	Ireland

Name of the practice	4.5.8 NIACRO
Description	<p>NIACRO's practice is located at the Hate Crime end of the spectrum of radicalisation and violent extremism, and can be evidenced in three projects. These are detailed below but essentially could be described as diversionary, community capacity building, engaging with perpetrators and utilising the experiences and insights of proxy and actual victims. The practice across these three projects is based on casework, group work as well as community development. The practice has a strong connection to overcoming legislative, structural and attitudinal by engaging a wide range of social actors.</p> <p>As stated previously NIACRO has developed practice across three areas dealing with prejudice and hostility. Northern Ireland is still emerging from a period of intense and prolonged conflict which is still continuing in alternative but still physically violent manifestations. NIACRO has continually made the point that the radicalisation discourse does not sit comfortably in the Northern Ireland context. It is still a society that experiences significant amounts of violence based on prejudice and hostility on a daily basis. NIACRO deals with these issues on many levels as described above but the language of exit strategies such as de-radicalisation and disengagement are not used in Northern Ireland.</p> <ol style="list-style-type: none"> 1) Base 2 and STEM. These two projects are interlinked and deal with individuals and families who are under threat because of their race. The approach can be described as emergency intervention, development of host communities with respect to their capacity to host people from different ethnic backgrounds. The STEM element seeks to improve the social inclusion of people from ethnic minority backgrounds, removing barriers to integration and encouraging participation in society. 2) Challenge Hate Crime - the approach of this project is holistic and follows the logic of open - process intervention work as opposed to cognitive behavioural training. It is based on voluntary participation, informed intervention, engages in individual casework, narrative methods and involves victims of hate crime either directly or by proxy through restorative processes if appropriate. <p>As stated above Northern Ireland does not use the language of countering radicalisation as directly and explicitly. However, NIACRO does deal directly with the causes of having armed paramilitary groupings and has a history of working with these groupings, their political wings and governments in terms of dealing with the NI conflict and its outworking.</p>
Approach	Community engagement/empowerment Family support
Target audience	Victims of terrorism Prison/probation/judicial practitioners Families
Deliverables	See Challenge Hate Crime 12 reports on NIACRO's websites www.niacro.co.uk . Accompanying DVDs are available on request. These contain handbooks, training manuals, analyses at local and European level. Specific staff is prepared to share the work of the

	three projects referenced above.
Evidence and evaluation	Evidence and evaluation contained in the above.
Sustainability and transferability	NIACRO operates within a European context and has developed many partners over a wide variety of activities. It operates a policy of continuous development based on information exchange from other programmes and other jurisdictions. As such, NIACRO has developed practice that is fundamentally universalist in its analysis and transferability. This means that there are key principles that may be extracted from NIACRO's practice that may be applied in other jurisdictions.
Geographical scope	Northern Ireland (UK)
Start of the practice	<ol style="list-style-type: none"> 1. Base 2 - working with people under threat from paramilitary organisations (1990 - present). 2. Challenge Hate Crime (2008 - 2012). Working with perpetrators of Hate Crime. It is planned to make a fresh bid for continuation and development of this programme under Peace IV - EU funding stream particular to Northern Ireland. 3. STEM Project - working with people at risk of race intimidation from their homes (2014 - present).
Presented and discussed in RAN meeting	The Challenge Hate Crime project made several presentations at RAN Derad meetings.
Relation to other EC initiatives	Member of ENoD (European Network of De-radicalisation)
Organisation	<i>NIACRO is an NGO - limited company and charity. (Charity Reg No: NI 18121 Charity Number: XN 48280). It operates primarily within the justice system and provides services to people in prison, people with criminal records, families of prisoners, children of prisoners as well as children at risk of coming into contact with the criminal justice system. NIACRO also provides a wide range of policy comment with respect to matters that impact on its client group. It also engages significantly with the media and bases its interventions on evidence accrued primarily through its services. Hate crime features significantly in the Northern Ireland context - primarily sectarianism but also racism, homophobia, disability, faith and transgender. The practice referenced above has and is resourced by funding from domestic, European and private sources e.g. Peace III, Northern Ireland Housing Executive and foundations/trusts. The total turnover for NIACRO is approximately £4m.(c. 5m Euro)</i>
Country of origin	United Kingdom - Northern Ireland
Contact details	<p>4 Amelia Street Belfast Northern Ireland BT2 7GS United Kingdom</p> <p>Pat Conway - Director of Services (+44) (2890) 320157</p> <p>www.niacro.co.uk</p>

Name of the practice	4.5.9 Omagh Support & Self Help Group
Description	<p>The group's overall aim is:</p> <ul style="list-style-type: none"> • to improve the wellbeing/quality of life for victims of terrorism, • to support the re-integration into the community of victims of terrorism. • to raise awareness of the effect of radicalisation • to prevent terrorism and radicalisation • to raise awareness of the needs and experiences of victims and survivors <p>The organisation regularly conducts educational seminars to students and peace researchers on the impacts of terrorism and affects on victims and survivors or radical activity worldwide. We contribute to policy and practices within the Northern Ireland Commission of Victims and survivors and we engage with the British and Irish government at the highest level on victims issues including policy and legislation. We have published a guide for victims and have been involved in many storytelling projects to raise awareness of the impacts of radicalisation. We held a victim's conference in Omagh in 2012 titled 'Lessons Learnt'. The conference brought together professionals in first line support services to share their experiences and pass on the lessons they have learnt. We have participated in many projects to highlight the impacts of terrorism over the years with a view of changing perspectives. We are in the process of developing an anti radical schools package to engage with young people and deter them from the destruction of violence.</p>
Approach	Community engagement/empowerment Educating young people
Target audience	Youth/pupils/students Victims of terrorism
Deliverables	Over the 16 years we have produced many booklets, training aids, and educational seminars on victim's issues and we recently participated in the project Victim's counter-terrorism gathering: The voice of the survivors against radicalisation.
Evidence and evaluation	We also routinely evaluate our local services and have found that overall our programmes brings people together of different religiously and cultural background in a safe environment. Over 80% of participants/members have reported that it has reduced levels of anxiety and fear and over 60% have agreed that built confidence. We measure our performance on the results we produce such as placing Real IRA on the foreign terrorist which we campaigned for a number of years and removing IRA merchandising off Amazons website. We were successful in a judgement against 4 named individuals who we believed perpetrated the Omagh bomb. It was the first action of its kind anywhere in the world where the victims of terrorism took the perpetrators to court. We currently have been successful in our preliminary stage of judicially reviewing the secretary of state's decision not to grant a public inquiry into the Omagh bomb. We commissioned a piece of research into the circumstances of the Omagh bomb which we collaborated on that has acquired substantial interest and has advanced truth and justice

	issues into the Omagh bomb.
Sustainability and transferability	Currently the Group is core funded by the Victims and Survivors Service of Northern Ireland. Although for some projects we do obtain funding from other sources such as the local council, Peace III, Big Lottery, Lloyds TSB and other locally available funding sources. OSSHG actively fundraises for itself and hosts at least two large fundraising events during the year which includes a craft fair, fashion show and pub quiz. In addition to these events, OSSHG holds around six street collections a year and one to three bag packing fundraisers. We also have a charity shop which generally supports the members in volunteering and excluding social isolation and generates much needed funds for the Group. We have also be fortunate to have be bequeathed funds from deceased members of the community and generally statically look ahead to secure funding beyond the completion of projects.
Geographical scope	We practice in Northern Ireland however we offer services throughout the Island of Ireland and maintain close relations with victims throughout Europe, Middle east, Australia and USA.
Start of the practice	The support Group was established in the aftermath of the 1998 Omagh bomb in September of 1998.
Presented and discussed in RAN meeting	RAN Working Group voice of victims of terrorism (VVT) 'Victims and Media', Berlin November 25th-26th 2014
Relation to other EC initiatives	We have worked with a number of EC initiatives over the years such as NAVT Network Association of Victims of Terrorism, (AVE) Against Violent Extremism, IFAVT, as well as various victims support organisations directly delivering services throughout Europe.
Organisation	<p><i>Omagh Support & Self Help Group (OSSHG) was founded in the aftermath of the Omagh Bomb in August 1998 to act as a source of support and solace for those adversely affected. Widely acknowledged as the worst single act of terrorism in the last 30 years, on Saturday 15th August 1998 at 3.10pm a car bomb exploded in Omagh, County Tyrone, killing 29 people plus two unborn children, and physically injuring over 200 others. The victims group has expanded to incorporate victims and survivors of terrorism from other atrocities and incidents throughout the world.</i></p> <p><i>"Our mission is to promote, advocate for, and address the needs of victims of terrorism. In this respect, we are expressly committed to addressing the practical needs of those impacted by terrorist activity."</i></p> <p><i>The group's current objectives are:</i></p> <ul style="list-style-type: none"> • <i>Relief of poverty, sickness, disability of victims;</i> • <i>Advancement of education and protection;</i> • <i>Raising awareness of needs and experiences of victims</i> • <i>Raising awareness of the effects of terrorism;</i> • <i>Welfare rights advice and information;</i> • <i>To support truth and Justice for victims of terrorism;</i> • <i>Improving conditions of life for victims.</i>

Name of the practice	4.5.10 <i>Monitoring Hate Crime against Roma with mentors</i>
Description	<p>Monitoring and support based on the ability of Roma mentors to approach the Roma victims of hate motivated incidents, to gain their trust and efficiently link them with relevant professionals, who provide expert services (legal, support, psychological support etc.) in order to prevent reciprocal radicalisation and reciprocal hate crime as a reaction to the attack.</p> <p>Monitoring of hate crime incidents against members of Roma minority, using the web of Roma mentors and Roma City Police Assistants, trained laymen from the same community. Monitoring itself is connected with (or even conditioned by) providing of Roma Mentoring, the program focused on increasing the efficiency of alternative sentences among offenders from Roma minority and making them more resilient against committing hate crime acts of retribution/retaliation.</p> <p>Roma mentors contact reporting persons (victims of hate motivated incidents). Due to their ethnic and cultural closeness to the clients and detailed knowledge of Roma community, they have high ability to approach the clients and gain their confidence.</p> <p>Roma mentors report the cases to coordinator who (with eventual help of legal experts) classify the type of the case. Part of the regional coordinator´s work is the field work with mentors, meeting the victims and/or witnesses.</p> <p>Depending on the type of the case they are linked to partner organisation (In IUSTITIA) who provides legal support to victims of hate crimes. If the reporting person doesn´t require legal support or if the incident is not qualified as hate crime, regional coordinator provides basic support of victims and/or reporting persons, and possibly links them to other organisations providing support services or counselling. Eventually, regional coordinator also communicates with other members of local community in order to prevent situations leading to hate-motivated incidents.</p> <p>The mentors can offer accompanying the victims after the agreement with In IUSTITIA (e.g. to accompany victim to meet In IUSTITIA counsellor or state institutions).</p>
Approach	Community engagement/empowerment Exit strategies
Target audience	Victims of terrorism First responders or practitioners Local Community Organisation/NGOs
Deliverables	Handbook for hate crime monitoring and victim support in the context of Roma mentoring http://www.rubikoncentrum.cz/download/prirucka%20pro%20mentory.pdf Study on the transferability to other regions of the Czech Republic http://www.rubikoncentrum.cz/download/studie%20transferability_fin.pdf Both documents are in Czech.
Evidence and evaluation	During the project, 31 Roma mentors including 5 City Police Roma assistants were trained in monitoring of hate motivated incidents.

	<p>They reported there were 74 hate-motivated incidents reported by Roma mentors in Ústí region: 23 violent attacks (with different intensity) 36 cases of hate speech, verbal assaults 15 cases of discrimination</p> <p>Results contributed to increasing the awareness of hate crime issue in Ústí Region. In particular cases, mentors in cooperation with regional coordinator and/or IN IUSTITIA and other cooperating organisation helped the victims of hate motivated incidents to deal with their difficult situation. Roma mentors and City Police assistants gain knowledge hate crime topic and its legal frame and they will be able to use this knowledge during their work in the field in the future. Due to tight cooperation with Probation and Mediation Service, City Police and other governmental institutions and due to meetings of multi-teams for victims, the project helped to increase awareness about hate crime among representatives of state institutions.</p> <p>Support and counselling were very appreciated by the victims of the hate motivated incidents, in most of the cases they did not want any legal or other assistance, but they really appreciated the opportunity to talk to someone about what happened to them.</p> <p>Activities of Roma mentors help to reduce tension in the Roma community and in the local society and to prevent hate motivated incidents. Regarding to this is very promising linking of hate crime monitoring with activities of Roma City Police assistants, who can efficiently prevent escalation of such hate motivated incidents (as it happened i. g. in excluded locality Boletice in Děčín).</p>
Sustainability and transferability	<p>Although RUBIKON Centrum was not able to secure follow-on financing for hate crime monitoring from other governmental or non-governmental resources, we are continuing in providing Roma Mentoring service. The concept of training of Roma mentors to monitor hate motivate incidents in the community can be transferred to other regions or communities.</p>
Geographical scope	<p>Czech Republic, Ústí Region, Cities: Děčín, Chomutov, Most, Rumburk, Varnsdorf, Mikulášovice, Jiříkov, Krásná Lípa, Šluknov, and Křečany.</p>
Start of the practice	<p>1 February 2011 through 1 November 2013</p>
Presented and discussed in RAN meeting	<p>RAN Derad 3-5 June 2012, Stockholm RAN Derad 9-11 October 2012, Barcelona</p>
Relation to other EC initiatives	<p>We were in contact with ENoD (European Network of De-radicalisation)</p>
Organisation	<p><i>RUBIKON Center is a non-profit NGO from the Czech Republic, established in 1994. We have more than 20 years experience in the field of crime prevention and effective dealing with the consequences of crime. Our activities are aimed at the reintegration of people with criminal past back into society and reducing their recidivism. We cooperate with the state institutions (such as Probation and Mediation Service and Prison Service of the Czech Republic) and provide our services in the prisons and after release.</i></p> <p><i>Services we provide:</i></p> <ul style="list-style-type: none"> • <i>Programs to Increase Employment: Job Counselling; Reintegration Mentoring; Motivation Programs; Requalification Courses; Recruitment Agency RUBIKON</i>

	<ul style="list-style-type: none"> • <i>Programs to Solve Debts: Debt Counselling; Trainings for Financial Literacy and Debt Resolution</i> • <i>Programs to Increase the Effectiveness of Alternative Sentences: Roma Mentoring; Probation Programs for Juveniles</i> <p><i>Target groups:</i></p> <ul style="list-style-type: none"> • <i>People with the criminal past and after release from prison.</i> • <i>Roma from socially excluded localities</i> • <i>Juvenile offenders.</i> <p><i>Our projects are mostly supported by EU funds (European Social Fund). We also receive financial support from the state budget and municipalities.</i></p>

Name of the practice	4.5.11 Rethinking Radicalisation (Community Dialogue)
Description	A tailored programme of activities, providing safe, neutral spaces for local authorities and the communities they serve to enter into dialogue and to 'rethink radicalisation'. This approach features: blended seminars and community workshops with expert input; single identity activities with youth; facilitated Q&As with officials; and other activities. The programme is delivered in local communities. The Community Dialogue method raises awareness of radicalisation while providing safe neutral spaces for constructive airing of grievances, with a view to depolarising and localising the solutions to controversial local issues that drive radicalisation and national agendas designed to prevent it.
Approach	Community engagement/empowerment
Target audience	Authorities Local Community Organisations/NGOs General public
Deliverables	Trained 'community champions' are one of the outcomes that can arise from these programmes.
Evidence and evaluation	Local authorities commission this approach for the purpose of receiving an audit report from the Foundation as a neutral third party who facilitate the dialogue and input from stakeholders. The report contains substantial qualitative evidence in semi-structured small group responses to set questions on radicalisation and efforts to prevent it, and/or local issues that triggered the request for intervention. Participants also submit individual unstructured qualitative feedback for synthesis.
Sustainability and transferability	Cost is highly variable based on precise tailoring and property rental costs for local community delivery. €25.000,- / €40.000,- for 6 to 12m+.
Geographical scope	Cities Manchester and Liverpool (UK)
Start of the practice	April 2014
Presented and discussed in RAN meeting	RAN Prevent, February 2014, Prague.
Relation to other EC initiatives	None
Organisation	<i>The Tim Parry Johnathan Ball Foundation for Peace is a UK-registered charity and limited company. The approach is commissioned by local authorities.</i>
Country of origin	United Kingdom

--	---

Name of the practice	4.5.12 Transformative Dialogue Circles
Description	<p>Through facilitated dialogue circles people from different backgrounds (such as former members of paramilitary organisations or young people at risk of involvement in political violence) are given a space to tell their stories. They come in with no trust in each other but are encouraged through the practice and safety of the space to place trust in the process.</p> <p>The dialogue process encourages them to critically reflect on their own personal and community journeys through a deep listening experience. What are the reasons for their engagements and what has been the impact on their lives and others who have been affected?</p> <p>Other members of the community who may not have been involved sometimes participate and ask questions and the role of the facilitator is to create a safe space for dialogue, to question and challenge assumptions about the legitimacy of violence and allow the dialogue to move at a reasonable pace or pause if there is a need.</p> <p>There is a restorative emphasis and the circles are intended to build relationships rather than reach agreement. By stressing the human experience and moving beyond the hurts of the past the goal is to provide the possibility of personal and community transformation. It is not about everyone being ‘at with each other’ but creating new understandings and possibilities to go forward and move beyond the legacy of conflict. Difficult conversations are needed for this but are only one element in broader societal changes.</p> <p>This process helps to prevent young people engaging with extreme groups who use violence and also allows former combatants to define a better sense of integration and usefulness within communities. This can also offer some hope for victims/survivors to regain their ability to be active participants in shaping communities.</p> <p>Above we tried to give an overview here but it is also important to say that in reality it is much more complex and there are many variants on this process to meet the needs of specific groupings and communities. The process requires great care, preparation and skilled facilitation.</p>
Approach	Community engagement/empowerment
Target audience	Formers Local Community Organisations/NGOs Youth/pupils/students
Deliverables	The process has been documented in many different ways through the different programme strands that have used it. Glenree has recently produced a publication called ‘Deepening Reconciliation’ which describes some of the applications of this process and other ways we work and reflections on what we have learnt while doing this work.
Evidence and evaluation	Glenree dialogue and capacity building projects & programmes are evaluated through the funder’s mechanisms and these remain confidential as they include participants’ names and information. Change is hard to measure but there are impacts at personal,

	<p>relational, structural and cultural levels. However we also use informal feedback in the circles which ask people to talk about qualitative changes in their lives and communities and these provide a rich resource for our own reflections on the work. Here are some examples of participant comments:</p> <p>‘I am listening to words that used to hurt and insult me years ago. I now understand that people are speaking truthfully and I am trying to understand’.</p> <p>‘Through the dialogue we learnt to see the humanity in one another’.</p> <p>‘I know myself for the first time’.</p> <p>‘This makes us change the way we see each other’.</p>
Sustainability and transferability	<p>We do not believe that the practice of transformative dialogue circles is culturally bound, though it may be useful to introduce local or cultural dimensions if they are appropriate. These practices are not original to Glencree or Ireland and are used in many different parts of the world tracing their origins back to indigenous conflict resolution circles. We have worked with this process in many countries and cultures outside the Irish context. Preparation, care and key skills are needed whatever the context might be and we do not advise using this process without these essential elements.</p> <p>The sustainability of the process depends on developing networks of practitioners and participants who seek to extend the circle through ‘critical yeast’ or webs and the idea that building more peaceful, resilient communities is an ongoing process not a quick fix. We need to keep working to prevent violence and create ways to process hurts and resentments that have built up and may lead to radicalisation and engagement in extreme groups & movements.</p>
Geographical scope	<p>Republic of Ireland & Northern Ireland (UK). We have also worked in Israel/Palestine, Haiti, Afghanistan and other countries impacted by deep division and political violence</p>
Start of the practice	<p>This practice has developed mostly over the past twenty years in different places and different types of groups. It is a process that can support reconciliation in transitional societies like Northern Ireland post Good Friday Agreement 1998. It has evolved in terms of methodology, continues to evolve and can be applied in different ways to meet the needs of specific groups who have a role in shaping the process and the agenda</p>
Presented and discussed in RAN meeting	<p>Initially attended RAN meeting in Brussels Jan 2013 as part of DERAD group and subsequently meetings in Dublin, and Warsaw(2014)</p>
Relation to other EC initiatives	<p>Informally related to ENoD (European Network of De-radicalisation) and also a member of EPLO (European Peacebuilding Liaison Office)</p>
Organisation	<p><i>The Glencree Centre for Peace and Reconciliation is an Irish NGO founded in 1974 working in practical peacebuilding and reconciliation in Ireland, north and south, and also internationally. Glencree does not have de-radicalisation as its primary mission but our projects include elements of this approach in relation to people who have been involved in or affected by political violence. The organisation works in an inclusive manner with skilled facilitation bringing together people from diverse backgrounds where political conflict has been a reality.</i></p> <p><i>Glencree works in cooperation with schools, community, women’s</i></p>

	<i>organisations, political groups, students, ex-prisoners/former combatants and youth organisations within the island of Ireland (North and South) and between Britain and Ireland. Funding comes from different sources such as Irish Government, EU and other peacebuilding donors.</i>
Country of origin	Ireland
Contact details	<p>The Glenree Centre for Peace and Reconciliation Glenree Co Wicklow Ireland</p> <p>Eamon Rafter, Learning Co-ordinator eamon.rafter@glenree.ie</p> <p>(+353) (1) 2829711</p> <p>www.glenree.ie</p>

Name of the practice	4.5.13 ACT NOW
Description	This is a table-top exercise centred on a hypothetical counter terrorism scenario which stimulates debate around the sensitive subject of terrorism. Decisions taken by the participants will shape the way the incident is investigated. ACT NOW gives an insight into how agencies and communities can work together to defeat terrorism. There are a number of versions of ACT NOW that include a scenario that is based on an extreme right wing incident and one which focuses on a scenario that is based on a college campus.
Approach	Community engagement/empowerment Training for first line practitioners
Target audience	Local Community Organisations/NGOs First responders or practitioners Law enforcement officers
Deliverables	Training modules, DVD and linked workbooks Delivery and cost Free, excluding venue and provisions. Training is also provided at no cost. Delivered by ACPO Prevent Delivery Unit with support from local Prevent leads
Evidence and evaluation	Each delivery is quality assured by trained facilitators in Prevent. Each Act Now event is evaluated by regional Prevent teams.
Sustainability and transferability	ACT NOW is an accessible product for police and education partners to use to facilitate a discussion of Prevent issues with people from different communities, faiths and cultures. It places under the spotlight the procedures and thought processes involved in arriving
Geographical scope	Across England Wales and Scotland
Start of the practice	Since 2008 developed by Lancashire Constabulary and managed nationally by ACPO(TAM)/NCTPHQ
Presented and discussed in RAN meeting	Nominated through a number of RAN Pol meetings but especially at the RAN Pol Study visit in London in December 2013.
Relation to other EC initiatives	None
Organisation	<i>UK National Counter Terrorism Policing HQ (NCTPHQ) (Formerly ACPO(TAM))</i> <i>NCTPHQ is the strategic coordinating and liaison body of the UK police response to Prevent across all 43 police forces.</i> <i>Financing: Neither this organisation or activity is funded by the EU Commission.</i>
Country of origin	United Kingdom

--	---

Name of the practice	4.5.14 DELTA
Description	Delta is a community multi-media exercise developed by Somali community groups for the Somali community in the United Kingdom. Delta follows Saeed, a young Somali boy who grows up in a Western society and is faced with the dilemmas of a diaspora society trying to come to terms with integration and inclusion, whilst retaining their cultural values. The exercise allows members of the Somalia diaspora to discuss the issues faced by Saeed and come up with practical solutions that can support other young people to build personal resilience against extremist ideology. The exercise also highlights the positive contribution already made by the Somali community in the UK.
Approach	Community engagement/empowerment Delivering alternative narratives
Target audience	Local Community Organisations/NGOs General public Youth/pupils/students
Deliverables	Training modules, DVD and linked workbooks. Delivery and cost Free, excluding venue and provisions. Delta is best delivered by community representatives or agency leads with support from community representatives. Training on the delivery of this product is required and provided at no extra cost. It is strongly recommended that delivery should be undertaken by facilitators who have an in-depth understanding of the UK Somalia diaspora.
Evidence and evaluation	Each delivery is quality assured by trained facilitators in Prevent. Each Delta event is evaluated by regional Prevent teams.
Sustainability and transferability	Benefits Whilst this initiative responds to key issues around Prevent for Somali communities it is designed to reflect wider issues around identity, cultural support and criminality. It has been developed in a narrative style designed to appeal to persons from a Somali background and there is a version which has been narrated in Somali.
Geographical scope	Across England Wales
Start of the practice	Since 2012 developed by ACPO(TAM)/NCTPHQ in partnership with UK Somali communities.
Presented and discussed in RAN meeting	Nominated through a number of RAN POL meetings but especially at the RAN Pol Study visit in London in December 2013.
Relation to other EC initiatives	None
Organisation	<i>UK National Counter Terrorism Policing HQ (NCTPHQ) (Formerly ACPO(TAM))</i> <i>NCTPHQ is the strategic coordinating and liaison body of the UK police response to Prevent across all 43 police force.</i>

	<i>Financing: Delta is financed by the National Counter-Terrorism Policing HQ using central government CT funding.</i>
Country of origin	United Kingdom
Contact details	NCTPHQ Prevent, 8th Floor 10 Victoria Street London, SW1H 0NN United Kingdom prevent.acpotam@met.pnn.police.uk

Name of the practice	4.5.15 NICOLE
Description	This is a DVD table-top exercise which aims to break down barriers between the police and Muslim communities by providing an understanding of how police counter terrorism operations work. The decision making process is assisted by a number of national experts in the field of counter terrorism investigations, and from critical partners including Senior Investigating Officers (SIOs) from counter terrorism units.
Approach	Community engagement/empowerment
Target audience	Local Community Organisations/NGOs General public Law enforcement officers
Deliverables	Free, excluding venue and provisions. Training is also provided at no cost. All facilitators have to receive training. The exercise can be delivered by police.
Evidence and evaluation	Each delivery is quality assured by trained facilitators in Prevent. Each NICOLE event is evaluated by regional Prevent teams
Sustainability and transferability	To engage community groups in thought and debate about extremism in a policing context and to dispel some of the myths that exist in respect of counter terrorism operations. Police officers are also able to see the impact that such operations have on diverse communities.
Geographical scope	Across England Wales
Start of the practice	Since 2009 developed by ACPO(TAM)/NCTPHQ
Presented and discussed in RAN meeting	Nominated through a number of RAN POL meetings but especially at the RAN Pol Study visit in London in December 2013.
Relation to other EC initiatives	None
Organisation	<i>UK National Counter Terrorism Policing HQ (NCTPHQ) (Formerly ACPO(TAM))</i> <i>NCTPHQ is the strategic coordinating and liaison body of the UK police response to Prevent across all 43 police force.</i> <i>Financing: Financed by the National Counter-Terrorism Policing HQ using central government CT funding.</i>
Country of origin	United Kingdom
Contact details	NCTPHQ Prevent, 8th Floor 10 Victoria Street London, SW1H 0NN United Kingdom prevent.acpotam@met.pnn.police.uk

Name of the practice	4.5.16 Conviction
Description	This is a 30 minute thought provoking DVD produced by the UK Southwest Counter Terrorism Unit. Conviction is designed for first line staff from partnership agencies and gives an overview of a real life case study based on the convicted terrorist Andrew (Isa) Ibrahim. Using a real life case study the exercise allows partners to understand the vulnerabilities Ibrahim presented before being arrested.
Approach	Community engagement/empowerment Educating young people
Target audience	First responders or practitioners Local Community Organisations/NGOs Youth/pupils/students
Deliverables	N/A
Evidence and evaluation	The product has been evaluated with focus groups initially and then by monitoring data received centrally. There is an evaluation template that facilitators are able to use to monitor delivery and feedback locally.
Sustainability and transferability	There are no costs.
Geographical scope	National and International
Start of the practice	2010
Presented and discussed in RAN meeting	RAN Pol Study visit in London in December 2013
Relation to other EC initiatives	None

Name of the practice	4.5.17 PATHWAYS
Description	Pathways is a DVD based drama which aims to explore extremist narratives from different perspectives. Interweaving characters from the same communities and exploring different faiths and ideologies, the story focuses on how young people can be coerced into terrorist activity. This short film follows the unfolding parallel stories of two characters being drawn into extremism, one towards the far right and the other towards Islamist extremism.
Approach	Community engagement/empowerment Educating young people
Target audience	Educators/academics General public Youth/pupils/students
Deliverables	Delivery and Cost Free, excluding venue and provisions. Training is also provided at no cost. Delivered by university staff. Linked lesson plans.
Evidence and evaluation	Each delivery is quality assured by trained facilitators in Prevent. Each Pathways event is evaluated by regional Prevent teams
Geographical scope	Across England Wales
Start of the practice	Since 2012 developed by ACPO (tam)
Presented and discussed in RAN meeting	Nominated through a number of RAN POL meetings but especially at the London event in December 2013.
Relation to other EC initiatives	None
Organisation	<i>UK National Counter Terrorism Policing HQ (NCTPHQ) (Formerly ACPO(TAM))</i> <i>NCTPHQ is the strategic coordinating and liaison body of the UK police response to Prevent across all 43 police force.</i> <i>Financing: Financed by the National Counter-Terrorism Policing HQ using central government CT funding.</i>

Evidence and evaluation	<p>Cooperation with the following institutes and researchers:</p> <ul style="list-style-type: none"> - DJI - Deutsches Jugendinstitut, Arbeits- und Forschungsstelle Rechtsextremismus und Fremdenfeindlichkeit - Amadeo Antonio Stiftung, Fachstelle Gender und Rechtsextremismus - Fachhochschule Frankfurt am Main, Forschungsnetzwerk Frauen und Rechtsextremismus - BAG (Bundesarbeitsgemeinschaft) Streetwork/Mobile Jugendarbeit (detached youth work) - Prof. Kurt Möller, Hochschule Esslingen (amongst others scientific monitoring and evaluation at VAJA) - Prof. Christian Spatschek, Hochschule Bremen - Prof. Heinz Lynen von Berg, Hochschule Bremen
Sustainability and transferability	<p>VAJA e.V. (primarily) finances itself from municipal funds from the youth aid budget, and also presents its case to the youth aid committee on certain occasions. The association is valued and respected by all political parties.</p> <p>Community work is one of our main pillars. We try to transfer our knowledge into different types of social/public institutions. In the local area we are still connected to nearly every institution and offer our service and support.</p>

Geographical scope	Bremen (DE)
Start of the practice	<p>May 1992 VAJA started work with youngsters with right wing tendencies and extreme intolerant attitudes.</p> <p>Between 2004 and 2007, the team “Akzeptierende Jugendarbeit mit rechten Cliques” (“Acceptance-based youth work with right wing youth groups”) team drew up a conceptual design to integrate changes in the work environment, titled “Distancing through integration - detached youth work with right wing orientated and misanthropic youth”.</p>
Presented and discussed in RAN meeting	<p>RAN DERAD: Stockholm; 04.-05.June 2012</p> <p>RAN PREVENT: Berlin; 13.-14. June 2013</p> <p>RAN DERAD (WOMEX): Berlin, December 2013</p> <p>RAN Plenary & HLC: Brussels; 16 June 2014</p> <p>RAN PREVENT: Barcelona; 26.-27. June 2014</p> <p>RAN DERAD (WOMEX): Frankfurt; 01.-02.October 2014</p> <p>RAN DERAD: Warsaw; 03.-04.December 2014</p>
Relation to other EC initiatives	Member of ENoD (European Network of De-radicalisation)
Organisation	<p><i>VAJA Kitab</i></p> <p><i>Streetwork: Streetwork is a key component of detached youth work and involves meeting the youngsters in their own environment. On the one hand, this means seeking out the youths at their chosen meeting places in the public sphere and also working with them on site (usually on the street). On the other hand, it also means meeting the young people in their own ‘comfort zone’ regarding attitudes and behavioural patterns and not requiring them to change their attitudes or behaviour in order to receive assistance from social work services.</i></p> <p><i>Clique work, individual aid, and parental involvement: The professional basis for working successfully with cliques is to create an overarching, strong working relationship with the recipients. As a form of self-organised youth contact, the clique is not sacrosanct from an educational perspective. With regards to influencing membership, educational ideas can - in consultation with the clique - instead allow new members to be recruited, or support individuals’ wishes to leave. When this happens, the clique becomes a group, preventing the formation of regressive, hermetically sealed environment, and facilitating connections with other social networks - an option which, when it comes to tendencies towards right-wing extremism and other group-oriented enmity, is essential for creating opportunities to leave and switch groups democratically by experiencing social integration, participation and recognition. Distancing potentials are rarely consolidated, and distancing processes rarely introduced, simultaneously and in the same way for all clique/group members. This is why individual aid is an important task area which often develops as a result of working with cliques, groups and scenes. The processes for changing or re-orientating individual youths towards new coping mechanisms, integration methods, memberships and recognitions can be individually accompanied or prompted through this work. It also enables individual problems and needs to be addressed in more detail, providing professional advice for the affected youths and, if necessary, for their parents or other important figures in their social environment.</i></p>

	<p><i>Project work: Project services are special measures that supplement the everyday socio-pedagogical work performed in the aforementioned task areas. They are generally activities such as sport and exercise-based, youth cultural, education-oriented or interactive educational measures and programmes. Elements of mediation, anti-racist and intercultural training, anti-violence training, and training in social and personal skills are applied insofar as they are deemed as having a sufficiently positive impact on the work, particularly in terms of reducing extremist/misanthropic attitudes and violence. Last but not least, projects fulfil the role of using common interests to bring together members of extreme-right/misanthropic cliques and scenes and persons from outside (extreme) right-wing/misanthropic environments.</i></p> <p><i>Community work: Community work is an important part of our strategy, as it is safe to assume that the problems the youths cause are largely related to their own existing issues. Misanthropic, extremist and violent attitudes and behaviours displayed by young people cannot simply be viewed as individual misconduct, but rather result from socialisation contexts presented to the new generation by the adult community. That's why, in addition to family, school and other important socialisation authorities and institutions, responsibility must also be shown to the community as a whole. Associations, clubs, societies, trade unions, churches and other socially relevant groups form what is known as a the local civil society, i.e. in the district, suburb and neighbourhood. These must also get involved, and be supported, when it comes to combating extreme right/misanthropic attitudes in the social environment</i></p> <p><i>Biographical work: This assistance, consisting primarily of clique work aims to achieve more cases of individual aid through social educational processes involving increased contact and trust. The focus areas here include the individual biographical and life-related aspects of various clique members, which can be identified by staff as critical elements of right-extremist orientation. Where possible for the respective educators, these past, present and future aspects are either addressed based on discussions, activities and needs (e.g. through flow charts) or are pursued further through mediation and assistance with other, e.g. therapeutic, services.</i></p>
Country of origin	Germany
Contact details	<p>Hinter der Mauer 9 28195, Bremen Germany</p> <p>Dennis Rosenbaum recl@vaja-bremen.de</p> <p>Jens Kristoff Schaller recl@vaja-bremen.de</p> <p>(+49) 421/76266</p> <p>www.vaja-bremen.de</p>

Name of the practice	4.5.19 <i>To Prevent is Better than to Cure</i>
Description	<p>Making visible and strengthen the role of mosques in preventing radicalisation and polarization by building communal social (and - indirect - religious) resilience,</p> <p>Aims:</p> <ul style="list-style-type: none"> - To enlarge the social role of mosques - To include, inform and attend Muslim youngsters and their social environment (parents, friends and family) - To create resilience amongst Muslim youngsters against radical tendencies of Islam, discrimination and exclusion - To support, attend and train members of boards and/or commissions of participating mosques - To advance the cohabitation of different ethnic and religious communities and to counteract islamophobia, radicalisation and polarisation.
Approach	Community engagement/empowerment Educating young people
Target audience	Youth/pupils/students Families Local Community Organisations/NGOs
Deliverables	<ul style="list-style-type: none"> - Training modules - Debate/discussion modules - Evaluation - Detailed report
Evidence and evaluation	<p>Realisation:</p> <ul style="list-style-type: none"> - In Amsterdam (and environment) more than 100 gatherings/meetings took place in 15 different mosques in 2 years - Most of them informal/small; some of them big/general audience (mutual transfer of knowledge) <p>Concrete activities:</p> <ul style="list-style-type: none"> - Training to recognize and to cope with processes of radicalisation and to enlarge the skills of board members and commissions of women and youngsters active in mosques (to deal with media, 'learn how to discuss' and to work project-based). - Organizing lectures, discussions and debates for youngsters on themes which touch on the 'breeding grounds' of radicalisation and polarization. - To inform parents about backgrounds/effects and give them answers to questions on and/or tools to break through processes of radicalisation, polarisation or exclusion. - Reporting-point for mosques and (intermediary) training 'Reporting Helps' (Islamophobia/discrimination). <p>Relevance</p> <ul style="list-style-type: none"> - Building communal resilience - Making use of the strength of the 'own (Islamic) communities' and the social environment to reach out to radicalized or vulnerable (isolated, excluded, discriminated) youngsters - Example: meeting with the focus on 'Syria fighters (Jihadists)' in Al Kabir mosque (April 2013)

	<p>- Create 'safe' places for discussion/debate, whereas school/home/street are not 'suitable'</p> <p>Report and evaluation Detailed report and evaluation report are both available After every event, a form of evaluation on behalf of the target-group was presented.</p>
Sustainability and transferability	The practise is transferable to other areas with a relatively high density of mosques and Muslims. The sustainability depends largely on the efforts that the stakeholders (members of the board of mosques, volunteers, advisers and participants alike) are willing to make after the 'official' part of the practice has been finished. It needs a 'healthy', sustainable structure.
Geographical scope	Amsterdam and the province 'Noord-Holland'.
Start of the practice	<p>November 2009 - June 2012</p> <p>Recent developments had their impact on the importance and the focus of the project, At this moment we are updating the methods and (scope of). October 2015 onwards we will start with a new (financed) programme that is co-ordinated from and organized in Al Kabir mosque (Amsterdam).</p>
Presented and discussed in RAN meeting	<p>Presentation for the Radicalisation Awareness Network (RAN) during the conference:</p> <p>Foreign Fighters: Working with Individuals, Families and Communities Before, During and After Travel.</p> <p>16-17 September 2013, Antwerp (BE)</p>
Relation to other EC initiatives	Presentations have been given at their expert meetings/conferences, seminars/workshops etc.
Organisation	<i>Zasja is an NGO, focussing on research, lecturing, training and initiating/co-ordinating projects on topics like the institutionalisation of Islam in the Netherlands, discrimination, integration and radicalisation, often in co-operation with organisations of Muslim migrants in the Netherlands and mainly funded by the (local) government(s) and/or private funds.</i>
Country of origin	The Netherlands

5 Educating young people

5.1 General description

This approach entails practices aimed at educating youth on citizenship, stereotypes, discrimination, extremism, democratic values and cultural diversity in order to strengthen their resistance to radicalisation. It also aims to address sensitive issues such as radicalisation and violent extremism within an educational setting.

As the world faces new challenges with the growing threat of violent extremism, schools and educators are confronted with expressions and sentiments on a scale they never anticipated, ranging from personal identity conflicts to complex societal issues. Recent attacks in Paris, Denmark and a growing number of well-educated minors travelling from Europe to join the so-called 'Islamic State' are just a few examples of developments and challenges to which our young people and our educators are exposed. There may be a number of reasons as to why children and students are being radicalised, but it is worth highlighting that the ramifications of terrorist attacks can also exacerbate the situation. These incidents scare, frustrate or anger people causing provocation, ridicule, tensions and protest in the classrooms. Schools and educators are on the front line to challenge and prevent misplaced retaliatory abuse as well as identify and safeguard those deemed vulnerable to radicalisation. They must partner in preventative efforts by investing at an early stage in teaching about democratic values, human rights, citizenship skills and helping to develop and encourage critical thinking skills, whilst in parallel, address and challenge extremist views on an ongoing basis.

5.2 Aims

Educating young people aims to:

- Decrease stereotypes, prejudice and discrimination;
- Increase knowledge about democratic orders, norms and values;
- Increase a sense of positive citizenship and awareness of violent extremism (including digitally e.g. online methods).
- Addressing sensitive issues related to radicalisation and (violent) extremism in the classroom such as responses to terrorist attacks, foreign policy perspectives and conflicts abroad, perceived grievances and freedom of speech issues.

5.3 Methods

Using education to prevent radicalisation can be applied in a several ways:

- Educating young people on stereotypes, discrimination, extremism, democratic order, norms and values, cultural diversity and racism;
- Education to promote digital citizenship, digital literacy and critical thinking;
- Discussing issues related to radicalisation and (violent) extremism;
- Other education projects can include, hearing a testimony of a victim of terrorism, a visit to a concentration camp, a visit to the museum about World War II (to enhance understanding of historical atrocities caused by discrimination), receiving a newspaper and website addressing discrimination, intolerance and cultural diversity which will help

- Interactive exhibitions on citizenship, democracy, human rights on diversity;
- Workshops for youngsters to counter extremism and intolerance e.g. in the form of learning about online propaganda, in the form of drama or a play about polarisation, around a documentary etc.;
- Peer mediation.

Most of these interventions can be carried out in school, but may also be carried out outside school by professionals other than teachers. In these cases, other organisations and professionals come into schools to educate youth.

5.4 Lessons learned

5.4.1 Important pre-conditions at the school level

Any type of educational programme aimed at educating young people on citizenship, stereotypes, discrimination, extremism, democratic values and addressing radicalisation and violent extremism, will only be successful when implemented in a broader educational setting in which the school has developed a clear vision on how to deal with radicalisation and extremism in the school: the board and the management of schools need to understand that recruitment and radicalisation is a risk for their students, just as sexual exploitation and crime. They should develop a response structure for this based on prevention from the safeguarding and risks perspective. Schools should consider the mechanisms that they have available to provide a 'safe space' for these conversations to take place and should consider how this aligns with their policies and procedures. An approach that shuts down dialogue and expression could fuel frustration, whereas clear lines of engagement and management could help to deal with problems at the root cause. Other important pre-conditions at the school level are:

- Innovate within the curriculum to have built-in elements of critical thinking, democratic values, conflict resolution etc. as part of existing courses and activities. This should also enable teachers to spend time on these subjects instead of adding to the many topics teachers already have to deal with.
- The curriculum should be enriched by online tools, to appeal to students and level with the fact that extremism profits from the Internet. A variety of online content countering extremist propaganda is available, and such counter narratives could be part of the curriculum, as input for discussion or otherwise. It is recommended that content is created (mostly in a combination of youngsters, CVE experts and online/web building experts) and /or used that includes messengers credible to young people at risk of radicalisation, such as formers and community or religious key figures. Authorities, and even experts, are not best placed to be such messengers of counter narratives.
- As the curriculum is and should be limited, extracurricular activities should be utilised. Debating and negotiating have proven to be of benefit for students vulnerable to extremism, as these extra-curricular activities provide them non-violent alternatives to problem solving.
- Enable educators to receive training on holding difficult conversations, online processes and radicalisation awareness. Simply 'countering the narrative' alone does not work and can make young people defensive. Teachers must be equipped to facilitate dialogue and exchange in a safe and constructive manner. By ensuring that teachers understand the ingredients, described in this chapter, of 'effective' prevention, they can own the agenda and make sure that their lessons and approaches are appropriate.
- Lead by example to create an open and safe space for school staff to also discuss and share experiences. This is no longer just a matter for the pastoral team. Schools should consider basic training for all teaching staff so that they are equipped to detect the signs and intervene effectively, and to also do this amongst themselves.

- Work together in robust partnerships with other organisations such as social work, youth and health care, police, NGO's and municipalities to detect individuals at risk at an early stage and to involve these partners in a wider prevention and response structure in the school (e.g. invite social workers or police officers to talk in classrooms).
- Involve students in prevention initiatives: those initiatives in school where young people are able to become positive influencers are often very successful as peer influence can be very powerful. There are successful practices of Jewish and Muslim students who jointly engage with vulnerable classrooms, and succeed in countering extremism in those classes.
- Parents and family of students should be seen as valuable partners in safeguarding and prevention. Too often these days there is a negative image portrayed of parents and families providing places for extremism to flourish. Although this possibility exists and schools should be aware of that, more often parents and families also have the best interest of their sons/daughters/family members at heart and they want to help keep them safe. Parents should also be pro-actively informed about the programmes in schools aimed at educating young people in relation to radicalisation.

5.4.2 Important pre-conditions at an educator-level

Educators play a key role in the prevention of radicalisation leading to violent extremism. They are confronted with extreme and sensitive ideas and behaviour of students in their classroom. Whatever the source of these expressions (grievance, injustices, group-pressure), the educator is challenged to identify and address these issues in a safe and open way. Leaving these expressions unchecked could feed the extremist narrative as well as jeopardize students' (social) safety. Educators need to invest in and receive support to increase their capacity to engage and act on this. They should be able to:

- Engage in difficult conversations: educators should try starting a dialogue with their students about sensitive and difficult topics related to personal feelings, principles and beliefs. In many cases, it is worse to not respond and leave these kinds of sentiments and expressions unspoken. This does not only apply to religion, sociology teachers or counsellors, but is a responsibility of all educators regardless of their specialism.
- Offer alternatives: educators can refer to organisations or NGO's that offer a suitable alternative to students that want to contribute to a cause (at home or abroad) and/or channel their sentiments of injustice. These students can be brought in to contact with, for example aid organisations that deliver supplies or refugee assistance in Syria and/or Iraq. Or they could be trained to become youth ambassadors and as 'anti-prejudice counsellors', for example.
- Build educator-networks and hotlines: educators can help each other with difficult and sensitive issues to be discussed in the classroom. Whether these are colleagues from the same school or other schools, teachers should reach out to each other to share experiences and approaches. In some cases, it could be effective to involve another teacher in the discussion with the class.
- Discover online: the current generation of students are very active online. As an educator it is useful to be aware of the different online platforms that students engage in and the content they are confronted with. Educators can also use this online material to start a conversation with their students about the need of critical approach about the online content - especially in the Social Media.

5.4.3 Enhancing critical thinking skills

Critical thinking is a key element in harnessing individuals against extremist. As such, activities should promote dialogue and exchange - not closing down discussions to avoid addressing issues. Interventions should avoid telling young people what to think, avoid pressuring, preaching, moralising, judging or trying to convince. This can prove to be counter-productive and further entrench their views. Extremist ideologies and narratives (often a response to the threat that

globalisation produces as cultures ‘rub shoulders’ in new ways) tend to emphasise a single value per issue. The logic and strategy behind this is that groups with clear value hierarchies become attractive as they provide certainty and simpler, black and white solutions to a complex world, thus protecting the values and identity of the ‘in-group’. Black and white thinking, centred on protecting a key value, leverages group loyalty, and this strengthens the grip of the extremist discourse on its followers. There is strong neurological evidence that in a state of threat (whether perceived or real) all people think (and react) more simplistically and tend to move towards extremes in their views. This in turn again feeds support for the extremist mind-set. To influence these cognitive processes, interventions should not focus on the content of ideology or particular beliefs but on the structure of thinking and make this structure more complex. Increasing the complexity with which people think about the issues that other radicalizers exploit serves to reduce vulnerability to the messages of extremism as a broad-based form of primary prevention.

The effectiveness of an activity is increased by experiential learning. It is better to combine conversations and discussions with interactive games and exercises. With experience, youngsters learn how to reflect on their feelings and behaviour, they learn to analyse it and experiment to make changes. With a combination of learning by doing and discussions, youngsters are triggered to think.

5.4.4 Utilising Voices of Victims of Terrorism

Testimonials of victims or formers: victims and survivors of terrorism, but also former extremists. Their testimonials, both online and offline, can have a big impact on the students and can also be a good opportunity to open the dialogue. Within the class room setting some important lessons for the use of testimony are:

- A testimony has more impact and will be better remembered if the audience (young people) is well prepared for it. This can be achieved by providing additional information and having discussions on the topic beforehand (as part of a bigger educational programme). The best thing to do is formulate clear educational objectives and communicate these to the person who will be providing the testimony. Good preparation also entails informing the parents about subject, programme and objectives. Pupils and students can gather possible questions in small groups. The questions can be ordered by: Facts, personal experiences, opinions etc. It can be very helpful for the victim to look into the questions of the pupils before the testimony, to have an idea of the project and the audience. Preparation is just as important as after-care. Teachers should monitor the impact of a testimonial in a class room.
- The testimonies should be focused, with a specific aim for the specific audience. An isolated, stand-alone testimony will not be useful. A testimony given in a school should be part of a bigger programme and should be integrated within the educational system. The human aspect and a strong sense of empathy are also essential in the setting and story. If the personal story is related to the basics of democracy and human rights, the victim can make his or her narrative stronger, with more educational impact and provide a wide perspective for the audience. The testimony should not be patronising. Young people shouldn't be told what to think but should be encouraged to think critically about what they are hearing.
- Increasing the learning process. The effectiveness of a message increases if a message is experienced. Experiential learning is learning through reflection on doing (learning by doing). Hence it is better to combine conversations and discussions with interactive games and exercises. With these experiences youngsters learn how to reflect on their feelings and behaviour, they learn to analyse it and experiment to make changes. This will encourage critical thinking. To deepen the learning process, the teacher could look for additional media to communicate the learning result (PowerPoint presentation, newspaper, school bulletin, theatre, social media, and parents' evenings). Of course these activities should be well prepared.

5.5 Practices

The following practices are discussed:

- Aiviter - C4C Project (ISEC)
- Aiviter - Futura Memoria
- Arktos - BOUNCE Resilience Tools
- Cardiff - GOT
- COVITE - The Map of Terror
- Critical Mass - Expedition Friend & Foe
- Denkzeit - (Time to Think) Training
- Digital Disruption - Digital literacy
- Fida Management - Identity, Belonging and Extremism
- Haver - Jewish Informal Education
- IC Thinking - Being Muslim, Being British
- Megálló Group Foundation for Addicts - derad workshop
- Never Again Association
- Peace Education The Netherlands - Democracy factory
- The Tim Parry Jonathan Ball Foundation for Peace - THINK! 4 Peace
- UFUQ - How do we want to live
- Violent Prevention Network - MAXIME Berlin
- West London Initiative (WLI)

Name of the practice	5.5.1 C4C, Counter-Narration for Counter-terrorism
Description	<p>The main aim of “Counternarration4Counterterrorism - C4C” project is to support and use the testimonies and the stories of the victims of terrorism. Assuming a role analogous to the one played by the victims and the survivors of the prosecution and of the concentration camps during the Second after War in the construction of a European anti-totalitarian identity. Because it becomes very relevant to establish which stories take part in creating our idea of terrorism and because terrorism searches the spectators’ gaze, spreading fear and terror, our aim was to counter-narrate such stories improving the victims’ gaze: their narratives, feelings and positions. Our assumption is that stories of the survivors, or the victims’ family members, may create a counter-narrative bearing positive values. Those of dialogue, tolerance, peace, non-violence, respect of diversity, respect of democratic values. The stories offer an alternative model of language, values and rhetoric with the purpose of reinforce critical skills and awareness among young people towards the use of violence.</p> <p>To enhance and make the “Voice of the victims” available to the educational system, literary and media, the C4C project developed a Multilanguage open source web platform, entitled “The Terrorism Survivors Storytelling - Global platform for resilience stories and radicalisation awareness”, which contains:</p> <ol style="list-style-type: none"> 1) The archive Global Data-base of the selected materials and files containing terrorism survivors’ storytelling, catalogued and reachable by the search engine (around 100 db records of narratives). 2) The Multimedia Deposit where a part of the materials (around 100 Gigabytes of files) is directly available in the different digital forms of texts, videos, photos, and so on, reachable by registered members for digital storytelling activity, under creative common license, with the purpose of creating new communication/didactic products through the e-collaborative tools currently on the platform. 3) Furthermore the platform offers selected didactic and methodological resources, the report on the activity with the C4C project target group, to help its practical usage at the ground floor carried on by practitioners, teachers, tutors for educational/prevention/de-radicalisation programmes. <p>With the support of the didactic programme, based on the Learning Circle didactic method and “Project-Based Learning”, the platform “The Terrorism Survivors Storytelling” has been tested in an Italian school during the whole school year 2013/14 with the target group: 2 classes for a total of 50 students.</p> <p>The didactic activity has been carried out, apart from the teachers, the C4C project team and the partners of the project, in particular by the members of the Italian Association of the Victims of Terrorism (Aiviter), who has joined several times the classes for a direct participation to the lessons. The school classes have been divided into working groups (5 groups per each class) and have elaborated a topic for an audio/video to be realized (documentary, spot, rap, editing of archive images, interview, backstage, animation: the kind and style were free options). They proceeded into the phase of realisation, working on the platform “The Terrorism Survivors Storytelling” and</p>

	<p>then producing, in the phase of the definitive editing, their final videos and outputs.</p> <p>The presentation of the first results (3 videos) of the project took place on the occasion of the commemorations for the European Remembrance Day for the Victims of Terrorism in Madrid on March 11th, 2014. The final videos and outputs of all the students were presented on the occasion of an event in Turin entitled “Europe against terrorism” on May 12th, 2014 in front of other students from numerous schools, institutions and other public in the vicinity of the Italian Remembrance Day of the victims of terrorism, on May 9th.</p>
Approach	<p>Educating young people Delivering alternative narratives</p>
Target audience	<p>Youth/pupils/students Educators/academics Victims of terrorism</p>
Deliverables	<p>1) The platform The Terrorism Survivors Storytelling at http://www.c4c-project.org 2) The C4C YouTube Channel linked to the platform: the 5 best videos produced by the students are available.</p>
Evidence and evaluation	<p>The C4C project expected results were to strengthen the critical thinking and awareness, especially among young people, so, we evaluated the project impact during the working activities in the school. At the beginning of the didactic experience during a brainstorming, some students (5/6 per each class) justified, in fact, the rights of violence of a certain kind of terrorism (“nowadays it is the unique way to have oneself heard by the society”, they repeated). Only a little number of students in the class (less than one half) was opposed to such rights, while the rest remained silent, neutral or even indulgent. At the end of the experience, no student did go on justifying the use of terrorist violence for the purpose of asserting his own ideas, to which had contributed in a determining way the testimony of the victims in the class, and above all the fact of “working” and “elaborating” (then to “conceptualise”, to “appropriate”) the multimedia material put at disposal of the C4C project platform.</p> <p>To present and evaluate the results of the C4C project and its follow-up a two days’ workshop took place in Turin, Italy, on November 21st and 22nd, 2014. Experts from victims of terrorism associations, from educational bodies, and from RAN working groups attended and discussed the C4C topics and results and discussed with the beneficiaries of the project. The impact of C4C project has been evaluated as positive and fruitful, but it has been stressed as relevant to further test the platform and its methodology in other schools and cultural and geographic contexts to better evaluate and focus results and methodology.</p>
Sustainability and transferability	<p>The partnership of the project has informally extended during the project lifelong thanks to the reception of letters and emails of interest and collaboration from: IMPACT, National Knowledge Centre for Post-Disaster Psychosocial Care, The Netherlands; Omagh Support & Self Help Group (OSSHG), UK; Spanish Audiovisual Archive of Victims of Terrorism, Spain; The Families of September 11 (“For Action Initiative” project), USA; Hedayah, The Center of Excellence for Countering Violent Extremism, UAE.</p>

	<p>Furthermore during the final event in Turin, other participants - like the experts from RAN, the Italian Ministry of Education and the private “Foundation for school” - have also expressed their interest in the project follow-up.</p> <p>So, at the end of the project in December 2014 the team has started evaluations and assumptions to allow the project to continue. The idea, the team is working on, is to create an innovative start-up company or consortium for the management of the platform with its tools, its methods regarding the didactic activity in the perspective of preventing young people to be engaged into violent extremism.</p> <p>A company or consortium that could ensure an international transferability of the project goals in the prevention and radicalisation awareness activity in schools, developing the contents of the platform with storytelling materials coming from other countries, in order to allow the methodology to well fit the cultural heritage of the youth from those countries.</p>
Geographical scope	Mostly Turin, Italy. Part in Paris, France
Start of the practice	The practice was developed December 2012 - November 2014 and implemented during the school years 2013/2014. It's now in follow up phase.
Presented and discussed in RAN meeting	RAN VVT meetings. In particular in Madrid June 6-7 2013, in Rome on October 15-16 2013, in Paris on April 9-10 2014
Relation to other EC initiatives	RAN, Voices of Victims of terrorism (VVT) working group AIVITER practice: Memoria Futura/Future Memory
Organisation	<i>AIVITER - Italian Association of Victims of Terrorism is a non profit private association. The practice is self-financed, but Aiviter has been involved in EU projects financed by the European Commission (like ISEC).</i>
Country of origin	Italy
Contact details	<p>AIVITER - Presso l'Amministrazione Provinciale di Torino Via Maria Vittoria 12 - 10123 Torino Italy</p> <p>Luca Guglielminetti info@vittimeterrorismo.it</p> <p>(+39) 011 532687 or (+39) 335 6619003</p> <p>www.c4c-project.org</p>

Name of the practice	5.5.2 Memoria futura /Future Memory
Description	<p>AIVITER realised a training module for the educational system to raise awareness of extremist violence and promote active citizenship among youngsters. AIVITER uses the stories and the direct and indirect testimonies of the survivors, family members, victims of terrorism (terrorism that has marked two decades of recent Italian history). Starting from nowadays terrorism challenges, the testimonies and multimedia instruments on victims stories are used for reflection of what happened in Italian history, increase the awareness and level of information/knowledge of national terrorism and the historical and cultural roots. Therefore to encourage youngsters to develop a critical thinking, an awareness in the use of violence on political topics and in the risk of violent extremism engagement.</p> <p>Furthermore, the storytelling activity by the survivors/victims, in first person and in public, empowers their resilience and their social status and role.</p> <p>Architecture of the training practice:</p> <ol style="list-style-type: none"> 1. Propaedeutic activity with the teachers 2. Two introducing lessons to the student on the topics 3. The students works in group for three months on a selected topic with the aim to prepare a deliverable, expression of their activities and thinking 4. Discussion and evaluation of the deliverables by each students working group 5. Presentation of the deliverables in a public event in the occasion of the Italian Remembrance Day of Victims of Terrorism: all students and teachers are rewarded by Aiviter and the best works are disseminated on line.
Approach	Educating young people Delivering alternative narratives
Target audience	Youth/pupils/students Educators/academics Victims of terrorism
Deliverables	The result of the student working groups are the concrete deliverables: they are digital outputs such as videos, power points, reports, web content, using any kind of communication language and means.
Evidence and evaluation	<p>Performance measures of the practice: the quantitative data are the numbers of teachers/classrooms involved in the training per school year: 1 in 2012/2013, 2 in 2013/2014, and 4 in 2014/2015.</p> <p>The main evaluation and feedback comes from the teachers who are closer with the students: at the end of each training module they write a report to Aiviter. And it is presented during the final event.</p> <p>Peer review: the practice was compared with an analogue practice carried out by another Italian association of victims of terrorism (Associazione tra i familiari delle vittime della strage di Bologna del 2 agosto 1980) in the RAN VVT working in Rome on October 2013 when they were discussed.</p>

Sustainability and transferability	<p>Sustainability: because the practice is carried out both by Aiviter volunteers (the member of Aiviter) and by practitioners - using didactic and multimedia materials (CD-ROM, videos, books, web platform) already implemented in past projects - the cost of the training module is rather low.</p> <p>The transferability is still on the way: Aiviter working group on schools has already involved other members coming from other Italian regions than Piemonte. So, next school year, the practice is planned to be transferred in Lombardia and Puglia, because - with a few changes - the basic elements of the practice are easily transferrable in other Italian local contexts.</p>
Geographical scope	Italy, Piedmont region
Start of the practice	The practice was developed March-June 2012 and implemented during the school years 2012/2013, 2013/2014 and it is still active this year 2014/2015.
Presented and discussed in RAN meeting	RAN VVT meetings. In particular in Rome, on October 15-16 2013.
Relation to other EC initiatives	“C4C - Counter narrative for countering terrorism” European project
Organisation	<p><i>AIVITER - Italian Association of Victims of Terrorism:</i></p> <ul style="list-style-type: none"> - <i>Non profit Association</i> - <i>This practice is self-financed, but Aiviter has been involved in EU projects financed by the European Commission</i>
Country of origin	Italy
Contact details	<p>AIVITER - Presso l'Amministrazione Provinciale di Torino Via Maria Vittoria, 12 10123 Torino Italy</p> <p>Luca Guglielminetti info@vittimeterrorismo.it</p> <p>(+39) 011 532687 or (+39) 335 6619003</p> <p>www.vittimeterrorismo.it</p>

Name of the practice	5.5.3 BOUNCE Resilience Tools
Description	<p>BOUNCE is a package of three training and awareness-raising tools for youngsters and their social environment. It is a positive answer to the challenge of preventing violent radicalisation at an early stage. The BOUNCE tools are designed as preventive measures when - or even better - before concerns about violent radicalisation arise. They provide youngsters and their environment instruments to manage the challenges they come across. The three tools (BOUNCE young, BOUNCE along and BOUNCE up) are interconnected and complement each other. BOUNCE emancipates youngsters and their network, to become resilient and to interact with an aware environment.</p> <p>The BOUNCE Resilience Tools were developed with a view on an early prevention psycho-physical training for (vulnerable) youngsters to strengthen their resilience against radical influences and to raise the awareness of the youngster's social environment.</p> <p>BOUNCE young is a resilience training program for youngsters. A healthy and strong resilience is a proven protective factor in the prevention of violent radicalisation. In 10 (inter)active group trainings, youngsters train and strengthen different aspects of their resilience. Through a mix of action and reflection, a wide range of skills and competences are strengthened, practiced and linked to their personal experiences. Youngsters learn to bounce back and bounce up when dealing with challenges. In the trainings, youngsters make the link between the work forms and their personal experiences. A BOUNCE young training is always used in combination with BOUNCE along awareness-raising actions for parents and frontline workers.</p> <p>BOUNCE along is an awareness-raising tool for parents and frontline workers. The tool provides tips, insights and practical exercises for adults in the social environment of youngsters. It assists them and strengthens their role in the early prevention of violent radicalisation. BOUNCE along treats five topics: 'a positive point of view', 'strengthening resilience', 'resilient relations and communication', 'concerns and challenging situations', and 'information and support'. BOUNCE along focuses on all parents and frontline workers, and can be used in combination with the BOUNCE young resilience training for youngsters.</p> <p>BOUNCE up is a train-the-trainer tool for frontline workers. This tool instructs them in working with the BOUNCE young resilience training program and the BOUNCE along awareness-raising tool. By combining both tools, trainers can become an important supporting figure in the early and positive prevention of violent radicalisation. Trainers assist youngsters as well as their social environment and set up an integrated and integral approach, tailored to the needs of the target groups.</p>
Approach	Educating young people Training for first line practitioners
Target audience	Youth/pupils/students First responders or practitioners Families

<p>Deliverables</p>	<p>The BOUNCE manuals can be downloaded on the project website www.bounce-resilience-tools.eu. They are free of copyright and are introduced in a short presentation video.</p> <ol style="list-style-type: none"> i. BOUNCE young manual - resilience training tool for youngsters with ten completely worked out active group training sessions. ii. BOUNCE along manual - awareness-raising tool for parents and frontline workers. iii. BOUNCE up manual - train-the-trainer.
<p>Evidence and evaluation</p>	<p>The BOUNCE training developed formats are based on scientific research (including literature study), lessons learned from EU good practices and interviews with youngsters, in which it has been elaborated on the different ways to enhance the resilience of youngsters against violent radicalisation.</p> <p>During the development and testing of the BOUNCE tools, the Training Network, the Advisory Board and partners (such as school teachers, parents, educators, etc.) have delivered their (mostly positive) feedback on the tools. Also the feedback from parents, frontline workers, co-trainers and youngsters involved, was taken into account.</p> <p>The BOUNCE tools include evaluation forms for users and participants, which serve for the registration and future measurements of the training outcomes.</p> <ul style="list-style-type: none"> - The BOUNCE young trainings have an assessment form to use before, during and after trainings, including a registration form for making the evolution through trainings visible. - The BOUNCE along awareness-raising actions are evaluated through both evaluation forms for participants and trainers. - The BOUNCE up train-the-trainer sessions are evaluated through evaluation forms for participants and trainers. (Example: the first BOUNCE up train-the-trainer sessions in January and February 2015 have been evaluated by participants and trainers). <p>Since the BOUNCE tools are launched very recently, there is only a limited amount of official evaluations by participants available at this time.</p> <p>Peer review during the RAN Prevent ‘Big education meeting’ on March 4 2015. This led to positive feedback on the holistic approach of the tools (working with youngsters, parents and frontline workers, and involving different life domains). Also the positive, strengthening approach, empowerment of the target groups and early preventive approach were referred to as strengths.</p>
<p>Sustainability and transferability</p>	<p>The tools have been developed from a European perspective. All the tools are available in English. There is no copyright on the tools. The project website www.bounce-resilience-tools.eu is used to spread the BOUNCE tools. Copies of the booklets in English are available via info@arktos.be at the printing cost price.</p> <p>The cost of the trainings depends on the amount of time and personnel required to perform the chosen actions in the field. ArktoS (working in the Flemish part of Belgium), can compose price offers on demand.</p>
<p>Geographical scope</p>	<p>The BOUNCE tools have been developed in English for usability throughout the whole EU region.</p>

	BOUNCE was tested in 2014 and 2015 in Belgium (in Kortrijk, Brussels, Ostend, Tessenderlo and Dworp). The BOUNCE up train-the-trainer tool was tested in 2014 in The Netherlands.
Start of the practice	<p>The project ‘Strengthening Resilience against Violent Radicalisation (STRESAVIORA)’ has been conducted between January 2013 and January 2015. The project outcome has been the ‘BOUNCE Resilience Tools’, which were first presented at an EU conference in Brussels in December 2014.</p> <p>In 2015 Arktos and partners started disseminating the project. The first national and international BOUNCE up train-the-trainer sessions took place in January and February 2015.</p>
Presented and discussed in RAN meeting	RAN Prevent, 3-4 March 2015, Manchester (UK). Two interactive workshops were performed.
Relation to other EC initiatives	None
Organisation	<p><i>Arktos is a non-profit organisation with five guidance and training centres spread over the region of Flanders (Belgium). Arktos works with children and youngsters from the ages 6 to 25 who are socially vulnerable. Our three main activities in this matter are:</i></p> <ul style="list-style-type: none"> - <i>Training for children and youngsters in different types of projects.</i> - <i>Support for professionals.</i> - <i>Signalling to society.</i> <p><i>We approach every situation in a project-oriented, experiential and active way, always in close partnership with all relevant stakeholders, using group work and individual attention.</i></p> <p><i>Arktos stands next to children and young people in their environment, specifically in employment, education, leisure, health and environment/ neighbourhood.</i></p> <p><i>Arktos gets funding from national and local governments, combined with project funding. For the development of BOUNCE resilience tools, Arktos was supported by the 2011 ISEC fund of the European Commission.</i></p>

Name of the practice	5.5.4 Getting On Together
Description	<p>Four inter-locking programmes challenging extremism and promoting integration:</p> <p>GOT Phase 1: Pilot funded by WAG: a) Challenges radical ideologies b) Respect & to tolerance for all*.</p> <p>(A) GOT Schools & colleges: A school/college-based intervention for Key Stages 3, 4 and 5 (11-19 year olds) complementing the National Curriculum. The programme is designed to assist teachers in addressing (controversial) issues relating specifically to Islamic radicalisation. DVD episodes x 5 and full teaching resources; bi-lingual (Welsh - English). It offers teachers possibilities for CPD (Continuous Professional Development) through a link with UWIC (University of Wales Institute). Inception - autumn 2008.</p> <p>(B)GOT Community: In conjunction with South Wales Police and Welsh Government, an itinerant programme principally directed at key adult community figures: Resources as (A) above. Inception - autumn 2009.</p> <p>GOT Phase 2: Funded by Safer Capital/WAG: a)Challenges all extremism b) Promotes critical thinking*</p> <p>(C)GOT Youth & Community; A bespoke programme targeting youth and young adults in informal settings through NAOMIE. Workshops feature a new DVD on ‘Challenging Extremism’: Inception - May 2011. (Also attracting strong interest from multiple Service Providers. See GOT phase 2)</p> <p>GOT Phase 3: Funded by the Home Office: Reinforces the true non-violent message of Islam.</p> <p>(D) ‘Understanding Islam’ takes the knowledge and understandings from Phase 1 and puts sensitive issues within easy reach of classroom teachers of RE, PSE and Welsh Bacalaureate through 20 filmed, taught, scenarios involving Cardiff students- spring 2014.</p> <p>*Aim Aims & objectives: All four programmes from 11years - adulthood have at their core the aim of challenging extremism and promoting integration. The objectives, differentiated according to the target audience, are:</p> <ol style="list-style-type: none"> 1. To counter intolerance and extremism through independent and critical thinking. 2. To facilitate knowledge and understanding of the non-violent message of the Islamic faith. 3. To reduce prejudice and discrimination between all cultures, faiths and creeds. 4. To promote integrated and cohesive communities.
Approach	Educating young people Delivering alternative narratives

Target audience	Educators/academics Local Community Organisations/NGOs Youth/pupils/students
Deliverables	All four programmes have teaching manuals, DVDs and resources
Evidence and evaluation	GOT has been evaluated by Cardiff University - pupils' recorded feedbacks and others reports also available.
Sustainability and transferability	GOT MUST be accompanied by a raising awareness programme - as we are doing for Bradford schools and colleges tomorrow (24th February). This is normally done by the GOT Project Director (no cost) and teacher-practitioners x 2. The at-source cost for teacher manual/DVD/CD is £95.00
Geographical scope	UK-wide; has also been presented in part to a European audience via ISDEP (Police College); national ACPO Prevent conferences at Manchester and Oxford; RAN at London and The Hague
Start of the practice	Piloted with Welsh Government funding in 2009 to Cardiff Schools - the first of 4 structured interventions; Home Office funding enabled the production of 'Understanding Islam' - a DVD for use in schools, colleges, communities and faith groups.
Presented and discussed in RAN meeting	Presented at the RAN Pol Study visit in London in December 2013 and at the Cities Conference on Foreign Fighters to Syria, in The Hague 30 January 2014.
Relation to other EC initiatives	Working currently with ACPO
Organisation	<i>The Project is self-financing and has been supported by grant aid from e.g. Cardiff Safety Partnership; Welsh Government; the Home Office</i> <i>It is a non-profit making collection of key representatives from faith, communities, teacher-practitioners, academics, school/college inspection service.</i> <i>It is headed up by three directors</i>
Country of origin	Wales, UK

Name of the practice	5.5.5 The Map of Terror
Description	The Map Of Terror uses the potentialities of online communication for building a speech using texts, videos, images and a huge data base. All the content is used to contextualize terrorism and for explaining how violent radicalisation can destroy lives such as those using the multimedia tool.
Approach	Educating young people
Target audience	Youth/pupils/students Educators/academics
Deliverables	www.mapadelterror.com
Evidence and evaluation	The presentation of the initiative was well received in the national media (http://www.covite.org/covite-en-los-medios/gran-acogida-medi%C3%A1tica-del-mapa-del-terror-de-covite/). Also for those who develop their work in the field of the study of history. In terms of impact, the initiative was selected by the first World Forum Against Violent Extremism, held in Abu Dhabi in December 2014. The map was exposed to government offices around the world as an example of good practice.
Sustainability and transferability	Online tool, so very sustainable. The overall costs of the initiative and content translation into four languages involved an expenditure of €20.000,-.
Geographical scope	Spain
Start of the practice	The development of The Map of Terror began January of 2013 and ended December of the same year.
Presented and discussed in RAN meeting	RAN VVT, Paris, April, 2014
Relation to other EC initiatives	Initiatives against violent radicalisation
Organisation	<i>Collective of Victims of Terrorism (COVITE), NGO that receives funding from the Spanish administration to develop initiatives against violent radicalisation in Spain.</i>
Country of origin	Spain
Contact details	San Sebastián, Basque Country Catalina Elizegui, 46. 20009 Spain Juanfer F. Calderín Juanfer.calderin@covite.org (+34) 666019911 www.covite.org

Name of the practice	5.5.6 Expedition Friend & Foe
Description	<p>The purpose of FRIEND&FOE is to give (young) people, students and their teachers' tools to handle conflict in a constructive manner, in their personal life and in society at large; and actively prevent the spreading of xenophobia and radicalisation, social exclusion, discrimination and bullying within Dutch society. For a period of two years Critical Mass will visit 50 to 70 schools for secondary and senior secondary vocational education (MBO) in the Netherlands, especially in rural areas, to engage in conversations with 20.000 youngsters. We travel to schools with five sea containers, packed with 'experiences'. In an intimate atmosphere students are encouraged to explore their friends and foes; who are they, and how did they turn into that?</p> <p>Together with our trainers, students search for (new) ways to no longer think in contradictions - friends or foes - and to find ways to deal constructively with diversity. Within school, but also in society. In additional lessons mentors or teachers are encouraged to discuss social issues in the classroom and at school, continuing with the experiences their students gained in the containers. The lessons are directed to specific courses, such as mentor class, social studies and history, but also Loopbaan & Burgerschap (career and citizenship, at vocational education). Of course, different levels and years of education are taken into account.</p> <p>In mentor classes and/or Loopbaan & Burgerschap courses, students work on social safety. They break with old patterns and experience the effects of different behaviour. They learn to deal with conflicting interests and look for constructive solutions. Finally, they make their own plan of how they want to improve the classroom atmosphere. Given the fact that extremism and radicalisation is currently a hot item, the past year we developed an additional lesson for social studies on conflict and radicalisation. As in the past year different media have repeatedly mentioned that teachers struggle to address these themes at schools, we expect this lesson to be a good and very much needed addition to (our) current lesson materials.</p> <p>In additional questionnaires as well as during the students' visit to our containers we collect findings on the question: what is the status quo on the social environment at school? Based on the collected data we give schools our feedback and provide them with tools to improve their social policy. We actively stimulate schools to further deal with the problems at hand, possibly with our help. We refer to our additional practical trainings and, depending on the needs and demands of the school, we give extensive competency trainings to students and teachers at 20 schools at least. Within these trainings practical tools will be given to improve the social environment at schools and to contribute to a sustainable socially safe environment at schools.</p> <p>The core of FRIEND&FOE are the five confrontation containers that are placed at schoolyards, each of them dealing with one of the following five topics:</p> <ol style="list-style-type: none"> 1. Bullying & dealing with people who are 'different' 2. Exclusion 3. Prejudice & discrimination 4. Conflict hardening & conflict escalation/radicalisation

	5. Reflecting on your own role & social pressure
Approach	Educating young people
Target audience	Youth/pupils/students
Deliverables	<ul style="list-style-type: none"> • 3 day training course and handbook for trainers involved in the project • educational material for teachers to be used after scholars visit the confrontation containers • school scan providing information on the social security within a school • 3 additional workshops for scholars (Conflict@Play/Interview with... and IMAGE Photoshoot and street assignment) • Teacher training 'Using experiential learning as a tool in discussing difficult subjects with scholars'
Evidence and evaluation	<p>Qualitative results 2014: After visiting the containers, both students and teachers are often very enthusiastic. We get many positive remarks by students, for example: "Most of these projects are really boring, someone just comes to talk and gives a speech in front of the class. But this one is really cool. You can actually do things and experience stuff yourself. You guys did a great job." But also more substantive ones: "If we knew about this project before, many things may have been prevented: exclusion, bullying. Everyone should experience this." Or: "I now know that if someone looks different this doesn't mean we cannot have things in common. We have to be more open and not judge immediately, so that we can actually get to know each other." Additionally to our conversations with students and teachers, during the first months of 2014 we developed a valuation research and evaluation. Based on these surveys collected from 1.040 students we can conclude with satisfaction that 82% of the students liked the project, opposite to 4% who did not like it. A big majority furthermore considers the project interesting (73%), meaningful (54%), innovative (57%) and informative (61%).</p> <p>When we focus on the different levels of education, we can conclude that especially VMBO students are positive about the project (88%), which is our primary target group. Yet, also VWO students are very positive (84%). With this in mind, we also evidently realised our goal that 75% of the students should be positive. Havo students are an exception, as only 70% of them are positive. (VMBO, HAVO and VWO are different degrees in the Dutch high school system.) In 2015, we will further investigate this. Additionally, in our acquisition for schools we will focus more on students of which we are certain the projects works best for. A majority of the students tell us that they have learned something: 64% tells us to think different about exclusion, while 59% gained insight in the effect of fear and insecurity on their decisions, and 51% discovered new ways of intervening when they are part of a bullying situation. Considering the different levels of education, VMBO students tell us that they have learned the most, while MBO students tell us to have learned less. We think this is due to the fact that they have already followed lessons on identity, conflict and exclusion before. Remarkably enough, MBO teachers tell us to really appreciate the project and are eager to place our containers on their schoolyards (again).</p> <p>Finally, students are positive about our trainers: 58% thinks of them as</p>

	<p>very good and another 25% as good; 15% is neutral and only 2% considers them bad or really bad. This reinforces our idea that both our methodology and our open, not-moralising style of coaching work. The safe atmosphere allows students to be open, honest and vulnerable, which is quite an achievement when you consider the fact that our trainers can only spend one hour and fifteen minutes with these students.</p>
Sustainability and transferability	<p>We do not yet know for how long the project will continue. The methodology and the project in itself are transferable to other countries. The educational content has to be adapted to the local contexts.</p>
Geographical scope	The Netherlands
Start of the practice	<p>Development: June-December 2013 Started: January 2014</p>
Presented and discussed in RAN meeting	<p>We presented our organisation and methodology on the RAN VVT meeting in June 2013 Madrid. After that we developed our latest prevention project called Friend & Foe.</p>
Organisation	<p><i>Critical Mass (Foundation)</i> <i>Since its establishment in 2005, Critical Mass poses questions regarding the processes surrounding social cohesion, conflict and identity. It is our vision that, whoever attains a better insight in these processes, is also better able to deal with conflicts. Our work is based on academic theories on social processes, coming from cultural anthropology, political science and social psychology. We translate these theories into innovative and accessible teaching methods, including drama, thematic games, documentary and simulations. Our approach is a combination of experience, reflection and action. We give young people skills to deal with (inter-group) conflict in a constructive manner. Critical Mass is a foundation. We receive grants from funds, contributions from participating schools and from development-assignments from other organisations.</i></p>
Country of origin	The Netherlands

Name of the practice	5.5.7 Denkzeit (Time to Think) Training
Description	<p>The Denkzeit (meaning Time to Think) Training programmes address youngsters (ages 13 through 25) at school, in prison or on probation, who have a track record for violence, partly also for committing extremist motivated violence. Well-directed intervention strategies aim at developing or strengthening social-cognitive competences that enable clients to handle interpersonal conflicts better than before in a socially acceptable way. The working method of Denkzeit comes from a clinical background and combines a pedagogical approach with a psychological approach. Denkzeit offers a variety of programmes for different target groups. All programmes are modelled as individual processes with one trainer who works with the client. The programmes have different phases called “modules”. It starts off in cognitive phase (1), then the emotion managing phase (2), the ethical and moral phase (3) and last level is the live-through phase (4). The first three modules are manualised with a fixed structure in terms of their goals, methods and examples. To start with the programme, both trainer and youngster have to agree on the framework that states firm, supportive agreements and consequences.</p>
Approach	<p>Educating young people Exit strategies</p>
Target audience	<p>Youth/pupils/students Educators/academics Prison/probation/judicial practitioners</p>
Deliverables	<p>For all Denkzeit programmes there have been developed training manuals, which include goals, exercises, hints and materials for every session of the first three modules.</p>
Evidence and evaluation	<p>The forerunner of the Denkzeit programmes (Brandon Centre Training), developed by Geoffrey Baruch in London (UK), was already successfully evaluated for effectiveness. The number of convictions per person was reduced from 4.5 per year before the training to 1.5 after the training (Baruch 2000).</p> <p>The Denkzeit Training itself was also evaluated for effectiveness by comparing the number of convicted crimes before and after the training. By taking part in the training the number of crimes per person could be reduced from 3.4 per year before to 1.0 after the training. This study surveyed a period of up to 4 years after the end of the training (Körner 2006). In both studies the trainings were compared to one or more other treatments, which turned out to be less effective.</p> <p>The drop-out rate in the Denkzeit Training-programmes is 28%.</p> <p>The feedback at both above-mentioned presentations was very positive. Regarding the short case study that was presented, the discussants were highly interested in the indirect approach to tackle radical motivations. The framework of the Denkzeit Training and its effects were discussed as plausible. In addition the qualification and support of the trainers was recognized.</p>
Sustainability and	<p>The effects of the training proved to be sustainable by the finding of</p>

transferability	<p>the evaluation study (see above), that the reduction of convictions was measurable up to four years after the training.</p> <p>The training was transferred and adapted to different educational and judicial contexts (e.g. schools, detention centres).</p> <p>The cost of the training varies depending on the different cost rates fixed by local authorities and the length of the particular version of the training (35 hours up to 63 hours) from €1842,- to €3315,-.</p> <p>At the moment the Denkzeit-Gesellschaft e.V. is negotiating with different organisations in Poland and Lithuania concerning the development and transfer of socio-culturally adapted versions of the training programmes.</p>
Geographical scope	Denkzeit Training programmes are currently implemented in the cities of Berlin and Hamburg (DE), and in several administrative districts of the Federal States of Niedersachsen, Hessen, Brandenburg and Mecklenburg-Vorpommern. It also has been implemented in the Federal States of Nordrhein-Westfalen, Baden-Württemberg and Bayern.
Start of the practice	The first Denkzeit Training programme was developed and implemented in September 1999.
Presented and discussed in RAN meeting	RAN P&P, 11 December 2013, Berlin (DE) RAN Derad, 16 January 2014, Berlin (DE)
Relation to other EC initiatives	None
Organisation	<i>Denkzeit-Gesellschaft e.V. is a registered Association (e.V.) and works on behalf of local public authorities in charge of authorising and financing sanctions within the scope of criminal laws relating to young offenders.</i>

Name of the practice	5.5.8 Digital Literacy
Description	<p>The project is designed to equip young people with skills to question the content they encounter online. We also enable young people to recognise some of the techniques that influence their ideas, opinions and real life behaviour. We do this by running workshops with young people, by giving teachers the tools and training they need to teach these skills in the classroom and by creating digital resources that educators can use.</p> <p>The resources at www.digitaldisruption.co.uk target the ‘digital native’ generation (11-19 year olds) who are often confident, but not competent Internet users. One in four young people do not make any checks at all when visiting a new website. Less than 1 in 10 ask who made the site and why. One third of young people believe that information generated by search engines must be true and 15 per cent base their opinions of a website on how it looks and feels to use. Digital Disruption seeks to equip young people with the skills they need, yet often lack, to be more discerning and savvy online.</p> <p>The focus on Digital Literacy as a means of preventing online radicalisation all stemmed from a project in the London borough of Tower Hamlets in 2009. The project set out to prevent young people from being radicalised in the borough. This was after it was learnt that extremist messages were recorded onto audiotapes and placed into the shoes of young Muslims whilst they were at prayer at a local mosque. The Young People we were working with didn’t engage well with us as outsiders playing devil’s advocate and trying to counter the radical views. On a collaborative journey with the group we diversified and broadened the focus of engagement to equip them with the skills to be more discerning instead of providing counter-narrative. An approach that taught them to recognise lies and manipulation instead of telling them what they should and shouldn’t believe. We started advocating that knowledge is power and we got them asking the question ‘who owns truth?’ It was this local project in Tower Hamlets where Digital Disruption was born.</p> <p>Gaining interest from the Nominet Trust in 2012, Digital Disruption got funded to take our work from a local to a national audience. We focussed on building more universally accessible resources in response to the key issues identified in the 2011 Demos report Truth, Lies and the Internet. Once the resources were produced Digital Disruption workshops were conducted with over 500 young people in London and around the UK. Insight and content from these sessions was gleaned to adapt and strengthen the digital resources. Bold Creative (parent company) provided expertise in youth communications and interactive design to ensure that Digital Disruption’s resources were relevant, fun and accessible for a young audience. Educators can use the different resources on their own or as an extended programme of work around source checking, deconstructing propaganda, conspiracy theories and more.</p> <p>Some of the resources, particularly those helping young people to understand, identify and deconstruct propaganda continue to get endorsed by organisations seeking to prevent online radicalisation. Think Tanks Demos and ISD, The UK’s Association of Chief Police Officers and the Youth Justice Board have all played a part in advocating our work. In 2013 Digital Disruption helped shape the</p>

	Danish Ministry's efforts to curb online radicalisation during 3 days of talks and workshops in Copenhagen. The outcomes helped influence increasing the prominence of Digital Literacy training in their national curriculum.
Approach	Educating young people Training for first line practitioners
Target audience	Youth/pupils/students Educators/academics First responders or practitioners
Deliverables	<p>Trust A4 cards containing logos and words that could be used on an offline opinion continuum exercise. Facilitator's would traditionally position on a scale from 'Strongly Trust' to 'Strongly Distrust' http://www.digitaldisruption.co.uk/wp-content/uploads/2013/05/trust-exercise-logos-web.pdf</p> <p>Propaganda 'This is propaganda' - intro video http://www.digitaldisruption.co.uk/the-vampire-conspiracy/category/this-is-propaganda/ 'The seven techniques of propaganda' - used to help deconstruct and discuss a piece of media that could be described as propaganda http://www.digitaldisruption.co.uk/the-vampire-conspiracy/category/propaganda-techniques/ The 7 propaganda technique animations - http://www.digitaldisruption.co.uk/teaching-tools/propaganda-techniques/</p> <p>Source Checking The Vampire Conspiracy http://www.digitaldisruption.co.uk/the-vampire-conspiracy/category/the-vampire-conspiracy/</p>
Evidence and evaluation	<p>Digital Disruption is currently seeking funding to run in a longitudinal study in partnership with Think Tank Demos to measure the effects of running our programmes of work in 3 schools against not running our work in 3 other schools. Until this quant study can be secured, we offer the following qualitative findings.</p> <p>PROFFESIONALS: DD has been featured in the Youth Justice Board's 'Best Practice library' (Speak to Anne-Marie Davis for more info) Endorsed and used in 'Internet Safety Toolkit for Practitioners' by the Association of Chief Police Officers (Speak to Barry Walsh for more info)</p> <p>YOUNG PEOPLE ON DIGITAL DISRUPTION'S RECENT 'CONSCIOUS CREATORS' PROJECT (demonstrating fun and engaging involvement with learning process):</p> <p>17/04/14: "Just wanted to say thanks so much for last night [the competition screening] and for all your support throughout the process. It really was one of the most fulfilling things I've ever been a part of. Hopefully speak to you soon.</p>

	<p>Best,” Roberta, Conscious Creator</p> <p>17/04/14: “Just wanted to say a big thanks for everything and being so involved and behind everyone! You did an amazing job and i feel honoured to have been apart of it all, thanks so much! And really hope there are similar projects in the future and would love to be involved... All the Best “ Ellis, Conscious Creator</p> <p>20/03/14: “Such a shame I won't be able to be part of the conclusion of the project but I just want to take this opportunity to say a huge thank you! I really enjoyed scrubbing up on my digital literacy with you guys and I learnt a lot. A fascinating and important project which I hope carries on. Great that it was flexible enough to allow people to have time to make the best film possible, just a shame that it hasn't worked out timing wise for me.” Steph, Conscious Creator (couldn't complete film due to availability after change in circumstances)</p> <p>An Interview with Digital Disruption: Amina (A project participant & winner of the Conscious Creator's competition) and her filmmaking interviewee took part in a short interview to share what they got out of the project. Access film at: https://vimeo.com/117741703</p> <p>Enter Password: ddcc2015</p>
Sustainability and transferability	<p>We consider the following to be transferrable (all of which costs are available on request):</p> <ul style="list-style-type: none"> ○ Talks and training for educators about our methodologies and how to use our digital tools in the classroom ○ Running training programmes directly with Young People ○ Converting our existing digital resources to be used in other languages ○ Creating new digital resources to be used in other contexts, for new ages and for evolving needs
Geographical scope	England, Scotland & Wales (UK)
Start of the practice	<p>Resources created and online at digitaldisruption.co.uk from Feb 2012 Sporadically run in schools for testing and training from April 2012 We continue training YP using the resources + training the trainers on request</p>
Presented and discussed in RAN meeting	RAN Prevent Education March 2015
Relation to other EC initiatives	Prevent

Name of the practice	5.5.9 Identity, Belonging and Extremism
Description	<p>The project “Identity, Belonging and Extremism” (IBE) is a media content based project that is delivered in schools. The project is tailor-made on the local needs and created in consultation with students and their needs. It focuses on both online (digital resilience) and offline engagement.</p> <p>The project seeks to engage students on issues relating to the online world with an offline engagement medium. The themes are generic but central to understanding radicalisation and extremism. It targets both mind-set and behaviour. The majority of extremist narratives offer three simple modes of engagement and understanding:</p> <ul style="list-style-type: none"> • A sense of Identity • A sense of belonging • A sense of loyalty/duty <p>I.B.E tackles these modes by discussing Racism, Islamism, Islamophobia, Stereotypes & Social Media. The project is able to exploit topics like:</p> <ul style="list-style-type: none"> • Isolation • Grievance • Anger • Lack of self-esteem • Lack of purpose • Lack of excitement and status <p>The project targets the visual, emotional and social reality of an individual, and offers an alternative that is based on individual reasoning and ‘group think’ behaviour. I.B.E attempts to counter this stimulus at both an emotional and intellectual level. It locates its narrative within the person and not the ‘problem’ or situation. In the project they show the person how they are in control of their response behaviour as opposed to the situation. It seeks to engender critical thought into the process of how actions affect the person. It works because we deliver it with openness and a personal context. We tell a story, about disability, stigma, bullying, expectations, norms, values, extremism, choices, situations and solutions. We let the students engage their own minds and then think about how they use them.</p>
Approach	Educating young people Community engagement/empowerment
Target audience	Youth/pupils/students Local Community Organisations/NGOs First responders or practitioners
Deliverables	Training Schools Engagement and Delivery Media Content and communications Research and Evaluation
Evidence and evaluation	Our main project has been part of a RAN evaluation and the I.B.E project has been recognised as best practice according to UK Home Office for its user driven focus and engagement. Over 500 students engaged across Years 9, 10 & 11 (13-16 age range).

Sustainability and transferability	Fida Management provides consultancy on the basis of formal agreement of services on a needs led basis.
Geographical scope	UK/EU/International
Start of the practice	January 2008
Presented and discussed in RAN meeting	RAN @ working group and RAN High Level Conference.
Relation to other EC initiatives	None
Organisation	<p><i>Fida Management is a non-governmental organisation based in the UK. They provide Basic and Enhanced training for frontline staff within local and central agencies on issues of radicalisation, models of intervention, ideology, counter-narrative and safeguarding.</i></p> <p><i>Fida Management also conducts research and community engagement activities as well creating and delivering innovative Schools projects using media tools. Fida Management creates and delivers a range of strategic and operational communication products that are now examples of good practice globally.</i></p>
Country of origin	United Kingdom
Contact details	enquiries@fidamanagement.com

Name of the practice	5.5.10 <i>Jewish Informal Education</i>
Description	<p>A non-profit organisation established in 2002, Haver Foundation stands with individuals and educational organisations and institutions - mostly high schools and universities - to promote a diverse and inclusive society in Hungary. Haver works to combat prejudice, discrimination and right wing extremism and to promote social cohesion through dialogue, training, education and advocacy.</p> <p>The Haver Foundation team has developed educational modules adapted for three main target groups - young people (aged 14-18), university students (19 - 25) and educators - complementing their broader anti-prejudice diversity educational programs, these modules focus on some of the specific cultural, religious and social issues that confront Hungarian society today. Through dialog, informal education, critical and constructive thinking and creating a debate culture and conflict resolution, Haver works towards a voluntary process of attitude change.</p> <p>The educators are between the ages of 18 and 28, volunteers from Jewish and non-Jewish backgrounds. Haver has numerous local and international partnerships with schools, NGO's, museums, professional networks etc.</p> <p>Methodological approach - the Haver way of informal education</p> <p>One of the cornerstones of Haver's theoretical framework concerning their specific methodology was provided by Barry Chazan in December 2002. He defines some characteristics of informal Jewish education which can also be recognized in Haver's approaches and principles.</p> <p>First of all this type of methodology calls for a holistic educator who does not only focus on the distribution of knowledge but above all concentrates on the workshop participants and their personal growth and individual development. A Haver educator is not a teacher but a facilitator of learning. His or her role is to distribute a deeper understanding of what it means to be Jewish and to instigate (unconscious) processes of critical thinking and reflection. To do so the learning process demands "the active engagement of a person with all his/her senses so that the learning comes from within rather than being imposed from without". A facilitator working with Haver has to refrain from authoritative approaches as his or her behaviour already influences the learners in an informal way. The educator has to become a role model of a democratic, respectful and critical debate culture. The informal education process is based on two main pillars. First on the group experience which is considered to be an important factor in the learning process as especially young people are strongly influenced by either their peer groups or the collectives they adhere to. The latter is already the second pillar - the complex issue of personal and group identities. By discussing and distributing knowledge about Jewish identities Haver's facilitators try to engage the learners intellectually and to make them question their own set of identity constructions especially in regard of out-group formations and definition of "the other" (or "the Jews").</p> <p>Haver's special educational methodology is triangulating three core approaches to education in order to motivate the students to move from the traditional educational goal of knowledge acquisition ("I know") to the universal aim of self-directed learning ("I want to</p>

	<p>know”). These three elements are:</p> <ol style="list-style-type: none"> 1. knowledge and information 2. skills and competencies 3. attitudes <p>Haver’s workshops focus only a little on the mere distribution of knowledge but rather aim at stimulating critical thinking and the questioning of the already acquired knowledge. After this basic step the focus is shifted to the acquisition of social skills and competencies to foster an interpersonal dialogue and to achieve a debate culture which ensures the equality of all participants and mutual respect. After this second step is assured, the learners are supposed to reflect upon their value systems and to discuss them critically. This last process of Haver’s methodological approach aims finally at changing attitudes towards minority groups in general and towards “the Jews” in particular in an informal way. The definite impact the activities have on the last level cannot be measured as the changing of attitudes is a long-term process and Haver’s facilitators usually only have some 90 minutes to ignite this process. The outcome is however up to the individual.</p>
Approach	Educating young people
Target audience	Youth/pupils/students
Deliverables	Haver produced a number of handbooks and a variety of educational material. Including short videos (on website) and a publication for tolerance education in high schools.
Evidence and evaluation	Evaluation is mostly done with qualitative methods. There is continuous feedback from pupils and educators, especially at schools that we visit annually.
Sustainability and transferability	The methods of Haver were successfully transferred to organisations working with prejudice towards Romani and Migrant peoples. Uccu Foundation was started as a project of Haver. (uccualapitvany.hu)
Geographical scope	Hungary
Start of the practice	2002
Presented and discussed in RAN meeting	2013 June, Berlin, RAN Prevent
Organisation	<i>Haver Informal Jewish Educational Public Benefit Foundation</i>
Country of origin	Hungary

Name of the practice	5.5.11 IC Thinking
Description	<p>Researchers from the University of Cambridge (Savage, Boyd-MacMillan, Liht) have developed the theory, application and assessment for IC interventions. Social, emotional, political pressures can lead to ‘tunnel vision’ - an over- simplification in values, thinking, and identity that makes young people vulnerable to the black and white thinking of extremists. IC interventions leverage a change in mind-set through broadening values, thinking, and social identity complexity through action-learning, group exercises, and multi-media materials. Courses are usually 16 contact hours, delivered flexibly as required, led by a trained facilitator, involve multi-media and experiential and group learning.</p> <p>The intervention is tested for effectiveness via measuring integrative complexity (IC) pre and post course delivery. 5 years of strong cross-cultural empirical findings show increased critical, complex thinking post intervention, predicting a reduction in and prevention of extremism and inter-group conflict.</p> <p>For example, Being Muslim Being British explores hot issues facing young Muslims today through DVDs, booklets and facilitator-led group activities. The aim of the course is to enable young people to think in a new way - with higher levels of Integrative Complexity (IC for short). IC is a core life skill for all people living in multi-cultural Britain today.</p> <p>IC is fun to learn through group activities and DVDs. IC means participants remain committed to their own values and faith, yet become able to engage with other views to find common values and win/win solutions and to appreciate the best aspects of different viewpoints.</p> <p>IC involves:</p> <ul style="list-style-type: none"> - Knowing your own mind, your own values and beliefs - Branching out in your thinking so that you actively listen to other viewpoints - Weaving together the best of different viewpoints into win/win solutions concerning complex life issues. <p>The core framework of the course is based on cognitive psychology, social psychology and social neuroscience. We have worked collaboratively with a wide range of Muslim leaders to develop the Being Muslim Being British course, and we continue to invite feedback from Muslim leaders representing the array of theological positions present in Islam today. The course is theologically friendly, without being theologically driven.</p> <p>Approach: Participative series of workshops and multi-media educational materials that leverage change to extremist mind-sets, developing critical thinking skills, citizenship identity and values pluralism, based on academically accepted methods to raise participants’ ability to think in an integration wise complex way, which is a non-fakable measure of the structure of thinking (Suedfeld et al 2006) that predicts peaceful resolution of intergroup conflict and extremisms. The intervention is tested for effectiveness via measuring integrative complexity (IC) pre and post course delivery. 5 years of strong cross-</p>

	<p>cultural empirical findings show increased critical, complex thinking post intervention, predicting a reduction in and prevention of extremism and inter-group conflict.</p> <p>3 different target audiences:</p> <p>a) For those vulnerable to specific extremisms or sectarian conflicts. Audience of both sexes, age range 11 years - adult, either those considered to be potentially vulnerable or those working/mentoring the above groups. These IC courses, such as Being Muslim Being British, can be run in communities, schools, mosques, prisons.</p> <p>b) School students - for all extremisms and intergroup conflicts (in development), ages 9 - 18 years, for citizenship skills, critical thinking abilities, broad-based prevention of extremism based on social neuroscience, using interactive games and teacher-led learning.</p> <p>c) Young children ages 5-8. 'Storybook IC' is being piloted in South Africa and prepares young children to develop IC through developing empathy and social/emotional intelligence.</p>
Approach	Educating young people
Target audience	Youth/pupils/students Educators/academics First responders or practitioners
Deliverables	The practice has led to widely used products (course materials include DVDs, Facilitators Guide and Participant handouts) with evidenced results that are both statistical and qualitative. Certificated Facilitator Training is available to enable prevention providers to run the IC course appropriate for their context. A streamlined assessment method is taught to facilitators to ensure ongoing quality assurance.
Evidence and evaluation	<p>Published empirical articles in the Journal of Strategic Security:</p> <p>Being Muslim Being British - http://scholarcommons.usf.edu/jss/vol6/iss4/3/ Being Kenyan Being Muslim - http://scholarcommons.usf.edu/jss/vol7/iss3/2/</p> <p>See list of further 22 publications on IC interventions on: https://sites.google.com/site/icthinking/research-base/icthinking-research-group-publications</p> <p>Empirical results show statistically significant increases in complex critical thinking in regard to extremism. Before an IC course, participants perceive social groups relevant to extremism in black and white, 'us versus them' categories, judging from a single evaluative viewpoint, rejecting other viewpoints. After the course, based on participants' written data, participants no longer see the social world in black and white, there is tolerance for ambiguity, and respect for others' differing viewpoints.</p> <p>This represents a change in thinking that predicts diminishment of violent conflict: the black and white, conflict provoking structure of the extremist worldview is dissolving. Gains in IC predict promote conflict resolution across 4 decades of Suedfeld and colleague's</p>

	<p>integrative complexity cross-cultural research.</p> <p>Participant presentations (given orally) show ability to perceive validity in different viewpoints (differentiation) along with increased empathy, control of emotions, and an increase in confidence in applying the skills IC to address grievances and overcoming the persuasiveness of the extremist narrative.</p> <p>There are significant changes in how participants resolve conflict showing greater confidence in addressing conflict, and greater flexibility in being able to balance the importance of the issue with the relationships involved.</p> <p>IC courses enable new friendship networks to develop, and participants can go on to becoming Ambassadors for IC and Helpers or Facilitators, through receiving further (certificated) training. A Certificate of Completion for this University of Cambridge developed course is awarded.</p> <p>Independent teacher observation of outcomes in schools show: decreases in exclusions and detentions, improved interpersonal behaviour (e.g. desisting from gangs, self-harm, etc.), improved educational achievement.</p>
<p>Sustainability and transferability</p>	<p>Short description on the sustainability and transferability of the practice, including e.g. information on the cost of practice. Please note the criteria that basic elements of the practice must be transferrable to other (local) contexts</p> <p>Transferability</p> <p>IC Thinking has developed, run and successfully assessed IC courses for vulnerable individuals with different levels of education (with barely literate excluded young teenagers in a Class D residential unit to unemployed middle aged men, to postgraduates University students). Using different educational approaches suitable for age groups, IC can be taught to the full age range from ages five through adulthood.</p> <p>IC works cross-culturally (England, Scotland, Europe, Kenya etc.) but always requires advance re-development for cultural contextualization.</p> <p>IC works for a range of extremisms, sectarian and intergroup conflicts. IC can be used in one-to-one mentoring, but is usually run as a group intervention in order to harness the social processes involved in extremism.</p> <p>We are planning to develop Internet based IC training, using interactive games. These will also become part of schools curriculum materials.</p> <p>IC courses have been successfully taught in schools, community groups, youth groups, colleges, universities, prisons, mosques, churches, theological seminaries (Christian, Jewish).</p> <p>IC facilitator training has been given to a range of prevention specialists including police, youth leaders, social workers, prevention workers, religious leaders, teachers, counsellors, professional mediators.</p> <p>Sustainability</p> <p>Sustainability working mainly with community groups and community-based facilitators faces challenges, and requires government support. With the urgent need to scale up given the increasing expansion of extremisms, and the opportunity (in the UK, provided by the new</p>

	<p>2014-2015 legislation for CVE in schools, we are now focusing on schools as places with the needed infrastructure, trained professionals (e.g. teachers and other educationalists) accustomed to ongoing professional development, monitoring and empirical assessment, long term participants (ages 5-18), and ability to reach to all groups in society. Extremism is not just the property of a problematic social group, rather it is a synergistic dynamic that needs a society-wide prevention approach. The larger numbers that can be reached through schools will enable larger budgets for research and development of IT supported curriculum materials, and this enables further dissemination through the Internet. Schools will enable longitudinal and control group studies. We already have independent observation of the positive benefit to students' behaviour and educational achievement resulting from an IC intervention run in schools. We also are planning to work in prisons, for the reasons above, and have had several successful pilots in prisons.</p> <p>Costs A single course run of an already developed and validated 16 contact hour IC intervention usually costs around £6000 in the UK (where travel and venue costs are kept to a minimum). This normally includes subsequent facilitator training (to appropriate professionals who have already participated in the course run) to give the first course run sustainability. To this, assessment costs need to be added. Assessment costs vary. Streamlined quality assurance adds around £1000 to the overall cost, whereas foundational new research for a new IC intervention adds at least £15,000 to the cost of the intervention. The development, production, running and assessment of a new IC intervention requires a relatively large research grant involving several researchers.</p>
Geographical scope	Practice and research developed and delivered across UK, Europe, Kenya, Bangladesh (with pilots in South Africa and Pakistan forthcoming 2015)
Start of the practice	Research from 2004 onwards led to the Dec 2007 - June 2010 - action research project - Being Muslim Being British - funded by the European Commission (Justice and Security Directorate). Since then, IC Thinking® interventions and research have continued to be delivered and empirically assessed cross-culturally, for different extremisms, sectarianism and intergroup conflicts, supported by a range of publications.
Presented and discussed in RAN meeting	Discussed and recommended in RAN Prevent meetings, specifically Barcelona 'education' event 26th/27th June 2014
Relation to other EC initiatives	Previously - European Commission Action Grant 2007-2010 to address radicalisation; we plan to submit future applications, for example, through Horizon 2020.
Organisation	<p><i>IC Thinking (Cambridge) Ltd, a social enterprise company licensed through Cambridge Enterprise, University of Cambridge. Previously contracted to EC funded project EPAREX, Ealing London.</i></p> <p><i>IC Thinking researchers are based at the Department of Psychology, University of Cambridge.</i></p>

Name of the practice	5.5.12 Derad theatre-therapy workshop
Description	The aim of the Megálló Group Foundation for Addicts' de-radicalisation work is developed to prevent youngsters from violent extremism and to teach them how to express their opinion in an acceptable way. The main method of Megálló's de-radicalisation work is based on theatre-therapy, using drama-pedagogy elements as well as psychodrama exercises. The youngsters at risk take part in the theatre-therapy workshops on a regular basis, normally twice a week. The participants in the workshop are mainly young people with different addiction problems that usually have low self-confidence without the use of drugs.
Approach	Educating young people Training for first line practitioners
Target audience	Youth/pupils/students First responders or practitioners Families
Deliverables	Megálló has a "drama and therapy" course which is taught at the ELTE University (Faculty of Special Education).
Evidence and evaluation	We had an evaluation with the participants of the TESYA® workshop. In this workshop young people were trained in anger management and conflict management.
Sustainability and transferability	We have wide partner-building activities at national and international level, mainly with treatment centres and drop-in centres for drug addicted people, where we also share our experiences about derad work. We also cooperate with Foresee Research Group in Budapest.
Geographical scope	Budapest (HU), North-Hungary (Salgótarján).
Start of the practice	March 2010
Presented and discussed in RAN meeting	RAN Derad, 9-11 October 2012, Barcelona RAN Derad, 3-4 December 2014, Warsaw
Relation to other EC initiatives	Member of ENoD (European Network of De-radicalisation)
Organisation	<i>The Megálló Group Foundation for Addicts is a non-governmental organisation (NGO), established 15 years ago. Megálló's programs are implemented for and by alcohol, drug or other substance-addicted young people. They work with the victims of stigmatisation, usually young people who are designated as strange or deviant because of their diversity or disease, who dropped out from their families, communities and the environment that surrounded them, or those disadvantaged young people who are about to lose the game called life. Megálló is an organisation of help and self-help. With group work they help young people with any kind of addiction problem. The decisions and deeds of its helpers must show the attitude of serving and humility, the sober values based on self examination, a personal guide.</i>
Country of origin	Hungary

------------------------	---

Name of the practice	5.5.13 Never Again Association
Description	<p>The Never Again Association is a Polish and Eastern European anti-racist organisation. The mission of the Never Again Association is to promote multicultural understanding and to contribute to the development of a democratic civil society in Poland and in the broader region of Central and Eastern Europe. Never Again is particularly concerned with the problem of education against racial and ethnic prejudices among the young.</p> <p>Activities of Never Again include:</p> <ul style="list-style-type: none"> - Social campaigning and educational programmes. - Monitoring and publishing data on racist incidents and other xenophobic crimes committed in Poland as well as sharing information and analysis on hate crime and extremist and racist groups operating in Poland and in the rest of Europe. - Sharing expertise and cooperating with researchers, media, policy makers, national and international organisations. - Running of the 'Delete Racism' project to combat racism and anti-Semitism on the Internet and conducting high-profile educational campaigns in the field of popular culture, 'Music Against Racism' and 'Let's Kick Racism out of the Stadiums'. - UEFA EURO 2012 'Respect Diversity - Football Unites' programme: major educational and awareness-raising activities that took place before and during the European Football Championships in Poland and Ukraine. <p>The Never Again practitioners come from various professional backgrounds as political and social studies, social work, legal, educational. A particularly promising aspect of the Never Again approach is combining work on many different levels - international networking alongside domestic and local projects, integration of football work and general societal work, collaborating simultaneously with other NGOs, risk groups, policy makers and practitioners, as well as with local and national authorities. Such approach combined with Never Again's broad network of volunteers across the whole country and the region enables the Association to diagnose and respond quickly to any issues that may come up within the scope of its work.</p> <p>At present, Never Again is approaching the field of prison work and has already become a reference point for those involved in de-radicalisation work. The Association provides help with regards to carrying out first-line work, as well as advises on how to approach and deal with extremists and hate crime offenders. The Association also broadly promotes implementation of best practices regarding both combating racism and hate crime, as well as promoting a positive, inclusive public discourse on multiculturalism and diversity.</p>
Approach	Educating young people
Target audience	Youth/pupils/students Local Community Organisations/NGOs
Deliverables	Since 1994 Never Again has produced a regular publication in the form of the Never Again (Nigdy Więcej) magazine, providing reliable information and in-depth analysis on hate crime and on extremist and racist groups operating in Poland and in the rest of Europe.

Sustainability and transferability	Never Again's successful work over the years contributed to the organisation's strong position and nation-wide recognition within various groups. On several occasions Never Again has been approached by far-right extremists who wished to change their lives and leave their subculture's structures. The Never Again Association provided support and assisted them through the process of rehabilitation. Such experiences formed the basis of case studies presented in the Never Again magazine, which undoubtedly serves as both an educational resource and an inspiration.
Geographical scope	Never Again works nation-wide in Poland and in the region of Eastern and Central Europe in delivering educational programs for teachers, police, state prosecutors, community workers and students on how to deal with racism and hate crime, and how to prevent them.
Start of the practice	1996
Presented and discussed in RAN meeting	Several RAN Derad, RAN Prevent and RAN POL meetings
Relation to other EC initiatives	None
Organisation	<i>The Never Again Association is a non-governmental organisation (NGO) that works in awareness raising, research, monitoring of racist and hate crime incidents and, on some recent occasions, carried out educational and awareness raising projects involving participation of inmates and football supporters. These young people are inclined to engage in violence, in racist, aggressively nationalist, and xenophobic behaviour, are prone to manipulation and their behaviour escalates easily.</i>
Country of origin	Poland

Name of the practice	5.5.14 Democracy Factory/Fortress of Democracy
Description	<p>Interactive exhibition on democratic citizenship for children and youngsters</p> <p>The Democracy Factory is an interactive exhibition where visitors work hands-on in lively surroundings. Visitors are confronted with challenges and have to exchange opinions and have discussions in order to complete their visit. The Factory consists of twelve galvanised steel modules on wheels, connected with pipes to lead electricity. When students work in the factory, they produce factory sounds with the devices and machines. About 50 assignments are constructed in these modules on lots of devices and machines. During the week, children and youngsters visit the exhibition as part of their school activities.</p> <p>After school hours and in weekends, adults are also welcomed in the context of adult education, parent conferences of neighbourhood meetings.</p> <p>The exhibition has three main learning levels for student of different schools and grades. These levels vary in complexity and length. Students work in pairs and follow a course according to a small booklet or digital device that guides them along all assignments and questions. This booklet or device also functions as a notebook to write down answers and opinions, each student has their own notebook. The exhibition has a solid structure and is based on self-directed learning. Students work at their own pace in their specific learning level and guide themselves through the exhibition. In the exhibition, only one or two instructors are present for a group of thirty students and their teacher. The instructors host the students and are trained to provide guidance if required by the students.</p> <p>At first sight, the interactive exhibitions address all kinds of social problems, but soon the visitors will discover that the themes and missions all concern themselves. They will dive into a dialogue about their own world views, doubts, opinions, prejudices and ambitions. Most of the assignments in the exhibition entail a self-correcting mechanism. For instance, there is an assignment in which students make distinctions between democracy and dictatorship by assigning blocks with characteristics to the right category. When done right, the stacks of blocks should reach the same height, so students are able to check their answers. Concerning opinions, students can find feedback on several assignments. For example in an assignment on freedom of speech, during the process of forming an opinion on six statements, students are brought to doubt with contra information to stimulate discussion. After the assignment, students can find feedback on their choices such as: “For you freedom is very important, you don’t like rules. You decide for yourself what is best for you”.</p> <p>After making the assignments, students receive a certificate with feedback on their opinions. Students with a booklet enter about twenty answers and observations in an Internet application to base the feedback on and students with a tablet press a button to receive it on screen. The certificate is compiled from about 600 standard lines</p>

	<p>in an application. The certificate gives only feedback on opinions and has a non-moralistic approach based on wide accepted constitutional law principles. Not seldom, there are students who visit the exhibition that support sharia law and embrace the opinion that homosexuality should be punished. In their certificate they can read: “You can have this opinion, but it is not accepted to punish homosexuals in our country, they can freely live their lives as they wish”. Most students appreciate the feedback and put it in their graduate portfolio to prove their work in the Factory.</p> <p>During our own experiences in several countries with different museums and educational institutions, we learned a lot from the students and teachers that worked in our exhibitions and were prepared to share their feedback. They showed us that serious social dilemmas can be discussed and that learning can be exciting and fun. The following are characteristics of our approach: the interactive methodology.</p> <p>The interactive methodology:</p> <ul style="list-style-type: none"> - Contains different learning concepts as an answer to diversity and different learning styles. - Includes value clarification and communication instead of moralistic approach. - Offers innovative means of self directed learning. - Presents social problems as a challenge for all people. - Can be implemented to different means like traveling exhibitions, table exhibitions and educational software. - Includes a process evaluation with clear and transparent and SMART designed objectives. - Uses the target group as a source and takes themes from local context. <p>The students:</p> <ul style="list-style-type: none"> - Experience learning as a pleasure. - Can handle facts and opinions. - Are able to deal with sensitive issues and prejudices. - Improve their attitude towards the scapegoat phenomenon. - Learn effective by interaction with peers. - Can mention perspectives of peace and democracy in daily context. - Like learning by doing. - Clarify and communicate social values. - Exercise multi - intelligence Tools. - Can start from various learning styles. - Experience themselves as a part of social problem as well as a part of the solution. <p>The teachers:</p> <ul style="list-style-type: none"> - Are mediators and partners in learning. - Co-operate in exploration instead of transforming information. - Like to teach pupils that find learning a pleasure. - Educate children to think by themselves. - Communicate and clarify social values. - Experience more satisfaction in their profession. - Mention that the learning process has a positive effect on social context.
Approach	Educating young people

Target audience	Youth/pupils/students Educators/academics
Deliverables	<p>Each exhibition has its own deliverables:</p> <ul style="list-style-type: none"> - Blue print texts - Blue print design - guide book or device (tablet) for visitors - teachers manual - Internet application certificate - printed certificate - brochure and campaigning material - facility script for organizing local groups - interactive exhibition
Evidence and evaluation	<p>The interactive methodology is thoroughly tested in the travelling exhibitions by peer reviews and process evaluation, which means that assignments in the development and design process are tested with the target groups as a source. We also have carries out quite a few qualitative and image evaluations. Throughout the years all monitoring reports from different countries were implemented in new projects.</p> <p>In spring 2011 a statistical investigation was performed in the Fortress of Democracy in Utrecht by the Social Psychology department of the Amsterdam University. In this investigation, with a pre and post measure group, is shown that young people in general, aged 16 - 18 years in Vocational Training Colleges, gain more knowledge about democracy and realize more democratic opinions. It is remarkable that young male visitors learn more that the young women. The young women enter the exhibition with a higher level of democratic awareness, which is understandable from the perspective of social and psychological maturity of young women in general. It is interesting that the young men leave the program on the same level as young women. Young men catch up finally and show less radical opinions and views.</p> <p>One year later a new statistical research project was launched in the same exhibition to investigate the confidence in democracy of students who belong at a minority of majority group. We learned that the exhibition strengthened the confidence in democracy more in the minority group.</p> <p>The outcomes cannot be generalized to other exhibitions, although we can affirm these outcomes with a quantitative research of the learning effects of the Democracy Factory, which shows a tendency that young people 14-16 leave the exhibition with more nuanced opinions than they exposed before visiting the project. An article will be published in Mai 2015.</p> <p>The aim of the exhibition is dialogue, social cohesion and is particularly made for young people who are at the first stages of radicalisation in which they indignant of injustice of doubt democracy to realize ideals. The exhibition is rather an effective preventive educational means.</p> <p>Fortress of Democracy (2007) was evaluated by the Amsterdam University, dept. Social Psychology in 2011 and 2012 by students supervised by Prof Bertjan Doosje who published quite some articles in the field of (de-) radicalisation.</p> <p>Democracy Factory (2014) was evaluated in cooperation with</p>

	researcher of Groningen University (will be published Mai 2015)
Sustainability and transferability	<p>The interactive mobile exhibitions are quite sustainable, travel from village to city every 3 or 4 weeks, installed in community houses, schools, churches and sport facilities and are produced for at least 5 years. An exhibition will welcome about 500 visitors a week and about 25.000 a year. Some exhibitions, like Fabrique de la Paix (2007), are still travelling through France. The interactive methodology is easy to transfer, but crucial for the success of the exhibition.</p> <p>There are several options to transfer the contents and methodology, depending the context and demands of specific countries.</p> <p>With a lot of intensive cooperation between partners of different countries, we are able to develop and produce a complete project in the Netherlands, including Internet applications, blue prints, teachers manual etc. Including shipping and deliverance. The costs are about €140.000,- depending the time schedule of the project, the amount of new assignments and specific demands.</p> <p>On at less intensive level of cooperation, the contents and methodology of a new interactive exhibition is transferred and elaborated and/or developed with another partner for about 40-45 assignments. The project will be designed and produced in the country of the partners themselves. The costs in this case are about €15.000,- including the copyrights and consultancy, also depending on the same conditions as above.</p>
Geographical scope	Peace Education Projects produced about 25 permanent and travelling interactive exhibitions in the Netherlands and about 10 European countries, including Russia and Israel. Some by own initiative but mainly in cooperation with museums and educational institutions, like Olympic Museum Lausanne (Hope Factory 2010), Ligue de l'Enseignement Paris (Fabrique de la Paix 2007), BELvue Museum Brussels (Democracy Factory 2012), Prodemos The Hague (Democracy LAB 2013) and Museum Rotterdam '40'45 (BYC Build Your City 2015).
Start of the practice	Fabrique de la Paix (2007), Fortress of Democracy (2008), Democracy Factory Belgium - Fr/NL (2009), Hope Factory Switzerland (2011), Democracy Factory NL (2014) Other exhibitions and workbooks were developed and produced in the last ten years and all based on monitoring and chain evaluation.
Presented and discussed in RAN meeting	<p>The Fortress of Democracy was presented in one of the sessions of RAN-VVT, Madrid 6-7 June 2013: The Voice of Victims on schools: a variety from personal engagement to part of an educational program.</p> <p>The Democracy Factory was also part of one of a break-out sessions on the Cities Conference on Foreign Fighters to Syria 29 -3 January The Hague, The Netherlands.</p>
Relation to other EC initiatives	Peace Education takes part in IMPACT to share some scientific effect evaluation research of Democracy Factory (spring 2015). Other European networks are informal and based on cooperation (Youth in Action, Erasmus, EAC)
Organisation	<i>Foundation Peace Education Projects is a NGO and its mission is to develop and produce educational projects like exhibitions, workbooks, films etc., based on an interactive methodology in the field of peace, diversity, democracy, conflict resolution and</i>

	<p><i>international cooperation.</i></p> <p><i>The Foundation has a small staff, about 15 dedicated freelance workers and about 100 volunteers. The offices and permanent exhibitions are located on two former military fortresses in Utrecht. Besides various mobile exhibitions are on tour through the Netherlands and Belgium (bilingual).</i></p> <p><i>The Foundation works project based and is funded by various sources, including private sponsoring and European Funds.</i></p>
Country of origin	The Netherlands

Name of the practice	5.5.15 THINK! 4 Peace
Description	An intensive programme for reducing vulnerability and increasing resilience to radicalisation, delivered over a matter of months to cohorts of 12-15 14-19 year olds. The approach includes one-to-one initial and exit interviews, continuous self-directed study and social media interaction with project team. Two intensive three-day residential components form the core delivery element. This tailored programme involves: interaction with speakers from trained panels of experts, survivors and formers; long- and short-form multimedia exposure; simulations and role-play; interrogation of views (not each other); highly participatory and kinaesthetic learning sessions; and the exploration of (social) media narratives, stimulating the creation of autonomous counter/alter-narratives on the part of the young people themselves. THINK! uses such tried-and-tested non-formal learning elements to: cultivate critical thinking skills, including self- and other-awareness; build capability to identify and manage conflicts related to violent extremism; increase awareness of extremism and how to think critically about narratives that condone it. Graduates enter a network of young leaders, where they can pursue personalised, constructive and peaceful alternatives for effecting change.
Approach	Educating young people Delivering alternative narratives
Target audience	Youth/pupils/students Educators/academics Formers
Evidence and evaluation	One-to-one participant baseline and summative semi-structured interviews, recorded and assessed as a supplement to standardised self-assessment psychometrics on conflict and self-awareness, as well as bespoke interactive, in-course participant assessments. Referring school reports and comments are also incorporated into the overall assessment of impact.
Sustainability and transferability	Single-cohort delivery costs approximately €14.000,-. By having the residential element as the central, intensive component, THINK! can reach nationally while being commissioned by local authorities and networks of schools.
Geographical scope	North West England
Start of the practice	December 2013
Presented and discussed in RAN meeting	RAN Prevent, June 2014, Barcelona (ES) RAN Prevent, 3-4 March 2015, Manchester (UK)
Relation to other EC initiatives	None
Organisation	<i>The Tim Parry Johnathan Ball Foundation for Peace is a UK-registered charity and limited company. The approach is commissioned by local authorities.</i>
Country of origin	United Kingdom

------------------------	---

Name of the practice	5.5.16 How do we want to live
Description	<p>Peer-workshops based on educational films “How do we want to live? Workshops on Islam, anti-Muslim racism, Islamism and democracy”. The workshops are based on five educational films dealing with questions of Islam, racism, Islamism and democracy. They encourage debates about religious concerns of youngsters in heterogeneous teaching environments and provide space to reflect about questions of norms, values, identity and participation. As interventions prior to and in early stages of radicalisation, they aim at fostering an identification as German Muslims.</p> <p>The workshops are conducted by peers (who themselves have a Muslim background) and allow quick, short term interventions (generally 3* 90min) to topics that arise in schools or social centres. The films and workshops explicitly do not follow a religious argumentation; instead, they take up religious concerns as starting points for discussion and translate them into general questions about social norms and values.</p>
Approach	Educating young people
Target audience	Youth/pupils/students
Deliverables	The workshops are based on the film package “Wie wollen wir leben? Filme und Methoden für die pädagogische Praxis zu Islam, Islamfeindlichkeit, Islamismus und Demokratie” that includes five educational films and a comprehensive collection of educational methods for use in schools and social centers.
Evidence and evaluation	Over the last four years, we have conducted over 450 workshops in several German cities. The overall feedback of pupils and teachers/social workers has been very favourable. The film package has been distributed in over 2000 copies and has been adopted in a film project of the Federal Program of Crime Prevention.
Sustainability and transferability	The workshops have been adopted in several cities (Berlin, Hamburg, Essen, Bremen, Frankfurt) and conducted autonomously by individual teachers and social workers throughout the country. The costs are limited to the trainings of the peers and their honorarium for the respective workshops session. The costs for project coordination are currently covered by government grants.
Geographical scope	Germany
Start of the practice	The project started in Oct. 2010
Presented and discussed in RAN meeting	Collaborators of the project have participated in the RAN AG Prevent meeting in Prague, 13/14 Feb 2014, and discussed the practice in this meeting.
Relation to other EC initiatives	Member of ENoD (European Network of De-radicalisation)
Organisation	<p><i>Ufuq.de - Jugendkultur, Medien und politische Bildung in der Einwanderungsgesellschaft</i></p> <p><i>Ufuq.de is a Germany-based NGO and receives financial support through various government, EU and private grants.</i></p>

	<p><i>Ufuq.de operates at the intersection of education, academia and public debate. It works primarily with youngsters of Muslim and/or immigrant background and aims at fostering a sense of belonging and empowering them against phenomena of Islamism and ethnic-nationalist ideologies.</i></p> <p><i>In addition, ufuq.de organizes trainings and conferences for educators and civil servants about youth cultures, Islam and Muslims in Germany, and prevent work in local communities and educational institutions.</i></p> <p><i>Ufuq.de regularly publishes educational material and scientific papers to inform a broader public about questions related to Islam and migration in Germany.</i> <i>The workshops and educational films have been developed in cooperation with the University of Applied Sciences Hamburg.</i></p>
Country of origin	Germany

Name of the practice	5.5.17 MAXIME Berlin
Description	<p>The intention of the project MAXIME Berlin <i>Intercultural and Interreligious Prevention</i> is to prevent (further) disintegration and radicalisation of vulnerable youth, to support multipliers to recognize radicalized attitudes and to deal with such, to establish an ability of interreligious and intercultural dialogue and to reduce prejudices and fears in the majority society.</p> <p>Approach Within schools and in the youth welfare service the frequency of interreligious and intercultural conflicts is increasing. The preventive community programme offers workshops - conducted by intercultural respectively interreligious tandem teams - who pick up topics such as the theological base of Islam, religious everyday practice, Islam and human rights and the Middle East conflict. Other topics are:</p> <ul style="list-style-type: none"> • traditionalism and concepts of honour as well as gender roles in Islam • opportunities of participation in the German society • different currents of Islam and their cultural and historical backgrounds • religious fanaticism and Salafism <p>Furthermore, organised field trips to the Jewish Museum, the Genezareth Church and the Sehitlik Mosque in Berlin are offered. Besides this, the programme includes training for multipliers and individual trainings for youth at risk.</p>
Approach	Educating young people
Target audience	Youth/pupils/students Educators/academics Local Community Organisations/NGOs
Deliverables	Handbook for working with youth at risk to become radicalised towards religious extremism.
Evidence and evaluation	<p>The precursor project MAXIME Wedding, which has implemented and applied at first the practice of intercultural/interreligious prevention has been externally evaluated in 2013. The evaluation included empiric figures about the impact of the workshops on the youths which were drawn out of feedback interviews with the youths and the teachers.</p> <p>All evaluations can be downloaded on the Violence Prevention Network's website.</p>
Sustainability and transferability	The practice has been transferred to Hesse where intercultural/interreligious prevention is taking place within the project Advice Centre Hesse.
Geographical scope	Berlin (DE)
Start of the practice	MAXIME Berlin - Intercultural and Interreligious Prevention was implemented in December 2010 as MAXIME Wedding.
Presented and discussed in RAN meeting	RAN Derad, 9-10 October 2012, Barcelona

Relation to other EC initiatives	Initiator and founder member of ENoD (European Network of De-radicalisation). Member of Advisory Board of Impact Europe.
Organisation	<i>The NGO Violence Prevention Network is a group of experienced specialists with many years of experience in the fields of prevention of extremism and de-radicalisation. Various federal ministries, state-level justice departments, state-level and national security agencies and institutional partners have worked closely with the association from its inception and value the group's high degree of knowledge, competency and outstanding reputation. The main focus of Violence Prevention Network is to work directly with radicalized people at different stages of radicalisation. The aim is to support them in developing distance to inhuman ideologies and violent behaviour. The organisation's projects have been or are financed by institutional, regional, federal funds, the ESF or the European Commission.</i>

Name of the practice	5.5.18 West London Initiative (WLI)
Description	<p>West London Initiative (WLI) emerged primarily as a result of identifying an increasing need amongst statutory agencies and youth organisations in London (UK) concerning Muslim youth engagement where such youth were developing extremist beliefs based upon erroneous interpretations propagated by extremist ideologues. Such beliefs were further exasperated by a lack of religious knowledge and understanding. WLI has since expanded to include challenging those susceptible to violent extremism in any form including Far Right extremism, Animal Rights, Political extremism, etc.</p> <p>WLI explores the factors that lead to violent extremism from a truly grass roots perspective including the radicalisation process and effective means and methods of intervention(s). WLI aims to engage with individuals or groups, young or old, male or female, who have become susceptible to violent extremist propaganda and teachings and provide them with an alternative and more attuned understanding of their values, philosophies, ideologies and ethics. WLI also challenges extremist groups who feed off each other in cycles of reactionary violence and escalating extremist discourse. This thereby enables the contextualisation of particular beliefs and understanding within today's society without compromising principles of integration and the rule of law.</p> <p>The organisation operates at a grass-roots level and is staffed both by individuals coming from similar backgrounds to its target audience, and skilled and experienced practitioners. This allows WLI to deliver a diverse range of interventions, events, projects and workshops where the aim is to educate, empower, build resilience and promote participation in civic society. The key consideration includes the ability to access hard to reach young people through bespoke innovative grass roots intervention methods tailored to the needs of the very person(s) engaged.</p> <p>WLI's work also includes the direct and indirect targeting of members of other organisations who directly or indirectly promote or entice others towards acts of violence in the name of race, religion, colour, creed etc. WLI carries out outreach work via its contact with mosques, statutory/non statutory organisations, families, local businesses and others as well as carrying out research into the fluid nature of radicalisation.</p>
Approach	Educating young people Exit strategies
Target audience	Youth/pupils/students Local Community Organisations/NGOs Violent extremists
Evidence and evaluation	<p>WLI incorporates the following in its evaluation and evidencing of success.</p> <p>Milestones From a milestone perspective, the following SMART (Specific, Measureable, Attainable, Relevant and Timely Specific) routine are implemented.</p>

Specific

Every milestone is specific in scope. This ensures that every time the milestone is perused, staff will know exactly what is going to be required to reach the milestone. This further ensures that no Milestone is vague, confusing or undoable. The milestones have clearly definable actions for the parties involved.

Measureable

Effective milestones should be grounded in a foundation that allows for the same to be measured. WLI promotes the usage of to-do lists where staff can take a milestone and break it up even further into actions. These actions are measureable because they are either complete (checked) or incomplete (unchecked).

Attainable

Where this milestone is essentially capacity driven, it is utilised to ensure the milestone can be reached. Within the working remit of WLI, this is a vital ingredient to ensure realistic delivery.

Relevant

While this may be obvious, this milestone ensures the delivery is relevant to the project at hand. If the milestone deals with too many aspects outside the scope of the project, it may distract and derail the efforts of the staff involved. Staff is to ensure the milestone in question can be solidly tied back to the project.

Timely

In order to avoid procrastination, effective milestones are to be tracked against a calendar. Where there should be a start time, due date and expected timeframe associated with each milestone. This milestone is constantly monitored by senior staff.

In addition to the above, WLI applies the following to its milestones:

Open

Milestones are to be kept open and presentable. Technical jargon or incomprehensible actions will be avoided so as to ensure decent communication channels when addressing non-technical parties such as a client. Milestones will be established which will make sense to everyone involved using clear language so that there is no confusion or misinterpretation.

Small

Milestones need to be kept small to allow them to be manageable.

Assignable

All WLI milestones are individualised to allow for designation to a specific, responsible member of staff. Should a milestone get to the point where multiple parties are involved, one individual is allocated line management responsibilities to ensure delivery. This avoids potential conflict and apportions accountability.

Progressive

Milestones must follow a linear path of progression to ensure that when one milestone is concluded, the next will lead on and allow for easy completion.

Significant

	<p>It may seem that this counters the ‘Small’ trait mentioned above, but milestones should be significant to the point where they complete a respectable portion of the project. If a milestone is too small or too specific in scope, introducing a ‘significant’ element avoids the dangers associated with a barrage of many milestones that in turn make the project look bigger than it really is.</p> <p>WLI’s milestones are simple project tools that will help set goals, priorities and work schedules.</p> <p>In addition to the points listed above, weekly staff meetings are conducted regarding issues raised from reports, activities, target audience members and to provide general updates. Staff is also reminded of what services and resources are available, the need to maintain credibility to ensure delivery of outcomes, the need to work within given timeframes, best value when considering project aims and the need to ensure the engagement is tangible and practical. In addition, there is a clear focus on the organisation’s purpose and on outcomes for service users. This is monitored by:</p> <ol style="list-style-type: none"> a) Being clear about the organisation’s purpose and its intended outcomes for service users; b) Ensuring users receive a high quality service which shows good practice and value for money; c) Ensuring staff perform effectively in clearly defined functions and role; d) Promoting values for the whole organisation and demonstrating the values of good governance through behaviour; e) Being thorough and transparent about how decisions are taken; f) Having and using good quality information, advice and support; g) Making sure that an effective risk management system is in operation. <p>Where requested, monthly reports are dispatched to strategic partners for evaluation and feedback. Local and strategic partners are regularly invited to visit activity venues when appropriate as well as discuss issues around governance and project outcomes.</p>
Sustainability and transferability	All elements of WLI’s practice are easily transferable and, language aside, have been designed to take account of local issues and protocols generally. Indeed WLI has often been requested to present workshops on its practice methods whereby the same is transferred to a local context and utilized accordingly.
Geographical scope	West London Initiative has operated essentially in London and surrounding counties but staffs have given presentations worldwide.
Start of the practice	7 th of June 2013
Presented and discussed in RAN meeting	Ran Derad, 3-4 December 2014, Warsaw
Relation to other EC initiatives	Member of ENoD (European Network of De-radicalisation)
Organisation	<i>The West London Initiative is a limited company, funded essentially through local authority and private sources.</i>

6 Family support

6.1 General description

This approach aims to support families vulnerable to violent extremism.

Family members are most often the first to detect worrying signs of radicalisation by their relative but often do not know how to deal with the situation. Families can be key actors in the prevention of radicalisation, can act as important agents of change and can provide enormous support structures for radicalised individuals who may be having doubts or becoming disillusioned. It is recognised that family members can also be spoilers in de-radicalisation, reintegration and safeguarding processes, however their importance should not be overlooked.

Family support can take place at different stages and can be provided at the first signs of growing extremism, while an individual is engaged in extremist activities or when the individual is engaging in a rehabilitation or reintegration program. In its earliest stages, family support can be targeted towards parents with individuals at risk, by talking about their anxieties and creating an open atmosphere in which their relative can talk and discuss extremist ideas and positive alternatives can be provided (e.g. Hayat programme). When extremist views turn into violence (and imprisonment), families can be supported whilst their relative is imprisoned (e.g. Violence Prevention Network) or afterwards in helping them re-integrate (support in going to school, finding a job etc.). Families of those that have travelled abroad (foreign fighters) should be listened to (in terms of concerns and needs), supported and advised in maintaining contact with their children e.g. via social media, and in creating a positive environment for a child to return home.

6.2 Aim

- Supporting family members of an individual who becomes radicalised towards violent extremism and criminality
- Raising consciousness of the threat of violent extremism and avenues for help
- Provide content for family members to address ideologies which terrorists use to recruit people to their cause.
- Support families whose children and relatives may be vulnerable to radicalisation.
- Build resilience against violent extremism.
- Managing risk of convicted violent extremist when released and support in the process to reintegrate.

6.3 Methods

There is a variety of organisations or networks which can offer family support: statutory bodies NGO's, voluntary civil society organisations of communities (mosque organisations) and even families themselves.

6.3.1 Preventive parental support

This cluster of interventions is directed at supporting (migrant) parents in raising their children in a (Western) society. In particular within certain communities, the gap between generations is a known cause for alienation of migrant youngsters. Specific interventions are directed at strengthening the dialogue between boys and their fathers and between mothers and daughters.

Parents can also take courses on enhancing their parenting skills. These courses focus on helping traditional parents with dealing with youngsters growing up in a modern western world.

6.3.2 Family support of (possible) extremists

Family support of (possible) extremists is mainly about counselling and aiding parents in dealing with the situation at hand. This can be via family helpline or providing and/or family counselling by giving advice and information about the possible radicalisation process, certain extremist groups etc. or helping them maintain a good relationship with their child, by working on trust and strengthening families within their social environment. When people have actually committed acts of violent extremism family support is also about managing the risk of convicted violent extremist when released and supporting them and their families in the process to reintegrate.

6.3.3 Support and empowerment of women

For women, courses (e.g. in community centres, religious institutions, adult education settings) can be provided which include diverse themes such as psycho-social development, confidence-building, family communication and applied parenting skills. It can also include training to build resilience or separate activities for women only.

6.3.4 Hotlines and helplines

An emerging practice in different European countries (NL, AT, DE, FR etc.) is the development of hotlines and helplines for concerned family members, friends, community members, professionals etc. Hotlines for radicalisation (as exist for many types of criminal behaviour) are often primarily aimed at reporting suspect behaviour. Helplines are focused on providing support and guidance to the caller for instance on how to deal with a potentially radicalising family member.

A number of lessons can be drawn from the experiences with helplines so far:

- Highlight that the aim of the helpline is to support and give advice, NOT to report.
- Be transparent and clarify that the police will be notified in cases of immediate danger.
- Listen, ask questions and take time for the interpretation of the situation and before giving advice.
- Consider skills of staff (e.g. psychologists, social workers etc.), good communication/people skills, ability to provide expert advice, ability to speak in other languages.
- Involve communities and if possible have community members operate the helpline (supported by training).
- In cases there might be other factors at play that are not necessarily radicalisation, e.g. experiences of marginalisation or of discrimination, failure at school or at work, rebellious attitudes and provocative behaviour, problematic circumstances within the individual's family etc., helpline staff need to be equipped to deal with all of these kinds of factors too.
- Allow for anonymous and confidential contact, preferably free of charge.
- Have a multi-agency cooperation framework to discuss cases and refer to and to establish good links with other organisations that can provide additional support/advice.
- Consider 24/7 handling arrangements for the helpline.
- Consider how to advertise the helpline e.g. through websites, through charities etc.

6.4 Lessons learned

6.4.1 Outreach and First Steps

- There preferably needs to be a national consensus on what the overall goals are and what strategic approach should be taken when engaging with families for the purposes of prevention, de-radicalisation and reintegration. The first step is asking, "What is the goal of this? How do

you want to engage with families of those who have radicalised or those who are at risk? Each actor might have different goals, (e.g. police and security services will most likely seek no violence/criminality and no recidivism). It is possible to let each actor work to obtain their goal, but the work should be cooperative and coordinated and families should experience a consistent approach. The specific family support will be on a case-to-case basis but the national strategy provides a general framework for all agencies and practitioners involved.

- A multi-agency approach is crucial. There is no limit to the amount of actors involved however there should be a case manager or limited point of contact with families. It will not be helpful if families are inundated by numerous different individuals as this will diminish trust-building. Those engaging need to work on all levels simultaneously (with the radicalised individual as well as with family/parents) and have an overview of (as much as possible) all that is going on.
- Family support can be provided by, for instance, NGO's (such as Hayat and Vaya), municipalities (Antwerp, Vilvoorde) or practitioners from other statutory bodies (e.g. community police officers, mental health workers, child protection workers in countries with no family support programme).
- It is important in a multi-agency approach that the actors involved know the security/intelligence restrictions, accept them and act within their limits.
- Equally, it is important for the service providers involved to stay within privacy limits.
- When engaging with family members transparency is essential for trust-building. Service providers should be open about their level of contact with police and security services and also about the goals and intentions of engagement.
- The language used when framing services or engagement with families should be selected carefully. Service providers should be careful to remain neutral and try (where possible) to lean toward positive language. Importantly, language used should be clear and to the point but drawing a fine line of empathy and understanding.

6.4.2 Potential Challenges

- Although families can have a key role in preventing radicalisation or de-radicalisation, the role of the family may differ greatly from case to case. Some families represent protective factors like resourcefulness and close and positive relations to the person in question. Other families may well represent risk factors in the form of poor resources and relationships or even direct negative, ideological influence. In short, one should keep in mind that families can be part of the solution, or they can be part of the problem and so choosing family members to involve is crucial.
- When supporting families it is important to have a holistic approach, not just focussing on the parents, but on the family system as a whole. Brothers, sisters, cousins and peers can be just as affected if their family member is becoming radical or has turned to violent extremism. One should realise that they are also a group at risk which should be safeguarded.
- If certain people (whether family, friends or community members) do not want to be involved in any type of engagement, it is best to accept their decision. Service providers should give encouragement and support where possible but only those committed to the process should be involved. The family has to decide what they want and set goals. Similarly, family members and the (potentially) radicalised individual should only interact when both parties are willing and ready.

6.4.3 First Contact

- In some cases affected family members of radicalised individuals actively seek out help. Therefore family support services, programme information and contact details should be advertised via the appropriate channels, including e.g. disseminating phone numbers/hotlines in affected communities or ensuring that the services become the first Internet search result. Word of effective services will spread throughout communities and there have even been

examples of (positive) information about support programmes for foreign fighter returnees reaching Syria.

- As family members of radicalised individuals might know how to reach out to practitioners and/or agencies for help, it is not necessary to set up completely new agencies of support. However, specific structures within those agencies (e.g. ministries of social affairs, police/security services or within frameworks of trusted civil society partners) can be helpful. Service providers should listen to the needs of family members and respond within the appropriate and possible means.
- It is not sufficient to offer family support only during office hours. Practitioners engaging in family support should have a '24/7' mentality' and be easy to reach via different communication means, such as (mobile) phone, email and even online messaging fora, e.g. WhatsApp.
- In the stage of the initial contact it is very important that a form of risk assessment takes place. With what type of case are we dealing with? It is still a vulnerable at risk or is someone actually planning to travel to Syria for example. In order to make a proper risk assessment it is important to involve multiple agencies in information is shared between agencies and practitioners. Such a risk assessment or monitor should also be repeated throughout the process of family support.

6.4.4 Potential Challenges

- In particular communities, there are cultural barriers for seeking help and creative and pro-active ways might be necessary to break down these barriers. The degree and form of pro-activeness can differ and the creation of an infrastructure where parents at least have the opportunity to seek help is important. The special 'hotline' (telephone number) which families can call if they are concerned about their family member is one such example, or those undertaking engagement could actively visit houses of parents whose children are considered at risk of becoming or have become radical.
- Waiting too long with a response and engagement might be harmful. If family members reach out for help a decisive response should be taken on the appropriate course of action. A decision on who should engage and the depth of engagement should be made based on all available information: e.g. from police, from any involved social workers, from the foreign fighter or family member(s) themselves and where necessary, from intelligence.

6.5 Defining Types and Methods of Support for Family Members

How service providers engage with family members and what types of support will be provided will depend on the goals set, the needs of the family and the resources and capacity available. Two specific methods of support for families of (potentially) radicalised individuals can be provided:

6.5.1 Direct Support

- Direct contact with family members can range from very pro-active support (e.g. case manager making house visits) to leaving the initiative for support completely to the families (e.g. families phoning a special centre for support). The extent of the support can vary from purely therapeutic to encouragement and empowerment of families by case managers.
- Direct family support can be undertaken individually or collectively. For instance, family group talks may be suitable in big anonymous cities. On the other hand in small and ethnically diverse communities in which youths recruit each other ('peer recruitment') approaching and helping families individually might prove more effective. Parents could also be steered towards taking courses on enhancing their parenting skills. For women, courses could be provided which include noticing behavioural changes in individuals at home or in the community which might be of

concern and equipping them with the knowledge to address these concerns. It could also include training to build resilience or separate activities for women only.

6.5.2 Indirect Support

- Case managers can provide indirect support by organising professional services for family members. Types of services can range from mental health counselling, media training for those affected by intense media scrutiny and help with practical matters such as social services
- In some cases an individual who is undergoing an Exit or rehabilitation programme will not only require psychological support but practical support with regards to finding a job, house and new avenues for socialising if all their previous contacts were radicalised towards violent extremism.

6.5.3 Practical Boundaries of Support

- Clear rules and boundaries for conduct should be set from the outset. In support groups, for instance, family members should talk about their relative but it should not be a forum for blame.
- Some families may not want to talk about what their relatives are doing as they don't want to think about the shame or stigma associated with their actions. In these cases it can be helpful to include a psychologist, who can dispel taboos and encourage them to talk about these issues in meetings.
- It is crucial that meetings are as private and confidential as possible. For instance, note taking during sessions with family members should not be done. Practitioners have found that explicit note-taking diminishes trust and creates an atmosphere of unease.
- Quite often there is 'institutional blaming'. Parents, for example, might blame the security services for not preventing their children from becoming engaged with known extremists. It can be helpful to include those "blamed" when engaging. This can be done by including (willing) persons from government departments such as the security services or foreign policy office into bilateral meetings or in support groups with families
- Adding an interpreter to the group talks might overcome some language barriers, but might not necessarily create the right atmosphere. Experience has shown that parents can also translate for each other and that they are more actively engaged and trusting if there isn't any interpretation.

6.5.4 Defining Content and Substance with Family Members

Different families will require different types of support. For instance some will have legal questions, religious questions, or questions about extremist organisations while some will require more empathy with families in similar situations. Each case will be different and will require an empathetic case manager.

- Firstly, it is crucial to provide factual information to family members particularly in terms of legal statutes e.g. if their child or relative has committed a crime. Practitioners should be knowledgeable about the various legal statutes and provide clear information about what is legal and what is not. It can also be comforting to remind family members that the (potentially) radicalised individual is not a terrorist until they commit a terrorist (or terrorism related, depending on the national legal framework) crime.
- Practitioners can help parents and family members adjust their communication and interaction with their relative whether the individual is at risk of becoming radicalised or already heavily involved in violent extremism. Family members will have numerous reactions some of which might include:
 - Becoming very strict (authoritarian),
 - Being strict but responsive to their relative's needs (authoritative),

- Setting no boundaries at all and at the same time not being responsive at all (neglectful)
 - Being responsive to the needs of their relative, but lacking rules and discipline (permissive)
- It is important to support families by listening to them, helping them develop an authoritative style in which there is a good balance in being ‘responsive’ (responding to the needs of their relative) and ‘demanding’ (setting boundaries) on the other hand.
 - Practitioners should discourage family members from being confrontational. It is important to support parents in talking to their children particularly in those cases where children are still involved with extremists. Parents have a tendency to either get very emotional or very angry when their children contact them. The focus should be on maintaining a positive relationship and parents should be encouraged to talk about “normal stuff” where possible. It is important to create an emotional boundary (by focusing on their well-being and not extremist issues), because in many cases the (potentially) radicalised individual is waiting for an excuse to break-up the contact and have evidence of disapproval.

6.5.5 Winding Down Engagement

- Engagement will usually end when goals have been achieved and either party (the service provider or family members) are confident that the family can proceed on their own.
- An evaluation or monitor with multiple agencies should be used to assess if the goals of family support have been achieved and the support can come to an end.
- Examples have shown however that setting a specific time-frame can be detrimental to engagement and where possible it should come to a natural end and not one dictated by capacity and resources.
- It should be borne in mind that engagement may never truly “end”. There should always be an open door or responsive individual who is available to family members or the radicalised individual even after goals have been achieved.

6.5.6 Potential Challenge

Resources (or lack thereof) may define the length and scope of engagement which might be detrimental to the individuals and family members involved. Resources and capacity should be taken into consideration at the outset of engagement and when and how to finish engagement should be thought about in the goal setting process.

6.6 Practices

The following practices will be further discussed:

- bOJA - Extremism Information Centre
- Cultures Interactive - WomEx
- Tim Perry Jonathan Ball Foundation for Peace - survivors for peace
- Tim Perry Jonathan Ball Foundation for Peace - women building peace
- Sabr - Steunpunt
- SAVE - Mothers schools
- SMN - helpline
- VAJA - Kitab
- Violent Prevention Network - family counselling
- ZDK - Hayat (Arbeitsstelle Islamismus and Ultranationalismus (ASTIU))

Name of the practice	6.6.1 <i>Extremism Information Centre</i>
Description	<p>The Extremism Information centre is a nationwide contact point for parents, teachers, social workers or any other person seeking advice concerning issues of violent extremism. We apply a broad definition of extremism, which includes politically motivated extremism as well as religiously motivated extremism.</p> <p>The Extremism Information Centre was installed in December 2014 and is financed by the Ministry of Family and Youth. It offers a free helpline, face to face counselling and a broad variety of workshops and trainings on issues such as anti-discrimination, anti-Muslim racism, jihadism and right wing extremism.</p> <p>The Extremism Information Centre offers anonymous counselling free of charge. It provides a counselling model for sustainable solutions together with stakeholders and an interdisciplinary team of experts. We help to assess the situation and to determine appropriate interventions. Is the reported behaviour a sign of radicalisation towards terrorism? Is it rather a sign of rebellion and provocation? We provide general information (on legal issues) and specific information. We refer to other institutions such as family counselling centres, open youth work organisations or the labour market service and we offer face-to-face counselling.</p> <p>When we work with individuals at risk, the voluntary engagement of the client is a precondition. We have a long-term approach and try to detect underlying problems and drivers of radicalisation. We focus on the affective aspect. The first advice we give parents is to stay in contact with their children, to maintain a relationship, to speak with their children, to encourage them to share their ideas and not to argue on ideological issues.</p> <p>The aim of our intervention is to provide the individuals with emotional support and to find ways to give back trust and cooperative attitudes by strengthening the family and adolescents within their social environment. We create a support system and provide alternative social contacts and alternative perspectives regarding school or job. We include a broad spectrum of professionals from the fields of probation work, youth work, family counselling centres, official bodies, job centres, therapists and (religious or other) experts. We work closely together with the Security Service and the police, but they are only involved if requested (by the clients) or in cases of immediate danger.</p>
Approach	Family support Training for first line practitioners
Target audience	Families First responders or practitioners Educators/academics
Deliverables	A video will be produced explaining extremism and the counselling model of the extremism information centre. Training modules have been developed and will be enhanced.
Evidence and evaluation	<ul style="list-style-type: none"> • Documentation of callers (short description of the situation and

	<p>indicated problem) and intervention measures</p> <ul style="list-style-type: none"> • Feed-back questionnaire: participants of trainings fill out a standardized questionnaire • Organisations booking workshops and trainings are contacted afterwards and asked if they were satisfied • Team meetings and supervision • Regular expert meetings with the security service and other organisations working in the field • Documentation of media response • Project visit by the “Syria Strategic Communications Advisory Team” (SSCAT) on 10 June in Vienna, a report will be provided to the Austrian government • Feedback on international meetings and conferences; the extremism information centre was in addition presented at the RAN Thematic Event “Dealing with Foreign Fighters” that took place at in Brussels on 15 - 16 June, the OSCE conference “Countering the Incitement and Recruitment of Foreign Terrorist Fighters”, which was held on 30 June -1 July 2015 in Vienna and at the TWP meeting of the Council of the European Union on 14 July 2015 in Brussels
Sustainability and transferability	<p>The practice can easily be transferred to other countries. The costs in Austria are 300.000 EUR per year. They include 4 counsellors, one person in charge of organising trainings and workshops and the director of the centre (all working part-time) as well as the remuneration of the trainers, rent and infrastructure and public relation activities.</p> <p>It is advisable to locate a similar project within a nationwide operating NGO.</p>
Geographical scope	<p>The Extremism Information Centre is a nationwide contact point. We work together with family counselling centres and open youth work organisations all over Austria.</p>
Start of the practice	<p>December 2014</p>
Presented and discussed in RAN meeting	<p>RAN Thematic Event ‘Dealing with Foreign Fighters’ that took place at in Brussels on 15 - 16 June.</p>
Relation to other EC initiatives	<p>None</p>
Organisation	<p><i>bOJA is the centre of competence for Open Youth Work in Austria. The association is the service and networking agency for Open Youth Work in Austria as well as the expert office for quality development in Open Youth Work. It represents Open Youth Work at a national and international level. bOJA is the mouthpiece for the field of Open Youth Work - with the aim of positioning the topics, perspectives and needs of Open Youth Work and the young people who use its services in the national and international (youth) political debate. bOJA is a NGO.</i></p> <p><i>The Extremism Information Centre is financed by the Ministry of Family and Youth.</i></p>
Country of origin	<p>Austria</p>
Contact details	<p>Lilienbrunnngasse 18</p>

--	---

Name of the practice	6.6.2 WomEx - Women/Girls, Gender in Extremism and Prevention
Description	<p>The WomEx practice emerged out of the observations (i) that there is hardly any violent extremist, terrorist, or hate crime offender that does not also hold sexist and homophobic attitudes, i.e. manifests highly rigid and conflictive gender issues (especially within the two major threats of violent extremism, right-wing extremism and religious fundamentalism, both Muslim and Christian), (ii) that these conflictive gender issues do not only coincide with but are key psychological driving forces behind violent extremism and hate crime and (iii) that methods which address issues of gender and gender identity may therefore have a quite powerful and sustainable effect in prevention and de-radicalisation interventions - often more powerful than ideological/religious issues.</p> <p>For example, practitioners have recurrently found that violently extremist young men compensate insecurities in their sense of male identity and manliness by acting-out in hateful ways against women, homosexuals, and generally all persons that by appearance or behaviour confuse their restrictive gender role order. Moreover, women that are active in extremism overwhelmingly tend to agree to and actively reconfirm such restrictive gender roles. They thus share the sexist and homophobic attitudes and draw motivation from them for their activities, while they, at the same time, enjoy an empowerment impulse from their newly gained opportunities of extremist engagement and activities (e.g. serving as ideological supporter, providing internal social cohesion, helping to prepare attacks, also committing hate crimes and terrorist attacks themselves sometime).</p> <p>In turn, extremist movements take advantage of the socially given gender roles strategically in that they position their female followers in places of society that allow them to propagate extremism and at the same time make it look more normal and mainstream. For instance, in Germany right-wing extremist women enter child day care, parents' organisations, schools, family welfare and professional social work in order to infiltrate and to support the current mainstreaming of right-wing extremist attitudes into middle classes.</p> <p>Hence, both WomEx's gender specific interventions with girls/women and its gender focused methods across different setting are a necessary component of any prevent strategy and may be applied with great impact in de-radicalisation and prevention settings.</p> <p>Originally emerging out of CI's 'Girl Power' workshops, WomEx has produced various methods in which young at-risk persons work on gaining awareness about gender roles and how they have affected key situations of conflict, hatred and escalation in their lives. In particular, WomEx interventions aim at making participants more aware of the intrinsic connection between rigid/restrictive gender roles, polarization and violent extremism. Also participants will realize about how certain biographical and milieu specific conditions (violent/relational/sexual abuse, neglect, degradation, psychological trauma) may lead to adopting restrictive and exclusionary gender role concepts and at the same time become susceptible to engaging in</p>

	<p>violent extremist behaviour. Eventually, WomEx methods work on promoting alternative and more inclusive modes of male and female identity practices and engage in training alternative patterns of behaviour which comply with a human rights based and pro-social sense of gender within democratic citizenship.</p>
Approach	<p>Family support Exit strategies</p>
Target audience	<p>Families Local Community Organisations/NGOs Youth/pupils/students</p>
Deliverables	<p>The WomEx.org website is in the process of built since late 2014. Various resources and materials (also from similar approaches and organisations in the field) will be placed there in the course of 2015 mostly.</p> <p>Notably, a manuscript about the underlying research of the WomEx practice has been drafted: http://www.cultures-interactive.de/tl_files/publikationen/engl/2014_Weilnboeck_Deradicatisation-Prevention-Intervention.pdf</p> <p>Reports from two international WomEx conferences (in cooperation with RAN Derad) have been drafted.</p>
Evidence and evaluation	<p>CI's practices have been evaluated recently by Phineo (Association of Quality Assurance in NGO work) and has been awarded the Phineo 'Method-works' certificate in 2014.</p> <p>In earlier years CI's practices have been evaluated, received scientific counselling and have been show-cased by the Federal Model Projects' evaluation and counselling department (attached to the governmental programs).</p> <p>Self evaluation and collecting client feed-back is standing practice in CI also as a training module for the young peer-facilitators to be employed by them in their own fledgling peer-workshops.</p> <p>WomEx has received positive feedback from RAN-Derad and RAN generally so that two international WomEx conferences were co-organized by CI and RAN Derad (in Berlin, 2013, and Frankfurt/M, 2014).</p> <p>Moreover, since some years WomEx and CI have been cooperating on various occasions with the OSCE (TNT/Transnational Threats Department) which engaged in the topic of women and extremism/prevention very early on, recently publishing its final report (http://www.osce.org/atu/99919) incorporating much of WomEx perspectives (mostly on the women as perpetrator aspect).</p> <p>In OSCE and UN contexts CI/WomEx has collaborated with SAVE (Sisters Against Violent Extremism) which has lead to a joint EU project application in 2015.</p>
Sustainability and transferability	<p>As shows the UN, OSCE and RAN co-operations, approaches to women/gender and extremism/prevention are highly transferable. Together with SAVE (Sisters Against Violent Extremism) CI/WomEx is</p>

	<p>applying for an EU project which would allow to further develop the practice.</p> <p>WomEx sustainability will be supported by CI having been appointed 'Federal Center of Excellence for Youth-Cultural Prevention of Violent Extremism and Xenophobia' (by the governmental Prevention Department) in 2015.</p>
Geographical scope	In Germany and internationally
Start of the practice	<p>Originally emerging out of CI's 'Girrl Power' workshops from 2008 on, WomEx has been an ISEC national starter measure in 2013-14 and has cooperated with RAN Derad and with the OSCE. WomEx methods have come to be part of CI's Fair Skills approach as well as of the LocalDerad (Hako_reJu) youth worker training and of a university education module for social workers in 2014. WomEx methods will be further developed as part of CI's mission as 'Federal Center of Excellence for Youth-Cultural Prevention of Violent Extremism and Xenophobia'.</p>
Presented and discussed in RAN meeting	WomEx was presented and discussed in two WomEx conferences which were co-organized by CI and RAN Derad (in Berlin, 2013, and Frankfurt/M, 2014).
Relation to other EC initiatives	<p>CI is member of:</p> <ul style="list-style-type: none"> • ENoD (European Network of De-radicalisation) • IMPACT Europe project (Innovative Methods and Procedures for Assessing Counter-radicalisation Techniques in Europe) • EENeT (European Experts Network in Terrorism Affairs, by the Federal Criminal Police Office, Bonn/Germany) • EDNA (European Platform of De-radicalising Narratives) • WomEx (Women/Girls, Gender in Extremism and Prevention) <p>CI engages in (associate) partnerships with the ...</p> <ul style="list-style-type: none"> • EFUS (European Forum for Urban Security) • GCTF Global Counter Terrorism Forum. <p>In similar European contexts, CI cooperates with the ...</p> <ul style="list-style-type: none"> • OSCE (TNT/Transnational Threats Department) • FES (Friedrich Ebert Foundation) • Robert Bosch Foundation, the international stipend program Civic Education in Action for practitioners from Eastern Europe
Organisation	<p><i>"Cultures Interactive e.V. (CI) - Intercultural Education and Violence Prevention" is an NGO that works both in prevention and first-line de-radicalisation with at-risk young people that engage in or have shown to be susceptible to violent right-wing extremism or ethno-nationalism/religious fundamentalism - also to xenophobic, racist, and other forms of hateful and exclusionary behaviour. In 2005 CI began to work in preventing right-wing extremist/neo-Nazi subcultures which emerged in East-Germany after reunification. Since 2008 CI also works in inner-city districts struck by migration-related ethnic and religious radicalisation and hate crime.</i></p> <p><i>CI's Federal Model Projects and EU-ISEC and EU-research projects placed an emphasis on developing methods for prevention and rehabilitation work with high-risk youth populations that have largely been failed by existing measures. Methodologically, the CI approach for prevention and de-radicalisation settings combines youth-cultural creativity workshops with civic education and psychologically based</i></p>

	<p><i>self-awareness group-work. CI also provides gender specific and gender awareness methods (WomEx) and offers advanced training in methodology for youth work practitioners to enable them to pro-actively and efficiently handle incidents of hate speech/crime and extremist indoctrination/recruitment (LocalDerad). Beneficiaries and partners of CI interventions are schools/teachers, youth centres, street/youth work, prisons, local authorities/police, communities, local press/media - especially around social hot-spot areas. In 2014 CI began to work in Eastern EU Member States and act as co-chairing organisation for the RAN working group on “De-radicalisation”, comprising EU wide first-line workers’ organisations which are involved in de-radicalisation processes with regard to all forms of extremism, including religious extremism and gangs. In 2015 CI has been appointed a ‘Federal Center of Excellence for Youth-Cultural Prevention of Violent Extremism and Xenophobia’ (by the governmental Prevention Department).</i></p>
Country of origin	Germany

Name of the practice	6.6.3 Mothers School
Description	<p>SAVE's experiences and extensive interviews show that violent extremists undergo a process of radicalisation that others, most significantly their mothers, can often detect. By sensitizing and empowering mothers' self-awareness and confidence to recognize and respond to potential early warning signals in the children's behaviour, mothers can confront the influence of push and pull factors that can lead their children to violent extremism.</p> <p>In 2012 SAVE created the first Mothers School, a unique tool to mobilize mothers and translate this non-traditional approach into reality. Through a series of community based mothers' workshops, women cover diverse themes from psycho-social development, confidence-building, family communication and applied parenting skills learning to channel their children's fear and frustration into safer, more enriching outlets.</p> <p>'Graduating' mothers are more aware of the signs of radicalisation in their children and potential dangers in their immediate environment. They feel more confident and competent to respond to their children's needs and provide proper support. Mothers report how they actively engage at the home front to promote non-violent and resilient families and communities.</p>
Approach	Family support Community engagement/empowerment
Target audience	Families Local Community Organisations/NGOs Youth/pupils/students
Deliverables	The Mothers School model includes a curriculum of background information and training exercises as well as monitoring and evaluation protocols.
Evidence and evaluation	<p>The Mothers Schools meetings are completely accompanied and monitored by SAVE through systematically collected observational, testimonial and anecdotal evidence.</p> <p>Performance criteria include mothers' perceived increased confidence and ability to recognise and respond to signs of radicalisation in their children via self-evaluation start/exit questionnaires.</p> <p>Progress and impact are also reflected in the number and nature of mothers' success stories, positive examples and new experiences derived from illustrative case studies, gathered via reporting protocols.</p> <p>Secondary criteria include the number and nature of new outreach and awareness raising activities organised by participants as well as positive PR indicators.</p>
Sustainability and transferability	<p>The Mothers School Model - Adopt, Adapt, Advance</p> <p>The Mothers School model is envisaged as an emerging international network implemented through SAVE partnership with community-based organisations. SAVE provides the concept, training and monitoring tools and supports the curriculum delivery, to assist the local partners and ensure impactful, quality controlled Mothers School workshops on the ground.</p> <p>The organisation of the mothers' meetings and the content of the</p>

	training are highly flexible, low cost and can be customized and integrated into the ongoing programmes and frameworks of the local partner. Moreover, the overall implementation and training of the model can be managed on a part time basis. Thus all actors have a considerable degree of ownership.
Geographical scope	Tajikistan: Kujand, India: Mewat, Srinagar Kupwara, Pakistan: Islamabad and Rawalpindi, Tanzania: Zanzibar, Indonesia: Jember, and Nigeria: Jos, Austria: Vienna
Start of the practice	The Mothers Schools model was launched in Tajikistan 2012
Presented and discussed in RAN meeting	Nominated by the RAN Working Group for Victims Voices RAN VVT, The Hague, 2012 RAN VVT, Madrid, 2013
Relation to other EC initiatives	None
Organisation	<i>SAVE (Sisters Against Violent Extremism) is an NGO that is financially supported by the United States Peace Institute.</i>
Country of origin	Austria
Contact details	Media Tower Taborstrasse 1-3 1020 Vienna Austria Edit Schlaffer, Founder and Director office@women-without-borders.org (+43) 69918587699 www.women-without-borders.org

Name of the practice	6.6.4 HAYAT
Description	<p>HAYAT (Turkish and Arabic for “Life“) is the first German counselling program for persons involved in radical Salafist groups or on the path of a violent Jihadist radicalisation, including those traveling to Syria and other combat zones. Further, HAYAT is available to the relatives of a radicalized person as well.</p> <p>Since January 2012, HAYAT has been the partner of the German Federal Office for Immigration and Refugee Affairs (Bundesamt für Migration und Flüchtlinge BAMF), which established a national counselling hotline on radicalisation (‘Beratungsstelle Radikalisierung’). Taking calls from relatives and other concerned persons, the hotline provides a first line assessment to then redirect the calls to local, non-governmental partners like HAYAT. HAYAT can also be contacted directly via Email or telephone. During the first contact, HAYAT experts will conduct an analysis and risk assessment of the respective situation to determine the counselling demand and to answer the most important questions in the beginning: Is the relative in danger of becoming (violently) radicalized? Or is it a harmless case of conversion to Islam?</p> <p>Once the counsellor gained a clear picture of the concrete situation, an individual counselling process and step by step plan will be designed, including various measures to prevent further radicalisation or to stop and reverse the process. The counselling is conducted systematically, situationally and problem and solution oriented. Our services are free, confidential and available in German, English and Arabic.</p> <p>With our experience and expertise we accompany persons, who don’t want to lose their radicalized relative or friend and try to understand and win him/her back.</p> <ul style="list-style-type: none"> -We counsel, provide contacts and listen. -We make a clear differentiation between a strong, lived faith and an ideology of inequality that can result in violence and terrorism. -We assist in identifying alarming signals and show limits of what is possible. -We provide new perspectives and accompany the cases for as long as necessary. <p>Many relatives of persons who are about to travel abroad (e.g. to Syria), are already there or have even returned to their home countries, turn to HAYAT for advice. HAYAT thereby follows three main goals:</p> <ul style="list-style-type: none"> -Try everything possible to make them voluntarily refrain from traveling abroad. -If they are abroad: Stop fighting and return. -The persons are supposed to return to a safe and controlled positive social environment. <p>HAYAT can resort to a nationwide network of partners on various levels. HAYAT thereby understands itself as a bridge between the family and other relevant institutions such as schools, social services and, if applicable, prosecution, police or employer and assist in communicating with various parties with the primary goal of catering to the specific needs of the respective person and family.</p>

Approach	Family support Exit strategies
Target audience	Families Violent extremists Local Community Organisations/NGOs
Deliverables	Practice has led to plenty of output e.g. handbooks, trainings, academic articles, political counselling, networks etc. For more information please visit www.hayat-deutschland.de
Evidence and evaluation	<ul style="list-style-type: none"> - Regular evaluation in realm of ‘Beratungsstelle Radikalisierung’ at the BAMF (Bundesamt für Migration und Flüchtlinge) - Since 2012: 127 counselling cases; 50 of them considered closed - goal always remains not solely a desistance from violent behaviour but also an ideological de-radicalisation - Experience and success in preventing departure to combat zones as well as in assisting returns
Sustainability and transferability	Practice is sustainable and can be transferred to other local and national contexts. The approach and methods of HAYAT-Germany has already inspired practices abroad e.g. in Canada, UK, Australia.
Geographical scope	Germany and inspired international practices
Start of the practice	2011
Presented and discussed in RAN meeting	Hayat has been presented in several RAN INT/EXT meetings and the RAN Cities Conference.
Organisation	<p><i>Society Democratic Culture (ZDK Gesellschaft Demokratische Kultur gGmbH)</i></p> <p><i>The ZDK Society Democratic Culture is an independent non-profit association that champions the fundamental values of freedom and dignity throughout Germany. Our initiatives serve to prevent and raise awareness of violence and extremism. We challenge terrorist and radical ideological movements like right-wing extremism and Islamism. We also help persons leave extremist groups and networks. For this purpose, we are sponsors of the EXIT-Germany and HAYAT-Germany initiatives. Moreover, we offer trainings and educational services and, with our Institute for the Study of Radical Movements (ISRM), we are hosting a nationally and internationally oriented research institute as well as the world's first peer reviewed open access journal on de-radicalisation Journal Exit Deutschland (JEX).</i></p>

--	---

Name of the practice	6.6.5 Survivors for Peace
Description	<p>Survivors for Peace provides victims of political violence and terrorism with a virtual and real peer support network with dedicated officers to maintain communication platforms, as well as a programme of activities which survivors enrol upon after intensive one-to-one interviews. Survivors (including family members and formers) are taken through interactive non-formal learning and support delivery at our purpose-built Peace Centre and elsewhere, intended to help them cope with and recover from their experiences. Through sessions on Living with Trauma and Sharing Experiences, survivors are trained and supported to engage in their own separate Advocacy and Leadership activities, often commemorating and raising awareness of the impact of violent extremism with a view to reducing its future incidence. Expertly trained and supported, survivors also co-facilitate our specialist team's provision of Critical Incident Training to aid first responder preparations for terrorist attacks. Activities also include Dialogue, where survivors are encouraged to meet with formers or representatives of the 'other side' with a view to mutual humanisation and the breaking of the cycle of violence. The approach relies on being restricted to survivors of political violence and their families, but is directed to helping them move beyond their particular incidents and conflicts through peer support from survivors of various kinds of violent extremism, often from very different conflicts. An approach responding to the needs of survivors of political violence, Survivors for Peace is highly complementary with other de-radicalising and disengaging processes by allowing for victim input—even participation—where appropriate.</p>
Approach	Family support
Target audience	<p>Victims of terrorism Families Formers</p>
Deliverables	<p>Multiple deliverables over the life of the project, including survivor testimony videos and training session contributions, Steps Towards Empowerment and Positive Survival (STEPS) booklet of tips and advice (2006), timeline of needs adapted to specific requirements of survivors of political violence, needs analyses.</p>
Evidence and evaluation	<p>Comprehensive external (2010) and internal (2014) evaluations/impact assessments available, linking specific evaluation measures to research evidence base. Recently introduced standardised quantitative wellbeing indicators for quasi-therapeutic elements. Self-administered quantitative and qualitative output evaluations for each delivery session. General and specific beneficiary consultations including overall service check (Feb 2014) and deeper investigation of the specific needs of diaspora communities (2012).</p>
Sustainability and transferability	<p>An approach of multiple components which can be separated out for separate commissioning. Commercial income from critical incident response training covers costs of support network. Avoiding identification with particular parties to disputes, or even particular conflicts, aids in funding sustainability as well in delivery. Overall however, low frequency high impact events of a politically motivated character are most appropriately and sustainably resourced at the</p>

	national government level, in line with the Victims' Rights Directive. The basic maintenance of a national network along with a programme of activities to maintain the energy and activity of that network in a populous Member State with a substantial history of political violence linked to radicalisation would require significantly in excess of €200.000,- p.a. Its transferability may therefore be limited.
Geographical scope	UK and the Republic of Ireland
Start of the practice	2003
Presented and discussed in RAN meeting	Ran VVT
Relation to other EC initiatives	Assisting Member States in their fulfilment of Victims' Rights Directive 2012/29/EU Recitals 2, 8, 16, 57, Art. 22(3).
Organisation	<i>The Tim Parry Johnathan Ball Foundation for Peace is a UK-registered charity and limited company. The approach is commissioned by local authorities.</i>
Country of origin	United Kingdom
Contact details	<p>The Tim Parry Johnathan Ball Peace Centre Peace Drive Great Sankey, Warrington Cheshire, WA5 1HQ United Kingdom</p> <p>Kelly Simcock, Director of Commissions info@foundation4peace.org</p> <p>(+44)1925581231</p> <p>www.foundation4peace.org</p>

Name of the practice	6.6.6 Women Building Peace
Description	Women Building Peace is a radicalisation-aware and conflict-sensitive training programme, supporting marginalised women to become more active citizens who lead the way in preventing and resolving violent conflict through intercultural dialogue and challenging extremist narratives. It consists of a highly flexible and tailored programme of interactive, accessible audio-visual non-formal learning delivered to women of any age in cohorts of 12-15, usually consisting of a 4-6 month programme of 12-14 workshops undertaken at highly accessible local sites, with an added intensive residential element. Units cover: identity and belonging - the compatibility of multiple identities; prejudice and discrimination; conflict resolution and peacebuilding - how to identify and manage conflicts, including those driven by early signs of radicalisation; active citizenship and leadership - volunteer placements and support packages to allow local women to take the initiative in preventing and resolving conflicts; intercultural dialogue sessions with members of little-encountered communities that are the subject of violent extremist narratives; intercultural dialogue platforms, allowing feedback of under-represented voices into the policymaking process.
Approach	Family support Community engagement/empowerment
Target audience	Families Local Community Organisations/NGOs General public
Deliverables	The (optional) external accreditation of units in active citizenship and peacebuilding has led to the production of European Qualifications Framework Level 3 training materials, drawn up from a counter/alter narrative perspective, in addition a large bank of audio, visual and creative portfolios of evidence from participants.
Evidence and evaluation	(Optional) external accreditation of course units is supplemented by quantitative and qualitative standard session output quality check forms and baseline/summative evaluation of integration as per standard European Integration Fund requirements as interpreted by the UK Responsible Authority. In addition to accreditation of participants' learning, their portfolios provide a rich base for internal and external evaluation, which is currently ongoing.
Sustainability and transferability	Single-cohort versions deliverable with small grants or local authority funding in any local setting that could sustain under €30.000,- per cohort costs. Highly transferable as is not dependent on high-intensity residential components or substantial resource and equipment requirements. Ensuring affordability to commissioners may require limiting travel and thus limiting to regional scope.
Geographical scope	North West of England (so far Blackburn, Oldham, Nelson, and Chorley)
Start of the practice	June 2014
Presented and discussed in RAN meeting	RAN Prevent

Relation to other EC initiatives	This approach is currently co-financed by the European Integration Fund.
Organisation	<i>The Tim Parry Johnathan Ball Foundation for Peace is a UK-registered charity and limited company. The approach is commissioned by local authorities.</i>
Country of origin	United Kingdom
Contact details	<p>The Tim Parry Johnathan Ball Peace Centre Peace Drive Great Sankey, Warrington Cheshire, WA5 1HQ United Kingdom</p> <p>Kelly Simcock, Director of Commissions info@foundation4peace.org</p> <p>(+44)1925581231</p> <p>www.foundation4peace.org</p>

Name of the practice	6.6.7 <i>Steunpunt Sabr</i>
Description	<p>Steunpunt Sabr (the Arabic word for ‘patience’) is a women’s organisation that is situated in the neighbourhood Schilderswijk (The Hague), and is active both in the Municipality of The Hague and nationally. Sabr is an independent and autonomous NGO, that works bottom-up and offers support to and empowers vulnerable woman.</p> <p>Sabr organises activities for woman in a trusted and safe environment, it is a place where women meet each other and interact around the kitchen table or living room. Sabr supports these women with their questions and needs, and empowers them to take care of their problems themselves. If the problems are too complex, Sabr will refer these women to other professional support and care organisations.</p> <p>Support group for parents With the growing challenge of youngsters leaving to Syria from this area, Sabr has organised a support group for parents whose children have left for Syria. The group consisted of parents from different cultural backgrounds and both Muslim and converts, and was growing fast.</p> <p>Parents joined the group voluntarily and usually knew about the support group through their networks. Sabr also had close connections with community police officers who referred parents, also from other areas, to the support group.</p> <p>Sabr facilitated the meetings and was present to support the parents where necessary. The needs of the parents were the starting point of the conversations. When a lot of questions were raised about the Syria issue for the government and municipality, Sabr arranged for government and municipality officials to join the group and answer their questions.</p> <p>Participating parents were very happy with the support group since it offered them a place to share their experiences and learn from each other how to deal with the situation. Key factors to this were the low entry levels (very local, short communication lines), closed meeting in a safe space (trust between participants and the organisation) and the independent nature of Sabr.</p>
Approach	Family Support Community empowerment/engagement
Target audience	Families
Sustainability and transferability	Steunpunt Sabr is transferable to other countries. An investment at the start is needed to found a NGO like this. Moreover subsidies and funds are needed on a yearly base.
Geographical scope	Steunpunt Sabr is situated and implemented in the municipality of The Hague. Moreover it provides guidance and advice for parents nationally.
Start of the practice	Steunpunt Sabr was founded in 2007.

Presented and discussed in RAN meeting	RAN POL The Hague, 30 June - 1 July 2015.
Organisation	<i>Steunpunt Sabr is an NGO and is partly funded by the Dutch (local) government.</i>
Country of origin	Netherlands

Name of the practice	<p>6.6.8 SMN Helpline</p> <p>www.hulplijnradicalisering.nl</p> <p>06-81893529</p>
Description	<p>This helpline is an initiative and a realization of the vision of the Alliance of Moroccan Dutch (SMN) on the prevention of radicalisation. The SMN considers it important that the Moroccan community organizes its own resilience against radicalisation and speaks openly about.</p> <p>The Moroccan community at the local level plays a key role in the prevention of radicalisation. The empowerment and resilience of the local community are central to this helpline. The SMN puts key individuals and community leaders from local communities in place in order to help parents and family members, and supports them in finding a solution to radicalisation.</p> <p>The telephone helpline is part of a broader approach to raise awareness about radicalisation among Moroccan Dutch and to strengthen the resilience within this community. Part of our approach is to train key individuals (community leaders) from communities and to create information campaigns in communities where the issue of radicalisation occurs. During information meetings for parents, experts provide information about how to recognize early signs of radicalisation and where they can go for help and advice. The key individuals (community leaders) are also trained to refer to professional care when this is needed. They are committed on a voluntary basis for concerned parents and family members who are dealing with radicalisation in their own network. The overall tasks of the trained key actor are providing support to concerned parents, informing them of the next steps and possible solutions, mediation and active referrals to appropriate agencies (municipal, social work, imam, psychological support) and sharing information with the local authorities and co-workers at SMN.</p> <p>A general description of a situation where the help from SMN was requested:</p> <p>The request will be picked up by the key actor. The request usually involves</p> <ul style="list-style-type: none"> - Signals and concerns about radicalising behaviour; - Indications of departure to war zones and/or armed conflicts abroad; - A child/family member has travelled to war zones/or armed conflicts abroad; - A child/family member has returned from war zone after participating in conflict and/or humanitarian mission; - A child/family member was killed in a war zone. <p><i>Approach</i></p> <p>Parents who turn on the hotline for help, support and/or mediation will initially get to speak with the SMN. After exploring the request and the situation, a link is made with a key actor (community leader).</p> <p>The interventions may vary in weight. There are many requests for light interventions like lend an ear to the concerns of parents, provide them with information and advice or link them to a theologian or someone who has experienced a similar situation. More intensive requests involve</p>

	<p>references to professional care institutions and other authorities. In the latter case, the key individuals and the SMN take no steps without the written consent of the caller/parent. Any kind of intervention of the key actor occurs according the action protocol within the agreed legal framework.</p> <p>The premise is to secure the privacy of the caller/parents who turn to the helpline. This is also communicated with both the caller and the cooperating organisations.</p>
Approach	<p>Family support Community engagement/empowerment</p>
Target audience	<p>Families Local Community Organisations/NGOs Youth/pupils/students</p>

Evidence and evaluation	The helpline started at the end of 2014, therefore there is not yet evaluation data available. We did organise already 15 information meetings in 2015 in several large cities in the Netherlands, like Amsterdam, Delft, and Zoetermeer.
Sustainability and transferability	The helpline is an independent initiative which is not linked to any grant of the government. A social organisation finances the helpline for a period of 1 year (October 2014 - October 2015). SMN is currently working on raising new funds for the continuity of the helpline for the next period.
Geographical scope	The helpline was launched in the following cities: Amsterdam, Rotterdam, The Hague, Utrecht, Gouda, Delft, Zoetermeer and Arnhem. Meanwhile, the hotline has national coverage. The helpline now operates in the Netherlands.
Start of the practice	The helpline was launched on 1 October 2014. The project is expected at least continue until October 2016. The existence of the helpline is dependent on available funding.
Presented and discussed in RAN meeting	RAN @ London 2 March, Counter narratives. RAN Thematic Event 'dealing with foreign fighters', 15-16 June 2015, Brussels
Relation to other EC initiatives	None
Organisation	<i>The Alliance of Moroccan Dutch (SMN) is a national organisation representing the interests of Moroccans in the Netherlands. Since March 2009 SMN stands for Alliance of Moroccan Dutch. Until then stood for SMN Alliance of Moroccans in the Netherlands. With the new name we want to express that Moroccans in the Netherlands in the first place are citizens of the Netherlands. SMN exists since June 1, 2006, but under the</i>

	<p><i>previous name, Alliance of Moroccans and Tunisians (SMT), though a much longer history dating back to 1987.</i></p> <p><i>The mission of the SMN is to improve the social position of Moroccans in the Netherlands and to strengthen the Moroccan community with the aim of full citizenship. In the vision of the SMN that means:</i></p> <ul style="list-style-type: none"> <i>– Proportional participation of Moroccan Dutch in all areas of society, and</i> <i>– Emancipation as a group and as individuals on the basis of a chosen identity as a Moroccan Dutchman.</i> <p><i>The realisation of this mission starts with personal power and responsibility. Without the existence of a self-organisation to look after the interests of the Dutch Moroccans, participation, empowerment and full citizenship is unfeasible.</i></p> <p><i>SMN emphasizes the importance of self-organisations among Moroccan Dutch. It is essential to achieve its mission. The SMN considers their organisation as part of the liberation movement of Moroccans in the Netherlands. The SMN also aims to be the representative at the national level. This is only possible if we shape our mission and objective in close collaboration with Moroccan organisations, networks, key individuals, professionals and volunteers.</i></p> <p><i>SMN represents the interests of Moroccan Dutch in different ways. The main tasks involve advocacy by participating in discussions and advocacy, networking, project development and implementation, and education.</i></p>

Name of the practice	6.6.9 Advice for parents, relatives and other affected persons with regard to Islamism
Description	<p>Since autumn 2012, the newest team at VAJA e.V. - called “Kitab - Beratung von Eltern, Angehörige und Betroffene in der Auseinandersetzung mit Islamismus” (Advice for parents, relatives and other affected persons with regard to Islamism) - works to counter the radicalisation of young people in the context of fundamentalist Islamism and Salafism. The members of the Kitab team work directly with the young people and also provide counselling to persons belonging to the social circle of youngsters attracted by Islamism and Salafism. Kitab is one of the four partners and with that part of the nationwide acting counter radicalisation program of the government (BAMF, Beratungsstelle Radikalisierung).</p> <p>The target group of the de-radicalisation work of our NGO is, on the one hand, the youth labelled as extreme right/radical right-wing and/or who distinguish themselves by extremely intolerant behaviour in terms of group-focused enmity; and on the other hand - coached by the Kitab team - youngsters who turn to Islamist and Salafist organisations.</p>
Approach	Family support Community engagement/empowerment
Target audience	Families Youth/pupils/students Educators/academics
Deliverables	Several publications of the VAJA team available at: http://www.vaja-bremen.de/archiv-lesen.htm
Evidence and evaluation	<p>Cooperation with the following institutes and researchers:</p> <ul style="list-style-type: none"> • DJI - Deutsches Jugendinstitut, Arbeits- und Forschungsstelle Rechtsextremismus und Fremdenfeindlichkeit • Amadeo Antonio Stiftung, Fachstelle Gender und Rechtsextremismus • Fachhochschule Frankfurt am Main, Forschungsnetzwerk Frauen und Rechtsextremismus • BAG (Bundesarbeitsgemeinschaft) Streetwork/Mobile Jugendarbeit (detached youth work) • Prof. Kurt Möller, Hochschule Esslingen, u.a. wissenschaftliche Begleitung und Evaluation bei VAJA (amongst others scientific monitoring and evaluation at VAJA) • Prof. Christian Spatschek, Hochschule Bremen • Prof. Heinz Lynen von Berg, Hochschule Bremen
Sustainability and transferability	<p>VAJA e.V. (primarily) finances itself from municipal funds from the youth aid budget, and also presents its case to the youth aid committee on certain occasions. The association is valued and respected by all political parties.</p> <p>Community work is one of our main pillars. We try to transfer our knowledge into different types of social/public institutions. In the local area we are still connected to nearly every institution and offer</p>

	our service and support.
Geographical scope	Bremen (DE)
Start of the practice	May 1992 VAJA started work with youngsters with right wing tendencies and extreme intolerant attitudes. 2012: Launch of team Kitab.
Presented and discussed in RAN meeting	RAN Prevent, Berlin; 13.-14. June 2013
Relation to other EC initiatives	Member of ENoD (European Network of De-radicalisation)
Organisation	<p><i>VAJA - Association to promote acceptance based youth work (NGO)</i></p> <p>Streetwork: Streetwork is a key component of detached youth work and involves meeting the youths in their own environment. On the one hand, this means seeking out the youths at their chosen meeting places in the public sphere and also working with them on site (usually on the street). On the other hand, it also means meeting the young people in their own 'comfort zone' regarding attitudes and behavioural patterns and not requiring them to change their attitudes or behaviour in order to receive assistance from social work services.</p> <p>Clique work, individual aid, and parental involvement: The professional basis for working successfully with cliques is to create an overarching, strong working relationship with the recipients. As a form of self-organised youth contact, the clique is not sacrosanct from an educational perspective. With regards to influencing membership, educational ideas can - in consultation with the clique - instead allow new members to be recruited, or support individuals' wishes to leave. When this happens, the clique becomes a group, preventing the formation of regressive, hermetically sealed environments, and facilitating connections with other social networks - an option which, when it comes to tendencies towards right-wing extremism and other group-oriented enmity, is essential for creating opportunities to leave and switch groups democratically by experiencing social integration, participation and recognition. Distancing potentials are rarely consolidated, and distancing processes rarely introduced, simultaneously and in the same way for all clique/group members. This is why individual aid is an important task area which often develops as a result of working with cliques, groups and scenes. The processes for changing or re-orientating individual youths towards new coping mechanisms, integration methods, memberships and recognitions can be individually accompanied or prompted through this work. It also enables individual problems and needs to be addressed in more detail, providing professional advice for the affected youths and, if necessary, for their parents or other important figures in their social environment.</p> <p>Project work: Project services are special measures that supplement the everyday socio-pedagogical work performed in the aforementioned task areas. They are generally activities such as sport and exercise-based, youth cultural, education-oriented or interactive educational measures and programmes. Elements of mediation, anti-racist and intercultural training, anti-violence training, and training in social and personal skills are applied insofar as they are deemed as having a sufficiently positive impact on the work, particularly in terms of reducing extremist/misanthropic attitudes and violence. Last but</p>

	<p>not least, projects fulfil the role of using common interests to bring together members of extreme-right/misanthropic cliques and scenes and persons from outside (extreme) right-wing/misanthropic environments.</p> <p>Community work: Community work is an important part of our strategy, as it is safe to assume that the problems the youths cause are largely related to their own existing issues. Misanthropic, extremist and violent attitudes and behaviours displayed by young people cannot simply be viewed as individual misconduct, but rather result from socialisation contexts presented to the new generation by the adult community. That's why, in addition to family, school and other important socialisation authorities and institutions, responsibility must also be shown to the community as a whole. Associations, clubs, societies, trade unions, churches and other socially relevant groups form what is known as a the local civil society, i.e. in the district, suburb and neighbourhood. These must also get involved, and be supported, when it comes to combating extreme right/misanthropic attitudes in the social environment</p> <p>Biographical work: This assistance, consisting primarily of clique work aims to achieve more cases of individual aid through social educational processes involving increased contact and trust. The focus areas here include the individual biographical and life-related aspects of various clique members, which can be identified by staff as critical elements of right-extremist orientation. Where possible for the respective educators, these past, present and future aspects are either addressed based on discussions, activities and needs (e.g. through flow charts) or are pursued further through mediation and assistance with other, e.g. therapeutic, services.</p>
Country of origin	Germany

Name of the practice	6.6.10 Family Counselling
Description	<p>The intention of Family Counselling is to support parents of “foreign fighters” or youths at risk to be radicalised and guide them in their communication process with their radicalised children and prevent the recruitment of vulnerable youths. It is designed to support parents during the absence of their offspring as “foreign fighters” and to support parents within the return process of their radicalised children.</p> <p>Approach The project extends consultation and support to parents or other alarmed persons worried about young people who are either attracted by the idea to become a “foreign fighter“ or who are already involved in combat operations.</p> <p>After getting in contact via a special hotline, the trainers organise personal meetings to address the parents’ fears and to point out options for action.</p> <p>The counselling aims at enabling them to stabilise their relationship to the respective young person, in order to start a guided de-radicalisation process.</p> <p>Furthermore the team establishes a support network to involve the whole social and family environment in collaboratively creating an individual support programme, adjusted to the needs of the young person at risk.</p>
Approach	Family support Exit strategies
Target audience	Families Violent extremists Youth/pupils/students
Evidence and evaluation	The feedback of the target group (parents and relatives) has been that the approach means a great help for them and the problems they are facing with their offspring.
Sustainability and transferability	The transfer to UK is planned by our project partner Centre for Democratic Culture (ZdK).
Geographical scope	Baden-Württemberg, Bavaria, Hesse, Rhineland-Palatinate (DE)
Start of the practice	The counselling is part of a service offered in cooperation between four NGO’s and the Federal Office of Migration and Refugees of Germany which is part of the Federal Ministry of the Interior (BMI). It was started in 2012.
Presented and discussed in RAN meeting	RAN INT/EXT, 26 May 2014, Berlin
Relation to other EC initiatives	Initiator and founder member of ENoD (European Network of De-radicalisation). Member of Advisory Board of Impact Europe.

Organisation	<p><i>The NGO Violence Prevention Network is a group of experienced specialists with many years of experience in the fields of prevention of extremism and de-radicalisation. Various federal ministries, state-level justice departments, state-level and national security agencies and institutional partners have worked closely with the association from its inception and value the group's high degree of knowledge, competency and outstanding reputation. The main focus of Violence Prevention Network is to work directly with radicalized people at different stages of radicalisation. The aim is to support them in developing distance to inhuman ideologies and violent behaviour. The organisation's projects have been or are financed by institutional, regional, federal funds, the ESF or the European Commission.</i></p>

7 Delivering alternative narratives

7.1 General description

This approach consists of delivering alternative narratives, in order to challenge extremist ideas either online or offline.

Propaganda spread by terrorists and violent extremists is easily accessible. It is harder to predict and detect violent extremist actions, as extremist messages are spread more widely, rapidly and effectively via Internet and social media and authorities are often not able to hold people accountable for this propaganda. 'Reducing accessibility to online terrorist material is important, whilst acknowledging the difficulties in ridding the internet of *all* terrorist material. Whilst efforts in reducing accessibility to terrorist content are important, they, on their own, will not prove an effective enough deterrent. It has become increasingly apparent that preventing and tackling radicalisation leading to terrorism and violent extremism is not only a security issue, but is also about addressing public opinion and countering and challenging extremist ideologies, also known as 'winning the hearts and minds'.

The term 'alternative narratives' is used here to encompass all on- and offline communication activities which directly or indirectly challenge extremist propaganda in different types of fora such as, for example, face-to-face, using testimonials, blogs and chatrooms, websites etc. One of the most important lessons of alternative narratives is that different types of opinions and ideologies are held by different audiences and that this broad spectrum must be identified and its audience must be specifically targeted if alternative narratives are to be effective. This can vary from the micro-level focusing on disengagement of individuals to a more broad societal approach at the macro-level. Counter-narratives are a more commonly but since this implies that extremist hold the 'main' narrative, the term alternative narrative is used here instead.

7.2 Aim

Alternative narratives (AN) directly or indirectly challenges extremist propaganda either online or offline (or a combination). Alternative narratives can vary from a counter-information campaign challenging the message of extremist groups on a more factual basis or counter-narratives which discredits and de-legitimises the extremist narrative and provides an alternative.

There is a broad spectrum, from hard end one-to-one de-radicalisation to a softer end targeting a much wider audience (many-to-one) in which counter-narratives can be utilised.

7.3 Methods

There is a broad spectrum of alternative narratives which can be delivered to and by different target audiences:

- Political alternative narratives by government, government leaders, communication and policy advisors focus countering the idea of “us” against “them”.
- Moral alternative narratives by key members of civil society, representation groups (including victims), families, social workers and peers focus on the immorality of killing and the use of violence
- Religious alternative narratives by religious leaders, institutions and communities basically highlight the same issue as moral alternative narratives, but convey a message of crimes and atrocities being against religious values.
- Social alternative narratives by former violent extremists to promote the message that there is nothing heroic about violent extremism

Within the different alternative narratives spectrum additional methods can be utilised:

- Counter-messaging is a component of alternative narratives that uses statistics and facts to dismantle assumptions that are not based on facts or measurement (e.g. numbers of casualties from terrorist attacks).
- Promoting democratic values and resilience by using testimonials of victims is a form of an alternative narrative.
- Counter-imaging consists of stripping the image off romanticised extremism by using images of what actually happens on the ground i.e. killed civilians, women and children, for example.

Alternative narratives can be disseminated either online (YouTube, special forums, Twitter etc.) or offline (in the classroom for example).

7.4 Lessons learned

One of the most important lessons of alternative narratives is that different types of narratives are held by different audiences and that each part and its audience must be separately targeted if alternative narratives is to be effective. This can vary from the micro-level focusing on disengagement of individuals to a more broad societal approach on the macro-level. Each requires a distinct approach in terms of the message, messenger, tactics and partnerships. One should also realise that alternative narratives alone isn't going de-radicalise people. It is only one aspect which can be utilised alongside a combination of interventions.

7.4.1 Actors, goal setting and scope

- There are a number of actors who may wish to undertake an alternative narrative campaign. The most likely is a government who has the financial capacity and vested interest to tackle a violent extremist ideology. The alternative narrative strategy may be undertaken directly by a government department or indirectly by an advertising agency, NGO or civil society practitioner or various combinations of these actors. Civil society practitioners, religious leaders, school teachers or community leaders are some examples of other actors who may also undertake alternative narratives to address extremist ideologies.
- Unlike other forms of interventions available in this handbook, the most common goal of alternative narrative will be uniform: Actors will be aiming for the maximum level of success i.e. deterring an individual or group from violent extremism and changing their opinion, or at the minimum success level, raising doubts in minds of an individual on the path towards violent extremism. However, more specific goals will vary. Depending on who is undertaking the alternative narrative, there needs to be a consensus on what these goals are and what strategic

approach should be taken. The first step is asking, “Who is being targeted?” An individual, a defined group or mass public opinion? Depending on who is being targeted, what is the appropriate strategy, at what level (micro, meso or macro) do we engage? What budget and resources are available? The answers to these questions will define the strategy and scope of the work.

- The scope of the campaign is important to establish at the beginning. How long will this campaign run for? Is it reactionary, in direct response to a recent extremist incident? Or is it a prolonged campaign aimed at changing public opinion over time? E.g. anti-smoking or anti-drunk-driving campaigns. The scope and length of the project will determine which messengers and media to use to disseminate the campaign.
- Defining the target audience with specificity is crucial to success. Questions to consider include:
 - Who do we want to influence?
 - What influences them (facts, emotion)?
 - What type of engagement do we want to use (mass, public or specific)?
 - Where or which medium is most appropriate?
 - When is the most advantageous time to schedule engagement?

Potential challenges

Deterrence, prevention and changing public opinion are difficult to measure. Therefore some measurable targets should be established from the outset. Online alternative narratives will be easiest to measure as hard analytics of viewers, level of engagement and impressions will be available on many online platforms and social media websites. In-person testimonials will be harder to gauge. Attendance can be an important measure but before and after surveys asking for participant’s opinion are also an option. It is important to bear in mind that volume of attendance/online views or “going viral” may not be an objective quantifiable threshold. Extremist online narratives can be a concern with just hundreds of individuals having engaged with them, and rarely have gained traction with millions.

7.4.2 Dissemination: messengers and mediums

Credibility and trust worthiness of the individual, group or institution delivering the message or narrative is just as important, or maybe even more important, than the message itself. Different messengers should be utilised for the different types of alternative narratives. Five types of messengers for the different layers in alternative narratives can be distinguished:

1. Government

Government leaders, communication and policy advisors are most suited to deal with the political counter narrative.

2. Civil society

Key members of civil society, representation groups (including victims) and journalists are deemed credible to counter moral narratives. Families, social workers and peers can also play a role in this respect.

3. Religious leaders, institutions and communities

Whilst governments are best to steer clear of involvement in religious counter narrative. For instance to counter extreme Islamists and Jihadi’s, mullahs, imams and Muslims in general are best equipped to engage in this type of religious counter narrative.

4. Formers

Former violent extremists may in some cases be appropriate messengers for deploying the social alternative narrative to promote the message that there is nothing heroic about violent extremism.

5. Victims

Victims are considered to be credible messengers as their testimonials can divert (potential) radicals from becoming violent extremist.

Potential challenges

It is important to note that it doesn't come naturally to all these different groups to deliver alternative narratives. In most cases, delivering alternative narratives requires coaching, training and empowerment to be able to do so. Disseminating victims' testimonials through a victims' organisation website might not be an effective medium. Although victims are considered credible messengers, the question is who will surf to a victim's organisation website with the explicit aim to watch a testimonial. Testimonials therefore should also be integrated on other websites and shown by other organisations. The testimonies or links directing to them could be part of a youth or local community organisation for example.

7.4.3 Dissemination

- The dissemination channel should be chosen carefully and is fully dependent on the aim and target audience. For instance, deep one-on-one work in a chat forum may take months and have a profound impact on only one individual, while a counter-narrative may have a much wider penetration on hundreds of at-risk individuals.
- Channels to disseminate counter communications include both old (traditional) and new media. Types of traditional media include newspapers and print journalism or television. More traditional still is the avenue of in-person outreach at group events, for example, in community halls or schools, or one-on-one engagement with a social worker or psychologist in a de-rad programme. New media includes online fora such as blogs, chatrooms, websites and social media platforms such as Facebook, Twitter and YouTube etc. Messaging services such as WhatsApp can also be used but these would likely be used on a much smaller scale. Victims' testimonies for instance can be collected on a website or forum. The website can provide information, inspire, create awareness and galvanise people, but also build social networks, provide a library with background information and workshops for teachers and provide expertise for the media.
- The timing of delivery and scheduling of countering-communications is extremely important and will relate heavily to the scope of the project. If it is a reactionary campaign, perhaps the best time to begin alternative narratives is in the immediate aftermath of the incident. If it is a short to medium length campaign, in response to a prolonged event, for instance the Syrian conflict, timings of delivery are important. How often is the campaign producing content? And how often should this content be updated or advertised using alerts? If engaging in public outreach events, it might be important to consider local holidays and festivities. Is the event planned during summer holidays? Timings of dissemination should be planned strategically in order to have the opportunity for maximum impact.

Potential challenges

- There is the possibility that counter-narratives can be counter-productive in the sense that they can evoke an extremist backlash. Efforts to tackle extremist ideologies can be attacked by extremists with false and conspiratorial claims about motives and even worse, with online and offline threats.
- Counter messaging can feed into the extremist argument, so on a micro-level it is not likely to work as a de-radicalisation instrument. However, it can be effective on a macro-level with a preventive purpose to influence public opinion.
- Online success does not generally come in isolation; the success stories are generally linked to offline activities - e.g. community mobilization.
- Sustainability and consistency of alternative narratives efforts is a serious challenge. In particular if one seeks to have user-engagement online, a one-off counter-narrative video is not going to be effective. Sustainable alternative narratives require a big financial investment.

7.4.4 Content and message

- Successful online alternative narratives have in common with their target content an effective branding campaign, often effective use of music, a polished production and compelling stories.
- Linking to existing narratives: It can be effective to link to narratives which are already popular as it takes the counter-narrative directly to the target audience. This may be by posting an “in response to” video on YouTube linking to the extremist content, or by penetrating an extremist group through the music they like.
- Emotions are important: Success is not achieved through evidence alone, which can always be refuted and countered. Instead, they need to appeal to human emotions
- Humour entertains: Especially from credible sources, humour can be a disarming way to share the counter-narrative, however given the subject matter humour should be used carefully and in a sensitive manner.
- Alternative narratives alone may not interrupt the radicalisation process or may not de-radicalise individuals, but it can deconstruct extremist messages for individuals at risk. Online alternative narratives should go hand in hand with counter-measures in the offline domain, for example, by educating young people at schools about the consequences of violent extremism. Internet and social media might place seeds of doubt. However ties between people (bridging and bonding) that open the possibility for a change of mind can be persuasive where possible.

7.4.5 Evaluation

Evaluation of alternative narratives is notoriously difficult as measuring peoples’ opinions is difficult and measuring prevention is impossible. Therefore evaluating the impact of the campaign will relate directly to the goals set. For online campaigns it may be levels of interactions including comments and views. For in-person testimonies, an evaluation form or questionnaire distributed before and after the event can be helpful. Such a questionnaire can also be useful for the de-briefing process and to compose lessons learned for future sessions.

7.5 Practices

The following counter-narrative practices are discussed:

- Abdullah X
- CENAA - CENAA (Extremism as a security threat in the Gemer region (South-East of the Slovak Republic))
- HOPE - Hope not Hate
- Muslim-Jewish Dialogue
- Political Capital Institute - Turulpata Facebook page
- Sisters Against Violent Extremism (SAVE) - Witness of history
- Terrorism: How about listening to what victims have to say (AfVT)
- The AAS - no-nazi.net
- UFUQ - What’s up

Name of the practice	7.5.1 Abdullah-X Project
Description	<p>The Abdullah X aims to provide innovative and robust animated/multimedia content to build resistance to extremist narrative and the allure of radicalisation.</p> <p>Abdullah X is a cartoon image of a teenage, Muslim boy who is looking for his identity and place in society. The character has changing appearances to reflect that this is not a particular person but it could be anyone struggling with issues of identity, faith, belonging, a sense of duty, grievance, injustice, confusion etc. The message is more important than the characters' look. The choice to use a fictitious character came from the observation that many extremists use their narrative to create an alternative reality that young people engage with online from the confines of their own bedroom. The objective of Abdullah-X is to radically challenge online extremist messaging using hard hitting, robust and specialist, subject based knowledge. But also, in light of much of the extremist content, deliver entertainment, engagement and feed young people's curiosity.</p> <p>Abdullah-X is seen as a prevention method, not only online but also offline in schools. Abdullah-X can be found on YouTube: https://www.youtube.com/user/abdullahx</p>
Approach	Delivering alternative narratives Educating young people
Target audience	Youth/pupils/students Local Community Organisations/NGOs Online
Deliverables	Animated Videos
Evidence and evaluation	Extensive quantitative and qualitative evaluation in a six week pilot period. There have for example been 60,000 views of videos in this period.
Sustainability and transferability	To uphold an animated online campaign, sustainable funding is required. This is a challenge in this area of expertise. The concept of using animated characters in counter-messaging online is transferable by other content-creators. It is important that the character and stories are recognizable for the targeted audience.
Geographical scope	United Kingdom - online available
Start of the practice	January 2012
Presented and discussed in RAN meeting	RAN @ working group and RAN High Level Conference 2014
Organisation	<i>NGO based in UK and currently Self-funded</i>
Country of origin	United Kingdom
Contact details	Ahmed (via abdullahxteam@gmail.com) www.abdullahx.com

Name of the practice	7.5.2 CENAA
Description	<p>Our approach consists of three elements, each focusing on one aspect of the issue of radicalisation in Slovak society: first-line practitioners and people in daily contact with manifestations of extremism on the local level, representative of political parties and policy-makers on different levels and so called “reluctant radicals”, i.e. people with tendency to vote for extremist party under certain circumstances.</p> <p>Firstly, our aim is to provide a platform for local actors to discuss their experience and opinions of the most pressing issues of the region and to share best practices how to counter extremist actions. The target region of the project, Gemer, is located on the south-east part of the Slovak Republic and it is a region with serious socio-economic problems along with extremely strained relations among majority and minorities, especially Roma. With the support and knowledge of local NGO representatives, who are well-known and accepted by local citizens, and by applying the Chatham House Rules on the discussions ensuring sincerity and relaxed attitudes, we are successful to encourage people to speak openly, freely and without any fear. As a result, the discussion platform is set up, taking local actors as partners in the process of formulating a strategy of countering extremism in their surroundings, rather than lecturing the target group.</p> <p>Secondly, our aim is to strengthen importance of the topic of extremism and radicalisation in political discourse and to contribute to “politicize” the problem. We also enforce the discussion with representatives of major political parties in the Slovak Republic as well as representatives of municipalities in target regions in order to turn the attention of major political parties on the issue of extremism and radicalisation in the society and to formulate strategies to deal with this security problem on the policy level. Via ongoing consultations with political parties’ representatives, mayors and young political party’s members we push the sensitive issues and force political representatives to take a position.</p> <p>Thirdly, as a reaction to the electoral success of leader of right-wing extremist political party in gubernatorial elections, we also explore the development of voting behaviour in Central Slovakia region in elections in general. In practice it can also help us to design possible interventions in order to shape people’s perceptions. Based on the Moral Foundations Theory and Theory of Political Attitudes, employing these research methods will also create opportunities for designing experiments based on story editing, and intervention techniques devised to reshape people’s narratives about themselves and the world in a way that results in lasting behavioural change. As a result, we will test and analyse possible ways how to communicate and frame sensitive issues in the public discourse.</p>
Approach	<p>Delivering alternative narratives Training for first line practitioners</p>
Target audience	<p>First responders or practitioners Educators/academics General public</p>

Deliverables	<ul style="list-style-type: none"> • Report and Policy Recommendations resulting from round table meetings, elaborated in cooperation with first-line practitioners. • Report and Policy Recommendations resulting from the face-to-face consultations with major political parties' representatives. • Report and Policy Recommendations resulting from the consultations with candidates in European Parliamentary Elections. • Report and Policy Recommendations resulting from case study of successful local practices and problematic regions (to be published in 2015). • Design of an intervention reshaping people's narratives and perceptions.
Evidence and evaluation	<p>Our practice is constantly consulted with external experts and external collaborators from NGO as well as academic community, and monitored and evaluated with the help of qualitative as well as quantitative techniques.</p> <ol style="list-style-type: none"> 1. Ongoing monitoring of performance of political parties and evolution of their attitudes over time is carried out, following the continuous face-to-face consultations, with the use of regular in-depth interviews and collection of data via questionnaires. 2. Opinion polls and surveys, carried out in cooperation with well-founded research agency in Slovakia, focused on moral foundations and political attitudes of voters from targeted regions, with aim to create the picture of voters of extremist parties, serving as a basis for interventions design. 3. Testing and evaluation of interventions via cognitive interviews and questionnaires testing the shift in attitudes over time.
Sustainability and transferability	<p>The main benefit and potential of our approach is the respect for specificities of local contexts and emphasis on the proper methodology in collecting data as well as in the testing and evaluating of interventions. We understand our activities as experiments, designed in a way that is transferable and testable also in different contexts and therefore also providing possibility to analyse the efficiency and success in broader context.</p>
Geographical scope	<p>Slovak Republic, especially Central Slovakia - Banská Bystrica Region</p>
Start of the practice	<p>The practice was launched in 2012 and its implementation is still evolving and ongoing.</p>
Presented and discussed in RAN meeting	<p>RAN DERAD meeting in Dublin, 9.-10. April 2013 RAN DERAD meeting in Ljubljana, 8.-9. July 2013 RAN DERAD meeting in Berlin, 25. March, 2014 RAN Plenary in Brussels, 16. June 2014 RAN HLC in Brussels, 17. June 2014</p>
Relation to other EC initiatives	<p>Member of ENoD (European Network of De-radicalisation) Moreover, CENAA is also project partner in "European Fair Skills - De-radicalisation Training for Peer Role Models and Youth Workers (EFS)" project, coordinated by Cultures Interactive.</p>
Organisation	<p><i>Centre for European and North Atlantic Affairs, NGO, independent think tank based in Bratislava, Slovakia, focusing mainly on research and educational activities in the field of foreign and security policy.</i></p>

	<i>The project focused on extremism as a security threat in the region of Central Europe is research, training and educational project, organized in broad cooperation with local NGOs and academic community and financially supported by Open Society Foundations.</i>
Country of origin	Slovak Republic
Contact details	<p>Tolstého 9 811 06 Bratislava Slovak Republic</p> <p>Radka Vicenová, Programme Director for Emerging Threats vicenova@cena.org</p> <p>(+421) 907 391 993</p> <p>www.cena.org</p>

Name of the practice	7.5.3 HOPE not hate
Description	<p>Using intelligent counter narratives to challenge extremism (for instance the #wearethemany hashtag online). Empowering communities to challenge hatred/violent extremism when it presents itself. Provide a positive antidote and diversionary focuses to the extremists’ narrative. To provide accurate and salient analysis of extremist groups through research. Empower communities to tackle myths and inaccuracies through blogging, newspapers, leaflets, meetings, videos, education, speeches, T-shirts etc.</p> <p>To destabilise extremist campaigns by undermining their credibility with sober, honest and accurate assessments on sensitive issues. Also providing platforms and support for vulnerable individuals to speak up and speak out against extremists in their communities.</p> <p>As well as a bi-monthly publication, HNH has three separate blogs and roving news links that provide up to date information and intelligence on extremists. HNH also has a large social media presence where we interact with individuals and the public, constantly providing them with a dialogue of information, resources and also-very importantly-positive news and stories about work that is being done not just against extremism, but also to highlight empowering good practice in others.</p> <p>We feed into this resource by having constant and ongoing research, analysis and education. We also work extensively with people inside hate/extremist organisations and also ex-extremists to provide a non-sensationalist view of extremist groups and individuals that are based on FACT.</p> <p>HOPE not hate publishes 4 research documents per year, separate to the magazine and website. We are currently working on voter registrations, to encourage people to make their voice heard by voting in elections-a sure way to counter extremism at the ballot box.</p>
Approach	Delivering alternative narratives Exit strategies
Target audience	Online Violent extremists Formers
Deliverables	<p>HOPE not hate has produced widely reported handbooks and reports into XRW and violent Muslim extremists and in January 2015 released ‘State of Hate’ our annual and in-depth accurate assessment of the XRW in the UK, which was widely reported around the world. Our staff are regularly quoted and interviewed in the media. Our most recent documents are:</p> <ul style="list-style-type: none"> - ‘Army of the Right’ about Britain First, a Christian Fundamentalist /Counter-Jihad /fascist hybrid (!), who have been carrying out ‘Mosque invasions’ in Britain. - ‘The Gateway to Terror’ an investigation into the recruitment of young Muslims to the Al-Muhajiroun network, recruiting foreign fighters and individuals engaged in acts of domestic terrorism. Gateway to Terror revealed that at least 70 people who have been convicted of terrorism or terror-related offences, or who

	<p>have actually participated in suicide attacks, have been linked to the group. It drew international attention.</p> <ul style="list-style-type: none"> - 'Signs of Hate 2' an update on the modus operandi of the extreme far-right both domestically and internationally, through exploring symbols, music, tattoos, codes and online activism. Produced in association with the London Probation Service for use in schools, colleges, universities, prisons and the probation service.
Evidence and evaluation	<p>HOPE not hate is widely credited with the defeat of the far-right British National Party in the 2010 elections and by campaigning and educating, the long term demise of the organisation.</p> <p>There are thousands of testimonies of the work HNH has done, perhaps the best and easiest being a song written by Billy Bragg in honour of us.</p>
Sustainability and transferability	<p>The key aims of the organisation are quite transferable and there are plenty of imitators who imitate key arts of HNH-in particular in online behaviour, humour, expose and investigation of online extremism.</p> <p>The wider practices of research and analysis are not so well replicated but within each state there are experienced individuals who beaver away quietly who are capable of providing an accurate and historical picture of the practices and modus operandi in each country of individuals. Intelligence, and understanding accurately (and intimately) the target issues is essential. HNH has formed its own networks with such individuals. Wider campaigning can be directed to, and on conjunction with, unearthing the good individuals and the good practices that already exist in communities.</p>
Geographical scope	London, Essex, Hampshire, Wales, Scotland, Lancashire, Yorkshire.
Start of the practice	HOPE not hate first appeared in March 2004 during a political campaign by neo-Nazis in the north of England. The organisation's roots are traceable for over fifty years. The educational arm was established as a separate entity in 1986.
Presented and discussed in RAN meeting	RAN Prevent, Berlin 2013.
Organisation	<i>HOPE not hate (HNH) is a registered "third party" non-sectarian, non-partisan organisation. HOPE not hate has a campaigning wing, a research department and a charitable education arm. HOPE not hate is self-funded by parochial money, charitable trust(s), Trade Union funding and individual donations. If and where possible, HNH undertakes paid work on projects. We currently have one dozen short term "community organisers" working in communities to strengthen civil and progressive society. HNH receives no government or European funding.</i>
Country of origin	HOPE not hate is based in, and works throughout, the United Kingdom
Contact details	<p>Po Box 67476 NW3 9RF, London United Kingdom</p> <p>Matthew Collins Matthew@hopenohate.org.uk</p>

Name of the practice	7.5.4 Muslim-Jewish Dialogue - prevention, deconstruction of anti-Semitic ideology as part of “Islamist” ideology
Description	Muslim-Jewish Dialogue - prevention, deconstruction of anti-Semitic ideology as part of “Islamist” ideology is a project of regular meetings of Muslim and Jewish multipliers of the Muslim and Jewish communities, events, presentations, discussions. Partly supported by a section of the foreign ministry.
Approach	Delivering alternative narratives Educating young people
Target audience	Youth/pupils/students Educators/academics Prison/probation/judicial practitioners
Evidence and evaluation	Muslim Jewish Dialogue: positive feedback, successfully transmitted into the different communities and might be supported by the ministry for integration and foreign affairs.
Sustainability and transferability	Muslim-Jewish dialogue project is already a transnational one, supported by Foundation for Ethnic Understanding.
Geographical scope	Austria and Germany
Start of the practice	Muslim Jewish Dialogue started at 2010.
Presented and discussed in RAN meeting	2014, January 30th, Den Hague, Cities Conference on foreign fighters (discussed/mentioned during the different working groups) 2013, July, 8-9th, Ljubljana, Slovenia, presented and discussed (Muslim Jewish Dialogue, anti-Semitism).
Relation to other EC initiatives	Member of ENoD (European Network of De-radicalisation)
Organisation	<ul style="list-style-type: none"> - NGO as part of a Network. - Not funded at the moment, except for wages paid for seminars and workshops on this matter. - Partially supported by being an employee at the University college of Linz as an expert on extremism and de-radicalisation and prevention.
Country of origin	Austria

Name of the practice	7.5.5 Turulpata Facebook page - Ridiculing the Radical
Description	<p>The extreme right uses the Internet and especially the new Social Media tools very efficiently to spread its ideology and worldview. The far right lives and dies by provocation which gives it the image of an honest, revolutionist and ‘frightful’ force. Diabolisation and stigmatisation backfire in the long run. The practice is based on the assumption that making far right ideas the subject of ridicule is a much more effective strategy than all other efforts. The far right’s simplistic, bombastic and single-minded ideology offers an excellent target. Turulpata Facebook page aims at preventing and countering radicalisation by reducing both the attractiveness of the extreme right ideology and the receptivity of youngsters for extreme right ideas. Target groups of the project are potential future voters and supporters of far right political movements.</p> <p>Turulpata is a fictitious settlement inhabited and led by far-right minded people in Hungary. Posts on Turulpata Facebook page reflect on current issues of Hungarian domestic politics, popular beliefs, sports and hobbies on the far right scene, and symbolic persons of the far right.</p>
Approach	Delivering alternative narratives Exit strategies
Target audience	Youth/pupils/students General public Online
Deliverables	Posts on Turulpata Facebook page include photos, modified ads, leaflets, posters, memes and videos. Posts are usually based on the own contents of the far right put in ridiculous context.
Evidence and evaluation	Turulpata Facebook page has currently 8474 followers. The reach of posts with ridiculing modified pictures and texts vary between 3000 and 21000. Such posts gain several hundred likes. 84% of Turulpata Facebook page’s followers are aged between 18 and 44.
Sustainability and transferability	The practice is highly sustainable and transferable since it does not require many resources. Creative people with experience in image editing are required to publish fresh content on the page and keep it updated. Characteristics of the page and the content published on it should be based on local knowledge and context (e.g., name of the Facebook page, current news and topics, far-right actors, popular beliefs etc.).
Geographical scope	Hungary
Start of the practice	The practice was developed in the early months of 2013 and the Facebook page was launched on 16 April 2013
Presented and discussed in RAN meeting	RAN PREVENT meeting in Barcelona, 26-27 June 2014
Relation to other EC initiatives	Non

Organisation	<i>The practice is implemented by Political Capital Institute Ltd. (Hungary) a political research and consulting institute with one decade of experience in research on conspiracy theories, right-wing extremism and prejudices; and Free Market Foundation. It is an LTD. Foundation and the project is financed by private donors, but did not receive European funding.</i>
Country of origin	Hungary
Contact details	<p>Futó u. 47-53 1082 Budapest Hungary</p> <p>Péter Krekó, director kreko@politicalcapital.hu</p> <p>(+36) 1 430 66 99</p> <p>https://www.facebook.com/Turulpata</p>

Name of the practice	7.5.6 Terrorism: How about listening to what victims have to say?
Description	<p>The AfVT.org was created to fight radicalisation by promoting an open dialogue between victims of terrorism and the rest of the society. In this respect, a specific program known as “Terrorism: how about listening to what victims have to say?” was built whereby conferences are organised involving different audience and locations. The 1st meeting was set up on the 1st of July 2010 in Paris at a building owned by the mayor of Paris.</p> <p>Since then AfVT.org has set up other meetings including two with 500 high school pupils, one with the youth of the suburban city of Sevran (coordinated with the local association I.D.E.E.S.).</p> <p>A meeting involving 5 different victims and 60 inmates (some of them were convicted for terrorist crimes) was also organised in April, 2015.</p> <p>Through conferences and debates led by victims of terrorism, AfVT.org encourages young people to be involved in the society in order to fight against radicalisation. It requires the promotion of citizenship and mutual understanding, and to make victims more visible to young and/or vulnerable people who may become victims of radicalisation and extremist recruiters.</p>
Approach	Delivering alternative narratives
Target audience	Youth/pupils/students Families Victims of terrorism
Deliverables	Follow up with local and official partners Use of 21 videos produced through the EC Home Affairs program, “Victim’s Gathering: the voice of the survivors against radicalisation” Production of 10 additional videos by AfVT.org involving French victims of terrorism
Evidence and evaluation	<p><i>Schools: each meeting with pupils gathered 30 to 250 persons Locals: each meeting with youngsters, families and local actors gathered 40 to 60 persons</i></p> <p><i>Prison: the 1st meeting on April 2015 was clearly a success with 120 inmates who sent a request to attend “Terrorism: how about listening to what victims have to say?” This number is the highest rate for an event set up inside the prison. Due to safety reasons, “only” 60 of them could attend this first meeting that took place in the biggest prison in Europe. Other meetings are planned in the future.</i></p> <p><i>From the ground, it seems that the best way to measure the performance of the meeting is to set up several events in the same locations in order to empower our partnership with local and official partners and to know better our targets</i></p>
Sustainability and transferability	<i>Intervention at the High School of Vannes: one-day action with three speakers. The event was set inside the high school. Speakers attend</i>

	<p><i>the conference as volunteers (for free). No extra fees are required except transportation of the speakers. This kind of meeting is totally transferrable to other regions.</i></p> <p><i>Intervention at Sevran: one-afternoon conference with three speakers who attend the event as volunteers (for free). The event was set in the building of a local association for free. No extra fees are required beyond transportation of the speakers. This kind of action is totally transferrable including to other regions and other local partners.</i></p> <p><i>Intervention inside the prison of Fleury-Mérogis: one-day intervention with 4/5 speakers who attend the conference as volunteers (for free). The event is set inside the walls of the prison so it requires a specific partnership with the prison authorities. Given the fact that prisons usually are on the outskirts of cities, it obviously requires extra fees for transportation. Once we have established agreement and partnership with the prison authorities, our action will be improved. This kind of intervention may be transferrable to other correctional facilities in other cities or other regions.</i></p>
Geographical scope	<p>Most of the practice is implemented in regional on the outskirt of Paris (France). Some of it in other French regions such as Bretagne (West of France).</p>
Start of the practice	1st of July 2010
Presented and discussed in RAN meeting	<p>7th of June 2013 - RAN-VVT meeting in Madrid (Spain) about “How to focus on how to trigger youngsters and how to prepare victims?”</p> <p>16th of October 2013 - RAN-VVT meeting in Roma (Italy) about “Preparing teachers/facilitators to work with testimonies and deal with radicalisation”.</p> <p>25 & 26th November 2014 - RAN-VVT meeting in Berlin (Germany) about “Victims & media”.</p>
Relation to other EC initiatives	The practice is based upon the lessons learned through the RAN-VVT working group and uses the videos from “Victim’s Gathering: the voice of the survivors against radicalisation” when it’s relevant due to the audience and speakers.
Organisation	<p><i>Association française des Victimes du Terrorisme (AfVT.org)</i></p> <ul style="list-style-type: none"> - <i>Legal status: NGO (association)</i> - <i>Financing organisation: FAVT (Fondation d’Aide aux Victimes du Terrorisme), Prime Minister, Ministry of Defence, Ministry of Home Affairs, Ministry of Justice and European Commission (Home Affairs: program « Victim’s Gathering : the voice of the survivors against radicalisation »)</i> - <i>Financing practice: FAVT (Fondation d’Aide aux Victimes du Terrorisme), Ministry of Justice</i>
Country of origin	France
Contact details	<p>5, Boulevard Pereire 75017 Paris France</p> <p>Guillaume Denoix de Saint Marc</p>

(+33) 9 82 47 83 96

<http://www.afvt.org>

Name of the practice	7.5.7 No-Nazi.net
Description	<p>No-nazi.net's work is based on monitoring, evaluating and combating hate speech and right-wing extremism in social networks and other parts of the digital world as well. Furthermore it promotes democratic values in cooperation with young activists online.</p> <p>The working method is to reach out to young people between the age of 13 and 18 to become active in their social networks. Peer to peer training is used to coach people on how to counter extremism online. Through online actions - funny, serious, informative or amusing -, no-nazi.net aims at building social networks without hate speech and neo-Nazis. Additionally young people who are showing first signs of radicalisation are being contacted via chats to question their actions and are given information and counter narratives.</p>
Approach	<p>Delivering alternative narratives</p> <p>Educating young people</p>
Target audience	<p>Youth/pupils/students</p> <p>Online</p> <p>Educators/academics</p>
Deliverables	<p>The project published four brochures and several videos within the context of online hate speech. Furthermore an active community was established in the Web 2.0 to foster a democratic narrative and prevent radicalisation regarding right-wing extremism. Also first line educators were trained in workshops on the subject of the special conditions of working against neo-Nazis within the online sphere.</p>
Evidence and evaluation	<p>No-nazi.net has been very successful in the social networks. Its Facebook page gained around 10.000 Likes. Some (mostly satirical) content reached over 300.000 people. Working in the Web 2.0 environment provides constant feedback which we seriously take into account for reflection and evaluation of our work. Additionally the project is reviewed regularly by an external advisory board of its main funding partner, the Federal Ministry of Family Affairs, Senior Citizens, Women and Youth.</p>
Sustainability and transferability	<p>No-nazi.net is first and foremost an online project. Therefore the practice is very easily transferrable to contexts with other languages in other countries. Although it is based in the web, one must still keep in mind that well trained personnel is needed for the practice to work. Its outcomes will be integrated into coming model projects after its next five year life span starting in 2015 and its working practices will therefore be sustained and incorporated in future ventures.</p>
Geographical scope	Germany, German speaking countries (online)
Start of the practice	No-nazi.net was established in May 2011 and is still running.
Presented and discussed in RAN meeting	RAN @, 2 March 2015
Relation to other EC initiatives	None

Organisation	<p><i>The Amadeu Antonio Foundation is a NGO in the legal form of a foundation. The organisation is working to strengthen democratic civic society and eliminate neo-Nazism, right-wing extremism, and anti-Semitism together with other forms of bigotry and hate in Germany.</i></p> <p><i>No-nazi.net is a model project under the roof of the Amadeu Antonio Foundation in Berlin. The project is funded by a program of the Federal Ministry of Family Affairs, Senior Citizens, Women and Youth and is co-funded by the foundation.</i></p>
Country of origin	Germany

Name of the practice	7.5.8 What's up?
Description	<p>Peer education in Social Networks</p> <p>“Was postest Du? Politische Bildung online mit jungen Muslimen” (“What's up? Civic education online with Muslim youngsters”)</p> <p>The project focuses on on-going discussions among Muslim youngsters on Facebook and aims at providing alternative perspectives and background information about social, political and religious questions to challenge highly visible Islamist narratives in Social Networks. As a pilot project, it explores innovative approaches to civic education online. Following a peer-approach, young Muslim adults that have been trained to engage in online-discussions, encourage Muslim youngsters to participate in public debate and to develop individual responses to relevant topics in society and politics. Addressing issues ranging from local politics, discrimination, religious issues to global conflicts, the project renders visible the diversity of Muslim approaches and intervenes in early stages of radicalisation.</p>
Approach	<p>Delivering alternative narratives</p> <p>Educating young people</p>
Target audience	<p>Youth/pupils/students</p> <p>Online</p>
Deliverables	<p>The results and experiences of the project will be published in several online-booklets that provide background information about how to address questions of Islam and democracy, gender roles, discrimination and the conflicts in the Middle East in online contexts.</p>
Evidence and evaluation	<p>The experience of the project are continuously exchanged and discussed with other projects working in the field of democracy education, violence prevention and civic education online.</p>
Sustainability and transferability	<p>As a pilot project, the experiences of the project will be presented and discussed in upcoming conferences to allow transferring its findings into other educational settings.</p>
Geographical scope	Germany
Start of the practice	The project started in March 2014.
Presented and discussed in RAN meeting	Collaborators of the project have participated in the RAN AG Prevent meeting in Prague, 13/14 Feb 2014, and discussed the concept in this meeting.
Relation to other EC initiatives	Member of ENoD (European Network of De-radicalisation)
Organisation	<p><i>Ufuq.de - Jugendkultur, Medien und politische Bildung in der Einwanderungsgesellschaft</i></p> <p><i>Ufuq.de is a Germany-based NGO and receives financial support through various government, EU and private grants. This project is</i></p>

	<p><i>funded by the Robert Bosch Foundation. Ufuq.de operates at the intersection of education, academia and public debate. It works primarily with youngsters of Muslim and/or immigrant background and aims at fostering a sense of belonging and empowering them against phenomena of Islamism and ethnic-nationalist ideologies.</i></p> <p><i>In addition, ufuq.de organizes trainings and conferences for educators and civil servants about youth cultures, Islam and Muslims in Germany, and prevent work in local communities and educational institutions.</i></p> <p><i>Ufuq.de regularly publishes educational material and scientific papers to inform a broader public about questions related to Islam and migration in Germany.</i></p>
Country of origin	Germany
Contact details	<p>Ufuq.de Wissmannstr. 20 12049 Berlin Germany</p> <p>Götz Nordbruch, goetz.nordbruch@ufuq.de</p> <p>(+49) 152 29271179</p> <p>www.ufuq.de</p>

Name of the practice	7.5.9 Witness of History
Description	<p>Terrorist recruiters are successful because their ideologies and actions resonate with youth when they are most vulnerable. At a time with they question the unfairness of the world, or feel alone, unheard or persecuted. SAVE's 'Witness of History' enlightens youth during their formative years to the reality of violent extremist ideologies and alternatives to revenge.</p> <p>Raw, honest testimony, up close and personal story telling is simply able to reach an audience better than any official speeches and abstract analysis. As victims and survivors, they speak from a position of authenticity, moral authority, and with personal conviction. So the Witness of History films give a human face to the tragic terrorist attacks and create a potent balance to the extremist propaganda.</p> <p>The personal stories of victims - particularly those who have made a personal journey- those who have become somehow stronger by the experience of grief and loss, those who do not feel vengeance and have something strong and positive to say - help blur the lines between black and white thinking. They plant a seed of doubt in the thoughts of those who might support violence or lack alternatives. It's a hearts and minds approach, to develop critical thinking as a deterrent against radicalisation.</p>
Approach	Delivering alternative narratives
Target audience	Online Youth/pupils/students Families
Deliverables	A series of dialogue workshops leads to the production of diverse short video testimonies.
Evidence and evaluation	<p>The Witness of History films contain personal stories but their contents are fact checked and controlled for quality, relevance and impact.</p> <p>Performance criteria include number and nature of positive anecdotal responses via correspondence, positive social media statistical feedback as well as number of requests for DVDs from law enforcement officers, journalists, educationalists as well as social and youth worker practitioners.</p>
Sustainability and transferability	<p>The initial phase of the Witness of History medium is both time and resource intensive with much input in sourcing willing witnesses and relationship building plus the subsequent filming and editing sessions.</p> <p>However the dissemination phase is comparatively cost/time effective with films reaching wide audiences over years - extending the longevity of the original investment.</p>
Geographical scope	India, Delhi and Kashmir region, Pakistan, Islamabad, Israel, Tel Aviv, and Palestine, Hebron as well as USA, New York.
Start of the practice	Witness of History was launched online 2008 from Vienna, Austria.

Presented and discussed in RAN meeting	RAN VVT
Organisation	<i>Women without borders is an NGO that is funded by the Austrian Federal Ministries for Social Affairs and Education.</i>

8 Creating Counter Violent Extremism infrastructures

8.1 General description

This approach consists of creating Counter Violent Extremism (CVE) infrastructures ensuring that people at risk are given multi-agency support at an early stage.

Governments cannot undertake counter radicalisation by themselves. In some cases, violent extremism may have been prevented if practitioners had worked together and shared information across hierarchies and sectors. A multi-partner approach in which actors have the ability, the knowledge and the capacity to identify and support individuals at risk, is essential. Practitioners working in organisations where individuals at risk could be identified should know each other, be able to share concerns and information and develop a combined approach to support individuals at risk.

In short, a multi-agency approach and a system where information can be shared - an institutional infrastructure - is crucial for identifying and dealing with vulnerable individuals who may be at risk.

8.2 Aim

- Recognising vulnerable individuals who may be at risk;
- Assessing the nature and the extent of the potential vulnerability or risk;
- Developing an appropriate support package to protect those at risk of being drawn in to violent extremism based on an assessment of their vulnerability;
- Ensure that relevant information is shared, faster/earlier and is fully coordinated.

8.3 Methods

A multitude of actors across levels of government and civil society may participate in counter-radicalisation. The following (non-exhaustive) list contains some of the key actors in relevant sectors:

Law Enforcement

- Police officers
- Prison wardens
- Probation officers
- Border control/customs officers

Youth workers

- Schools, Colleges and University teachers/tutors and lecturers
- Youth offending services
- Children's services
- Sports coaches

Government/Social work

- Social workers
- Local authorities
- Legal aid
- Housing authorities

Healthcare professionals

- Health services

- Psychologists
- Doctors

Civil Society

- Local community organisations
- Voluntary organisations and charities.
- Religious scholars/representatives

A threat assessment/vulnerability framework can be used to assess the individuals risk in terms of:

- Engagement with a group, cause or ideology,
- Their intention to cause harm,
- Their capability to cause harm,
- Additional information regarding risk of protective factors (family situation, health/social care assessments, housing situation etc.)

8.4 Lessons learned

8.4.1 Defining Goals and Strategy

- The objective of a multi-agency approach is to share knowledge and expertise of the counter-radicalisation programme in a more coordinated, effective and managed approach. It can also be an effective means of discussing individuals on a case by case basis in order to agree the most appropriate course of action to support that individual and contribute to problem-solving.
- A multi-agency approach should be applied at all stages; from radicalisation to de-radicalisation and disengagement during/after a prison sentence for example. All partners dealing with a (potential) violent extremist should have access to relevant (previous) information to be able to follow up adequately.
- To ensure a coordinated multi-agency approach, one organisation should chair and coordinate the process and have final responsibility over the programme and outcome. The lead organisation (local authority, police, etc.) will differ from one country to another, (but it should be clear to everybody which organisation is leading/project managing. The lead organisation may also differ depending on the case and the level of involvement of the organisation with the individual or family in question.
- The number of organisations and the extent to which they are involved will differ greatly from one case to another. However, partnership involvement ensures that those who are considered vulnerable have access to the widest range of support, from diversionary (such as sport) activities through to the provision of specific services such as education, housing and employment.
- Drawing upon the existing collaboration between local authorities, statutory partners (such as education and health sectors, social services, children's and youth services and offender management services), the police and the local community, instead of setting up a new arrangement is absolutely key in terms of efficiency and to avoid duplication.
- It is recommended that local agencies are provided with awareness building training/education material, which clearly articulates the threat of radicalisation, ways of identifying the threat, and models of working with individuals from the point of view from various agencies across sectors. Some level of training specific to counter radicalisation needs to be provided to all actors who will be involved, from senior management to front-line workers. Access to tool-kits and manuals that provide a framework for assessing and responding to the needs of at risk individuals could also be an important aid.

8.4.2 Information sharing and management

- Clear rules and guidelines about (confidential) information sharing are essential to the approach and information sharing agreements will be valuable in this process.
- It is recommended that steps be taken to build awareness, knowledge and skills in this area (information sharing) among actors and sectors relevant to counter-radicalisation in the EU. This should be done through knowledge transfer between Member States, and training and awareness-building activities at national level.
- Reciprocity is also key; all partners should share information with each other in a way that is proportionate and necessary in order to protect the interests of the vulnerable individual.
- While individuals will not always consent to information sharing, the right to privacy and confidentiality is not absolute. There may be situations where a professional judges a client to be a serious and immediate risk of harming himself/herself or others. In such circumstances, the duty to share information may override the professional duty to confidentiality.

8.4.3 Potential challenges related to information sharing

- The barriers to information sharing include: A lack of awareness and knowledge of radicalisation among certain sectors e.g. health workers, communities; a lack of knowledge of the legislative position with regard to information sharing and breaching confidentiality; the absence of a culture of information sharing within services or across sectors; the reality that some professionals work alone, and without access to peer-support or national expertise and; perceived ethical barriers to information sharing.
- States should provide reassurance that they will act within the requisite privacy laws and not misuse data provided. The State needs to acknowledge the fundamental rights of the individual to confidentiality, privacy and freedom from interference by the State. Clients of healthcare services and legal professions in particular have a reasonable expectation that their information will not be shared without their consent.
- Where a professional does breach confidentiality, this could have irrevocable negative impacts on the therapeutic relationship, trust in the health services in general, and future willingness to engage with health workers.

8.4.4 Cross jurisdictional cooperation

- There may be cases where multi-agency cooperation is required across borders. In this instance a lead agency should coordinate this process and learn from policies and procedures in place in other territories. Again, information sharing is key and so opportunities to disseminate knowledge across territories should be encouraged.
- In areas where there is no precedent for dealing with radicalisation towards violent extremism in particular sectors, actors should learn from/adopt similar practices in other relevant sectors. For example where clinical services have received referrals to review individuals who threatened violence (e.g. threatened mass shootings on social networking sites; psychiatric patients threatening to use explosives), knowledge from past experiences with former separatists or dissidents could be utilised and adapted for right wing and Islamist extremism today.

8.5 Practices

The specific practices that will be further discussed are:

- CVE - PSP (Psychiatry, Social Services and Police) co-operation
- Google ISD - Against Violent Extremism (AVE)
- Helsinki Police Department - Preventive Policing Unit
- The Danish SSP system

- UK NCTP HQ - Archer
- UK NCTP HQ - Channel

Name of the practice	8.5.1 PSP-network (PSP = Police, Social Services and Psychiatry)
Description	<p>Tailor made training course for the network</p> <p>The overall and primary goal of the project is to reduce potential radicalisation among vulnerable people with psychiatric and/or mental diagnosis in Denmark. It is difficult to measure as to whether the tailor-made course is sole responsible for a given effect in reducing the number of people in risk of radicalisation. Recognizing this difficulty the project is working with three secondary goals for the training course for key PSP-members.</p> <p>First, The aim of the tailor-made two-day training course is to raise the awareness of radicalisation among key members of the PSP-network as well as to give them knowledge of radicalisation as a social, psychological and political phenomenon. Second, the course aims at giving the participants knowledge of the Danish strategy and methods in preventing radicalisation in general as well as among mentally vulnerable people. Last, the course aims at giving the participants knowledge of the “standard-operating-procedure” in organisation and communication confronted with a concern of possible radicalisation.</p>
Approach	<p>Creating CVE infrastructure</p> <p>Training for first line practitioners</p>
Target audience	<p>First responders or practitioners</p> <p>Law enforcement officers</p> <p>Health practitioners</p>
Deliverables	<p>As part of the project the working group has developed a two-day training programme focusing on how to work with vulnerable people in the PSP-target group. The training programme/tailor-made course is organized so as to give a comprehensive introduction to risk factors, motivation and prevention of radicalisation among mentally vulnerable people. The perspectives cover the division of labour among social workers, police officers and psychiatry as well as the methods at work in these professions respectively.</p>
Evidence and evaluation	<p>For now the project hasn't been evaluated. The National Board of Social Services has made a contract with an external evaluator and the final evaluation of the project and the output/outcome of the training courses are expected in April 2016. The project doesn't operate with measuring target group impact as it is too complex and with too many variables to be able to say anything about the effect/impact of the trainings course. The evaluation will in addition focus on how to improve the citizen case handling so as to give recommendations and to qualify the casework.</p>
Sustainability and transferability	<p>The content is exportable and transferable to member states, but it has to be restructured to the local organisation and networks.</p>
Geographical scope	<p>As of February 2015 the project - and the tailor-made training course - has been held in 4 out of 12 local police district. The plan is that all police district and all PSP-key-members in each district have been offered the course by the end of 2015.</p>

<p>Start of the practice</p>	<p>The first part of the project was launched in October 2013 and ran until mid-October 2014. The idea was that the first part of the project should be the developing stage where the working group could put together a training course and put it to test in one local police district and in one municipality.</p> <p>The result of the initial stage was a two-day tailor-made course. The course was tested and ad hoc evaluated and in light of this knowledge the course was restructured and new themes included. The final two-day course is now offered to the lasting 11 police districts.</p>
<p>Presented and discussed in RAN meeting</p>	<p>RAN Health, Berlin, 18-19 April 2013 RAN Plenary, Brussels, 16-17 June, 2014</p>
<p>Organisation</p>	<p><i>The Danish effort in preventing radicalisation and violent extremism (CVE) is primarily organized in the SSP-network. The goal of the SSP-network is to prevent criminal activity and behaviour among youngsters. The network consists of members of the social services, schools and police.</i></p> <p><i>In 2009 the initial SSP-network was by law supplemented with the PSP-network. PSP is comprised of the local Police (P), Social Services/social psychiatry (S) and Psychiatry (P) and has its target group on vulnerable people with a psychiatric diagnosis in risk of recurring criminal activity.</i></p> <p><i>The PSP-project is located within The National Board of Social Services and is driven in close collaboration with the Ministry of Children, Gender Equality, Integration and Social Affairs, Ministry of Health and The Danish Security and Intelligence Services. The project is thus a governmental initiative but offered to the key organisations in the Danish local crime-prevention network.</i></p> <p><i>The PSP-project is also government funded and the participants don't pay a tuition fee to participate. The included organisations aren't compensated for sending their employees to attend the two-day course.</i></p>
<p>Country of origin</p>	<p>Denmark</p>
<p>Contact details</p>	<p>The National Board of Social Services Landemærket 9 1119 Copenhagen K Denmark</p> <p>Kristian Walther, The National Board of Social Services krwa@socialstyrelsen.dk (+45) 91370227 http://socialstyrelsen.dk/</p> <p>Bjørn West, Ministry of Children, Gender Equality, Integration and Social Affairs baw@sm.dk (+45) 41851092 http://sm.dk/en/</p>

Name of the practice	8.5.2 Against Violent Extremism (AVE)
Description	<p>Against Violent Extremism (AVE) is a network that aims to provide a platform for former violent extremists and survivors of violence to connect with each other to share ideas, collaborate, and identify partners and resources to find ways of amplifying their initiatives and message to a wider audience.</p> <p>AVE uses technology to connect, exchange, disseminate and influence all forms of violent extremism (from far right and far left to AQ-linked and inspired, and gangs). On the central AVE website formers and survivors can join the network, (also on Facebook, Twitter and Google +), find and assist related projects and connect to and support members of the network.</p> <p>The network has three primary functions:</p> <ol style="list-style-type: none"> 1. To connect credible messengers to one another so they can learn best practices and share ideas. 2. To match credible messengers to private sector resources, skills and support. In the aftermath of an extremist attack AVE can act as a positive outlet for members of the public wishing to ‘do something’ as they can register their skills and interests in order to get involved with AVE projects working to counter extremism. The AVE network and associated website will allow individuals and organisations to share practical expertise, pool resources and find donors or volunteers. 3. AVE advocates for the role which former extremists and survivors of violent extremism have to play in pushing back against extremist narratives to governments and international bodies. <p>In addition to the above, AVE also actively seeks to facilitate longer term project partnerships, from education programmes using members narratives to prison intervention programmes.</p>
Approach	Creating CVE infrastructure Training for first line practitioners
Target audience	Formers Victims of terrorism Online
Deliverables	Given the nature of AVE as a network, its deliverables to date have been: connecting credible messengers to each other to share best practices and ideas concerning countering violent extremism; connecting members to private sector funding; and facilitating the establishment of ongoing sub-projects between members and external entities. An example of the latter is the establishment of the Counter-Narrative Project that uses members’ stories for the purpose of educational resources to prevent violent extremism. This initiative started in Canada and is now being rolled out in the UK, Germany, and Hungary.
Evidence and evaluation	AVE is atypical in that it functions as a network. As such, AVE’s performance can largely be measured by the growth of the network and partnerships facilitated. To date, AVE has an ever-growing membership of over 2139 connections (306 formers, 164 survivors, and 69 projects inclusive). In addition to its quantitative successes AVE

	has also facilitated partnerships offline leading to the establishment of numerous sub-projects.
Sustainability and transferability	Through its network, AVE allows members to share ideas, collaborate, and identify partners and resources to find ways of amplifying their initiatives and message to a wider audience. Members are encouraged, to cross-pollinate their expertise, and transfer these to other local contexts. An example of this is Extreme Dialogue, a Canadian-based project. AVE provided film subjects for teaching resources in Canada to prevent violent extremism and the project helped to inform further work in Europe. Regarding the cost of practice, AVE is unique in that it receives private sector funding.
Geographical scope	Global: members reside and work in multiple cities across Africa, Asia, Australasia, Europe, Middle East, North America and South America.
Start of the practice	AVE was seeded in June 2011. AVE was formally launched in April 2012.
Presented and discussed in RAN meeting	<p>RAN-DERAD Working Group, ‘First line De-radicalisation Practitioners and Interventions’, 4-5th June, Stockholm</p> <p>RAN-DERAD Working Group, ‘De-radicalisation and Exit Interventions’, 10-11th October 2012, Barcelona</p> <p>RAN@ First Working Group Session, ‘Exploring innovative ways in which the Internet and social media may contribute to the fight against violent extremism’, 14th November 2012, London</p> <p>RAN@ Working Group, ‘Internet and Social Media’, 25-26th March 2013, London</p> <p>RAN@ Working Group on the Internet and Social Media, 29th January 2014, The Hague</p> <p>RAN INT/EXT Working Group, ‘Reintegrating foreign fighters’, 26-27th May 2014, Berlin</p>
Relation to other EC initiatives	<p>AVE provided assistance and networking opportunities to EU TerRa (Terrorism and Radicalisation), a European-based prevention and learning program.</p> <p>AVE facilitated the use of members’ testimonies for the ISEC Counter-Narrative Project (CNP).</p> <p>AVE surveyed our members and prepared a paper which fed into the INT/EXT working group paper: “PROPOSED POLICY RECOMMENDATIONS FOR THE HIGH LEVEL CONFERENCE, FROM THE RAN INT/EXT WORKING GROUP (DECEMBER 2012)”</p>
Organisation	<i>Against Violent Extremism (AVE) is a global network of former extremists and survivors of violent extremism dedicated to steering young people away from violence. AVE is a partnership between Google Ideas, the Gen Next Foundation and the Institute for Strategic Dialogue (ISD) and aims to build the capacity of its memberships to more effectively engage in violence prevention work of all kinds.</i>

	<p><i>AVE holds charity status in both the United Kingdom and United States.</i></p> <p><i>AVE's primary source of funding at inception was Google Ideas and the Gen Next Foundation. To date AVE still receives funding from Google Ideas.</i></p>
Country of origin	United Kingdom
Contact details	<p>48 Charles Street London, W1J 5EN United Kingdom</p> <p>Ross Frenett, Director AVE contact@againstviolentextremism.org</p> <p>(+44) (0)20 7493 9333</p> <p>http://www.againstviolentextremism.org/</p>

Name of the practice	8.5.3 Preventive Policing Unit
Description	<p>Preventive Policing Unit in Helsinki Police Department was founded 2012, based on the experiences gathered widely from abroad. The main aim of the unit is to enhance the security of the city of Helsinki and early on to prevent phenomena that are endangering the security together with other police units - both local and national units (e.g. Finnish Security Intelligence Service and National Bureau of Investigation) - authorities, NGOs, companies and citizens of Helsinki. A key measure to achieve the goal is to build trust between the police and the NGOs, as well as the communities in Helsinki and together to try to solve possible security challenges. The security cooperation and planning is based on the reciprocity that advantages every party. An early intervention requires an active and target-oriented cooperation with the chosen partners.</p> <p>One of the main daily tasks of the Preventive Policing Unit is to prevent violent extremism (individuals that are prepared to use violence to further their ideology, i.e. religious, left-wing and right-wing extremism, individuals with hard-line, extremist views and lone actors such as school shooters). This preventive work is done by four different groups of which each has its own focus and approach:</p> <ul style="list-style-type: none"> • Team 1 Cooperation with the multicultural and multilingual communities in Helsinki, prevention of religious extremism. • Team 2 Local problem solving and work with the youth, especially with those who are at the risk of committing crimes, first-time young offenders, socially excluded etc. • Team 3 Prevention of political extremism (i.e. left-wing and right-wing extremism). • Team 4 "The Anchor": A multi-professional team that includes policemen, social workers and psychiatric nurses sitting and working in the same room. <p>In daily work, police officers of Preventive Policing Unit who work both as uniformed and plainclothes, for instance meet communities and the youth, participate and help to organize several events held by the communities, visit mosques, work as 'negotiators' in the demonstrations, have seminars and Q&A sessions together with communities.</p> <p>In cases, where the teams meet an individual who is at the risk of radicalisation or who already has radicalized and has different problems as well, a multi-professional work and approach is often used. This means that cases could be solved either by the Team4 or some other team itself or together with the other teams and units, but the team can also use a help of suitable NGO too.</p> <p>As the result of good cooperation, the police in Helsinki have a wide network of partners in cooperation that are doing the same work towards the same goal: to enhance the security and to prevent violent extremism.</p>
Approach	Creating CVE infrastructure

	Community engagement/empowerment
Target audience	Law enforcement officers Youths/pupils/students General public
Evidence and evaluation	Not yet measured/evaluated. Generally, feedback from the field (e.g. from the immigrant communities, other authorities, as well as NGOs) has been very positive and encouraging. Multi-professional and non-traditional police work have received acknowledgement widely. In the RAN Derad working group meeting (Riga, 16.-17.4.2015) feedback of the model of Preventive Policing Unit was very positive and the participants were mostly very interested in it.
Sustainability and transferability	A permanent part of Helsinki Police Department since April 2012. Basic elements of the model could be transferrable to other local police departments too.
Geographical scope	Helsinki, Finland
Start of the practice	01.04.2012
Presented and discussed in RAN meeting	RAN Derad, 16.-17.4.2015, Riga (LV)
Relation to other EC initiatives	None
Organisation	<i>Preventive Policing Unit, Helsinki Police Department (a local police department / law enforcement authority)</i>
Country of origin	Finland
Contact details	Viljatie 2 00700 Helsinki Finland P.O. Box 11 FI-00241Helsinki Finland Superintendent Jari Taponen, Head of the unit jari.taponen@poliisi.fi (+358) 295 47 4303 (+358) 295 47 4300 www.poliisi.fi/helsinki www.poliisi.fi/en/helsinki

Name of the practice	<p>8.5.4 <i>The Danish SSP system</i> <i>Local collaboration between schools, social service and police</i></p>
Description	<p>The origins and effort The Danish SSP collaborative system organizes the local and municipal crime preventive efforts towards children and adolescents. This may also include families.</p> <p>SSP-system was originally established in 1977 when the Danish Crime Prevention Council appointed the Central SSP committee. Nowadays, the vast majority of local authorities have established the SSP collaboration, which may be organized differently in the municipalities.</p> <p>The three units (School, Social Services and Police) cooperate in the SSP-system, while these bodies in particular are responsible for children and young people's well-being and upbringing. Furthermore, the school system, the social system and the police are by Danish Legislation required to carry out crime prevention in the broadest sense.</p> <p>The SSP system has in recent years been supplemented by new similar cross-sectional and interdisciplinary structures like: The PSP system: collaboration between Police, Social services and Psychiatry. The SSD-system: collaboration between Social services, School, healthcare and Daycare. The SSP+: the local SSP collaboration expanded to youngsters in the age from 18-25.</p> <p>The aim and practical objectives of the SSP system SSP collaboration aims at identifying risk factors and reasons behind delinquency and crimes committed by children and youngsters and furthermore, to process these causal factors in a preventive perspective. This also includes the attention and support of protective factors in the youngster's daily life and environments. The basic idea of the SSP collaboration system is that the quality of crime prevention work is strengthened by the sharing of information between the professions. Thus, the interdisciplinary collaboration strengthens the awareness of risk signs and risk factors in the daily life of children and adolescents at risk, thereby also improving the opportunities to act preventive or even intervene on such signs and factors in a preventive action. Thus, the objectives of the SSP collaboration is to build, operate and maintain a local network with an efficient crime preventive impact on children and young people's everyday life. This is done through 3 focus areas in the collaboration:</p> <p>The general preventive action The specific effort The individual-oriented effort</p>
Approach	<p>Creating CVE infrastructure Community engagement/empowerment</p>

Target audience	Youth/pupils/students
Deliverables	<p>The <i>general</i> preventive action In practice, the general preventive action is targeted groups of youngsters, in which there has been no evidence of criminal behaviour. On this level of action, the SSP means are, in general, attitudinal lessons in schools and youth club. It may also be more recreational actions such as sports and other leisure activities, homework support, leisure centres in vulnerable residential areas, involvement of families etc.</p> <p>The <i>specific</i> effort On the level of specific efforts, the SSP collaboration is especially targeting children and young people at odds with the law or showing signs of neglect. Apart from the general means of preventive actions, the specific efforts may also include special projects, enhancing the possibilities for developing and testing targeted methods that may provide new good practice.</p> <p>The <i>individual-oriented</i> effort These efforts are targeting children and young people who already have committed crimes. The goal is to prevent them from continuing along the crime road, often through special treatment measures. On of the methods used may be home visits in order to form an impression of the environments. Thus, there may be established a family-based plan for the further preventive process. Overall, the individual-oriented efforts can be described as recidive-prevention.</p> <p>The SSP role in the fight against radicalisation and extremism The SSP system plays a central role in the general efforts against radicalisation and extremism among young people in Denmark. All over the country, the local SSP councils and implementation networks have been trained in the spotting and handling risk signs of radicalisation and youngster’s attachment to extremist ideas and groups etc. Also, the SSP-system has played a central part as partner in special projects and other initiatives in the Governmental Action plans against radicalisation and extremism.</p>
Evidence and evaluation	<p>As a very old system and as the basic structure of municipal preventive efforts in Denmark, the SSP system has currently been evaluated, giving evidence for efficient prevention and for the value of interdisciplinary efforts. Thus, the evidence-based approach and knowledge-sharing is a central perspective for all work in the SSP-system.</p> <p>As one of the more recent examples, the Danish Crime Preventive Counsel in 2012 published the report “SSP - a guide to the collaboration”, describing good practice from the SSP organisation and long-term experience (in Danish).</p>
Sustainability and transferability	<p>The overall transferability may be challenging, as the SSP-system forms the basic structure of all preventive actions in Denmark, as stated by law.</p> <p>The Danish SSP-system may, however, be inspirational and also transferable on the methodical level, thus showing ways to make a local interdisciplinary collaboration work through local committees with representatives from the school system, social services and police. This kind of preventive collaboration could also be established</p>

	on a more informal basis, not demanding the formal and statutory structure as in Denmark.
Geographical scope	The SSP-system is implemented in the basic preventive structure in all Danish municipalities.
Start of the practice	The SSP-system goes back to the seventies.
Presented and discussed in RAN meeting	RAN Prevent, June 2013, Berlin The SSP system has on several occasions been presented in RAN meetings, due to the system's central position in all prevention work in Denmark, including the efforts against de-radicalisation and violent extremism.
Relation to other EC initiatives	None
Organisation	<p><i>The organisational structure</i> <i>The SSP collaboration is organized on 3 levels:</i></p> <ul style="list-style-type: none"> - <i>The political-strategic level</i> - <i>The coordinating level</i> - <i>The implementing level</i> <p><i>The political-strategic level includes representatives from the highest rank of police together with mayors from the municipalities and other strategic partners on the regional-local level. On this level, the annual strategies and action plans for the cross-sectional and interdisciplinary collaboration are decided.</i></p> <p><i>The coordinating level is organized in local councils consisting of leading persons/coordinators from the municipal authorities and local police. The local councils are responsible for the implementation of the overall strategies and action plans. Special SSP-consultants are appointed as the bridge builders between the coordinating and implementing level.</i></p> <p><i>The implementing level consists of local professionals from schools, police, street workers, social workers, social housing workers etc. - meeting in close networks on a very regular basis to coordinate the practical preventive actions in the local area.</i></p>
Country of origin	Denmark
Contact details	For more information, contact the RAN Secretariat at ran@radaradvies.nl .

Name of the practice	8.5.5 Archer
Description	Archer is a consequence management exercise designed to bring together key strategic partners to help them improve their understanding and communication in the wake of a spontaneous counter terrorism arrest. It uses a backdrop of a number of issues such as hate crime, key national events and national demonstrations.
Approach	Creating CVE infrastructure
Target audience	Authorities Local Community Organisations/NGOs Health practitioners
Deliverables	Training modules, DVD and linked workbooks.
Evidence and evaluation	Each delivery is quality assured by trained facilitators in Prevent. Each Archer event is evaluated by regional Prevent teams.
Sustainability and transferability	Archer explores the wide ranging and long term detrimental impact that counter terrorism operations can have on communities if not managed effectively. It plays a great deal of emphasis on media messages and social media in the run up to high profile events. Delivery and cost: Free, excluding venue and provisions. Training is also provided at no cost. Delivered by ACPO Prevent Delivery Unit with support from local Prevent leads.
Geographical scope	Across England Wales and Scotland.
Start of the practice	Since 2010 - based on a concept from Lancashire Constabulary and developed into a national product by ACPO(TAM)/NCTPHQ.
Presented and discussed in RAN meeting	Nominated through a number of RAN POL meetings but especially at the RAN Pol Study visit in London in December 2013.
Relation to other EC initiatives	None
Organisation	<i>The National Counter Terrorism Policing HQ (NCTPHQ) (Formerly ACPO (TAM)) is the strategic coordinating and liaison body of the UK police response to Prevent across all 43 police forces. They are financed by central government Counter-Terrorism funding.</i>
Country of origin	United Kingdom
Contact details	NCTPHQ Prevent, 8th Floor 10 Victoria Street London, SW1H 0NN United Kingdom prevent.acpotam@met.pnn.police.uk

Name of the practice	8.5.6 <i>Channel</i>
Description	<p>Channel was first piloted in 2007 and rolled out across England and Wales in April 2012. Channel is a programme which focuses on providing support at an early stage to people who are identified as being vulnerable to being drawn into terrorism. The programme uses a multi-agency approach to protect vulnerable people by:</p> <ol style="list-style-type: none"> a. identifying individuals at risk; b. assessing the nature and extent of that risk; and c. developing the most appropriate support plan for the individuals concerned. <p>Channel may be appropriate for anyone who is vulnerable to being drawn into any form of terrorism. Channel is about ensuring that vulnerable children and adults of any faith, ethnicity or background receive support before their vulnerabilities are exploited by those that would want them to embrace terrorism, and before they become involved in criminal terrorist related activity.</p> <p>Success of the programme is very much dependent on the co-operation and co-ordinated activity of partners. It works best when the individuals and their families fully engage with the programme and are supported in a consistent manner.</p> <p>Individuals and organisations holding extremist views or supporting terrorist-related activity of any kind, in this country or overseas, have no place in delivering Channel and will not be given public funding to do so. This applies irrespective of the source of the funding: central government, local government, policing or other publicly-funded bodies.</p> <p>The police co-ordinate activity by requesting relevant information from panel partners about a referred individual. They will use this information to make an initial assessment of the nature and extent of the vulnerability which the person has. The information will then be presented to a panel.</p> <p>The Counter Terrorism & Security Act 2015 is intended to secure effective local co-operation and delivery of Channel in all areas and to build on the good practice already operating in many areas. In practice, the legislation requires:</p> <ol style="list-style-type: none"> a. local authorities to ensure that a multi-agency panel exists in their area; b. the local authority to chair the panel; c. the panel to develop a support plan for individuals accepted as Channel cases; d. the panel to consider alternative forms of support, including health and social services, where Channel is not appropriate; e. all partners of a panel (as specified in Schedule 7), so far as appropriate and reasonably practicable, to cooperate with the police and the panel in the carrying out of their functions.
Approach	<p>Creating CVE infrastructure Community engagement/empowerment</p>

Target audience	Authorities Law enforcement officers Local Community Organisations/NGOs
Deliverables	Establishment of multi-agency panel chaired by the Local Authority capable of developing bespoke interventions utilising both mainstream safeguarding techniques as well as bespoke CT/extremism interventions.
Evidence and evaluation	Each referral is monitored for success and outcome by Channel practitioners using the Vulnerability Assessment Framework throughout the process to identify changes in vulnerability.
Sustainability and transferability	Channel is now a statutory duty in England and Wales following its inclusion in the Counter-Terrorism Act 2015. On that basis the programme is sustainable as Local Authorities, the police and other partners must deliver it as core business. It is good practice for Channel to work alongside existing mainstream provision whenever possible.
Geographical scope	England and Wales
Start of the practice	2007
Presented and discussed in RAN meeting	RAN POL , 12 -13 December 2013, London (UK)
Relation to other EC initiatives	None
